Ambiguous Aggression in German Realism and Beyond Barbara N.

Nagel,2019-10-17 Our main words defining emotional states suggest that we have clarity about them expressions like love hatred anxiety or sorrow seem clear enough The reality however tends to be more complicated We are often faced with gestures and utterances that are difficult to interpret we thus find ourselves wondering about the affective force of what has just been said Was that an insult Flirtation Aggression Ambiguous Aggression in German Realism and Beyond looks at three interlocking forms of social violence flirtation passive aggression and domestic violence In order to understand their circulation it traces their literary historical genealogy in German realism and modernism in scenes from Annette von Droste H Lshoff Adalbert Stifter Theodor Storm Theodor Fontane Robert Walser and Franz Kafka covering a historical period from the middle of the 19th century to the early decades of the 20th century Reading realist and modernist literature through 21st century affect theory and vice versa the analyses collected in this book show the deep literary history of our current cultural predicaments and predilections Research Into Violent Behavior United States. Mukaddes Gorar,2021-05-10 Honour based violence and abuse manifests itself in different forms and this book offers a comprehensive understanding of this phenomenon This book argues that the limits of honour crimes must be defined more widely so that they include conducts and behaviours that originate from the patriarchal notion of honour such as honour based oppression and breast ironing The book provides a critical analysis and synthesis of the law in England and Wales and in the international human rights sphere The relevant domestic legislation and cases are examined to reflect on whether adequate protection is provided for the victims and potential victims of honour based violence and abuse Since honour based violence is a violation of human rights the relevant international human rights law is examined to illustrate the perception of such crimes in the international arena The effectiveness of any remedy for victims of honour based violence and abuse depends on its capability to change deep rooted behaviours in communities with honour based patriarchal values This book

argues that the law does not provide the effective impact required in part due to patriarchal structures and that more efforts should be dedicated to changes in education. It is held that there is a need for an educational programme that is especially designed to tackle violence and promote gender equality. The book will be essential reading for academics, researchers and policy makers working in the areas of Human Rights Law, Criminal Law and Gender Studies.

Criminal Careers Witold Klaus, Irena Rzeplińska, Dagmara Woźniakowska-Fajst, 2022-12-30. Criminal Careers follows the lives and criminal behaviours of 2 397 people in Poland who as juveniles committed a crime and received a form of punishment from the juvenile court between the late 1980s and the year 2000. Through combining quantitative and qualitative research, their criminal careers, the differences between men and women, risk factors and reasons for nondesistance are analysed. Uniquely, the authors have used an extensive database of former juveniles in which as many as 40% were women. This book therefore makes a comparison between women and men in terms of their future life paths. Additionally, the researched group consisted of teenagers from two different periods: the 1980s, the transition generation, and 2000, the millennial generation, which in the context of Central and Eastern European countries means that they entered adulthood in completely different realities. These differences are therefore also explored in depth within the book. By focusing on Poland, the book provides a different perspective to criminal career research, which is generally limited to a few countries in Western Europe and the United States. The book will be of great interest to academics and students who are developing their own research in the fields of criminal careers, juvenile delinquency and antisocial behaviours by young people. It will also appeal to professionals including juvenile judges, probation officers, staff in correctional facilities and social rehabilitation institutions, social workers and employees of nonprofit organisations that support juveniles, people in crisis and prisoners or ex-prisoners.
