- Setting Margins
- Changing font size
- Changing alignment
- Using bold print
- Typing a paragraph with word wrap
- Spell checking
- Copy and paste

DIRECTIONS:

1. Open a Word document. Click on FILE- PAGE SET-UP. Change the margins to the following: top and bottom = 2 inches, left and right = 2 inches. Click on OK.
2. Change the font to Lucida Console, size 14 point, and type your name.
3. Change your name to bold print.
4. Center your name horizontally between the margins. (CENTER ALIGN)
5. Press the ENTER key once. Take OFF bold print.
6. Type Activity 3. Press the ENTER key twice.
7. Change the font to Times New Roman, size 12 point.
8. Change to LEFT ALIGN.
9. Type the paragraph below, with errors included, using word wrap (Do not hit enter at end of line). The computer may automatically correct some of your errors. That's ok. Hit ENTER when you are all done with the paragraph.

Did you spel this correctly? The spell checker may notice double words. Proper names such as as George, Tom, and Leessa may cause the spell checkr to display a message. You may be able to use a suggest buton so that you do not have to type each corection.

10. Use the spell checker to check for errors. Every red underlined word shows a potential error. Place the cursor on the word and right click. The computer will give you suggestions for changes. Click on the correct change. Another way to spell check is to click on the ABC icon on the

new developments in the field with existing chapters rewritten and new chapters added to each section The section on history and methods now includes a chapter on the crucial topic of the physics of functional neuroimaging the chapters on skill learning and executive functions are new to the domain section and chapters on childhood development and emotion and social cognition have been added to the section on developmental social and clinical applications The color insert has been increased in size enhancing the visual display of representative findings Contributors Todd S Braver Jeffrey Browndyke Roberto Cabeza B J Casey Jody Culham Clayton E Curtis Mark D Esposito Sander Daselaar Lila Davachi Ian Dobbins Karl J Friston Barry Giesbrecht Todd C Handy Joseph B Hopfinger Scott A Huettel Irene P Kan Alan Kingstone Eleni Kotsoni Kevin S LaBar George R Mangun Gregory McCarthy Uta Noppeney Robyn T Oliver Elizabeth A Phelps Russel A Poldrack Cathy J Price Marcus E Raichle Hannes Ruge Gaia Scerif Allen W Song Sharon L Thompson Schill Daniel T Willingham Richard J S Wise

Attentional Processing David LaBerge, 1995 LaBerge explores how we are able to restrict the input of extraneous and confusing information or prepare to process a future stimulus in order to take effective action As well as describing the pathways in the cortex presumed to be involved in attentional processing he examines the hypothesis that two subcortical structures the superior colliculus and the thalamus contain circuit mechanisms that embody an algorithm of attention In addition he takes us through various ways of posing the problem from an information processing description of how attention works to a consideration of some of the cognitive and behavioral consequences of the brain's computations such as desiring judging imaging and remembering

XIII Mediterranean Conference on Medical and Biological Engineering and Computing 2013 Laura M. Roa Romero, 2013-10-01 The general theme of MEDICON 2013 is Research and Development of Technology for Sustainable Healthcare This decade is being characterized by the appearance and use of emergent technologies under development This situation has produced a tremendous impact on Medicine and Biology from which it is expected an unparalleled evolution in these disciplines towards novel concept and practices The consequence will be a significant improvement in health care and well fare i e the shift from a reactive medicine to a preventive medicine This shift implies that the citizen will play an important role in the healthcare delivery process what requires a comprehensive and personalized assistance In this context society will meet emerging

media incorporated to all objects capable of providing a seamless adaptive anticipatory unobtrusive and pervasive assistance. The challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society while new paradigms are created for this inclusive society to be socially and economically sustainable and respectful with the environment. In this way these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications.

Teaching Children with Dyslexia Philomena Ott, 2007-05-07 *Teaching Children with Dyslexia* is essential reading for any teacher, Special Educational Needs Coordinator or teaching assistant who wants an insider's account of what dealing successfully with dyslexia entails. Written by one of the most well regarded practitioners in the field with over twenty five years experience this book is packed full with photocopiable exercises, activities and recommendations for resources, tests, teaching methods, advice and suggestions for strategies and techniques that are instantly transferable to classroom environments. This essential teaching companion includes chapters on how to spot dyslexia, screening and assessment tests, why it does not have to be hell to learn to spell, strategies for success for reluctant writers, meeting the challenge of dyslexia in adolescence. Written specifically to bolster teachers' confidence and empower them with the key to unlocking literacy problems in their most challenging pupils, this resource book should be on the shelf of every staff room. **A Guide to High School Redirection** Elaine Ciccone, 1991

What makes written words so special to the brain? Gui Xue, Urs Maurer, Mohamed L Seghier, 2015-01-22 Reading is an integral part of life in today's information driven societies. Since the pioneering work of Dejerine on word blindness in brain lesioned patients, the literature has increased exponentially from neuropsychological case reports to mechanistic accounts of word processing at the behavioural, neurofunctional and computational levels, tapping into diverse aspects of visual word processing. These studies have revealed some exciting findings about visual word processing including how the brain learns to read, how changes in literacy impact upon word processing strategies and whether word processing mechanisms vary across different alphabetic, logographic or artificial writing systems. Other studies have attempted to characterise typical and atypical word processes in special populations in order to explain why dyslexic brains struggle with words, how multilingualism changes the way our brains see words and what the exact developmental signatures are that would shape the acquisition of reading skills. Exciting new insights have also emerged from recent studies that have investigated word stimuli at the system network level by looking for instance at how the reading system interacts with other cognitive systems in a context dependent fashion, how visual language stimuli are integrated into the speech processing streams, how both left and right hemispheres cooperate and interact during word processing and what the exact contributions of subcortical and cerebellar regions to reading are. The contributions to this Research Topic highlight the latest findings regarding the different issues mentioned above, particularly how these findings can explain or model the different processes, mechanisms, pathways or cognitive strategies by which the human brain sees

words The introductory editorial summarising the contributions included here highlights how varieties of behavioural tests and neuroimaging techniques can be used to investigate word processing mechanisms across different alphabetic and logographic writing systems
