Challenging Boundaries in Language Education Achilleas Kostoulas, 2019-06-08 This edited collection challenges the perceptions of disciplinary linguistic geographical and ideological borders that run across language education. By highlighting commonalities and tracing connections between diverse sub fields that have traditionally been studied separately the book shows how the perspectives of practitioners and researchers working in diverse areas of language education can mutually inform each other. It consists of three thematic parts. Part I outlines the field of language education and challenges its definition by highlighting additional theoretical constructs that have tended to be viewed as separate from language education. Part II investigates curricular boundaries showing how the language learning curriculum can be enriched by connections with other curricular areas. Lastly Part III looks into the challenges and opportunities associated with language education against the backdrop of globalisation.
