Recent Developments in Structural Engineering, Volume 3

Manmohan Dass Goel, Laxmikant M. Gupta, Omprakash R. Jaiswal, 2025-03-22 The book presents the select proceedings of 13th Structural Engineering Convention. It covers the latest research in multidisciplinary areas within structural engineering. Various topics covered include structural dynamics, structural mechanics, finite element methods, structural vibration control, advanced cementitious and composite materials, bridge engineering, soil structure interaction, blast impact, fire material, and many more. The book will be a useful reference material for structural engineering researchers and practicing engineers.

Sustainable Development in Creative Industries:

Embracing Digital Culture for Humanities Dyah Ayu Wiwid Sintowoko, Idhar Resmadi, Hanif Azhar, Ganjar Gumilar, Taufiq Wahab, 2023-05-05 This book provides the thoughtful writings of a selection of authors illustrating a central concept: Sustainable Development in Creative Industries, which utilizes a monetary equilibrium addressing issues particularly those associated with the use of an integrated area in cyberspace and physical space and their effect on the creative industries. 15 universities from Asia and Europe have participated in the 9th Bandung Creative Movement where this topic was explored. Sustainability issues are now at the forefront of progress. The book covers four main areas. The first section, entitled Art, Culture, and Society, delves into the various sectors that contribute to building a more sustainable environment, including the arts and culture. Whereas Design and Architecture is referring to cutting-edge practices in the fields of manufacturing, transportation, interior design, and building construction. The third section, Technology and New Media, delves into the transformation of technology into a new medium for the development of the creative industries. The final section, management and Business, discusses an innovative perspective on the state of the market and management in the sector. Anyone interested in the intersection of creative industries, sustainability, and digital cultures would benefit intellectually from reading this book. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives (CC BY-NC-ND 4.0) license. Asset Management of Bridges Khaled M. Mahmoud, 2017-08-10 Maintaining bridges in good condition has extended service life and proven to be more cost-effective than allowing degradation to advance, necessitating costlier bridge rehabilitation or replacement projects. Preventive maintenance is therefore an important tool to retard deterioration and sustain the safe operation of bridges. This includes a continuous effort of periodic inspections, condition evaluations, and prioritizing repairs accordingly. The above measures define the framework for asset management of bridges. On August 21-22, 2017, bridge engineering experts from around the world convened at the 9th New York City Bridge Conference to discuss issues of construction, design, inspection, monitoring, preservation, and rehabilitation of bridge structures. This volume documents their contributions to the safe operation of bridge assets.
