**Social Statistics** Thomas J. Linneman,2025-07-31 With a clear engaging writing style and fascinating examples using a variety of real data this text covers the contemporary statistical techniques that students will encounter in the world of social research It covers these

techniques at an introductory level and carefully guides students through increasingly complex examples without intimidating them. Recurrent examples using four timely topics: immigration, income inequality, the distribution of household labor, and health, including attitudes toward doctors and pandemic restrictions, help students understand how the techniques fit together and how to use the techniques in combination with one another. A superb author created web resource accompanies the text. How to make clear presentations of research results is also a feature of the text. New to this edition: Most of the literature examples that end each chapter are new and use very recent research from top academic journals; over half of the new literature examples are from 2023 or 2024. They feature research about some of the most pertinent and provocative social issues of the day: political polarization, conspiracy beliefs, mental health, transgender support, racial stereotypes, vaccine refusal, sexual harassment, and numerous facets of the COVID-19 pandemic. Examples throughout the book use the most recent data from the General Social Survey. Four timely topics are threaded throughout the book: immigration, income inequality, the distribution of household labor, and health. Linneman uses these topics recurrently with different statistical techniques to illustrate how the techniques are related to one another. The new edition more explicitly emphasizes that the various techniques the students are learning are often used in combination with one another. Linneman carefully scaffolds the techniques, introducing a new technique and then showing how this technique can be combined with techniques taught in previous chapters. He does this with a new emphasis on psychologically supporting students who might be trepidatious about their newfound statistical skills.

**Multiculturalism on the Mend?** Arjun Tremblay, Paul May, 2024-11-13 This book sets out to provide a clearer picture of the movement and directionality of polyethnic rights or immigrant-centered multiculturalism as it is more commonly known, following recent shifts to the left in government, i.e. victories of left parties, inclusion of left parties in coalition governments, increase in left parties' presence in parliament, defeat of far-right parties, and right-wing populists. In so doing, it aims to understand the near and longer-term prospects of multicultural policy, multicultural discourse, demographic multiculturalism,

and laws and regulations related to the immigration process in the 21st century and in an increasingly complex ideological environment The book comprises case studies of multicultural developments in eight countries Sweden Canada Aotearoa New Zealand Switzerland Germany the United States Australia and the United Kingdom all of which have recently 2014 2024 experienced a shift to the left in national level politics albeit in different ways and to varying degrees In addition to understanding what has happened to multicultural policy and discourse in recent years the book also sets out to identify the conditions under which multiculturalism is more or less likely to mend after a shift to the left in government The book's overall aim is to see whether there is a future for multiculturalism in an increasingly ideologically complex environment or whether the victories of the political right the rise of populism the resurgence of anti immigrant racism the COVID 19 pandemic and the changing nature of minority mobilization have irreversibly altered the course of multicultural affairs

**Globalisation, Migration and Socio-Economic Change in Contemporary Greece** Panos Hatziprokopiou, 2025-10-01 This empirical study examines issues surrounding the integration of immigrants in Greece in particular in Thessaloniki as well as looking at migrants in neighbouring countries Albania and Bulgaria The book suggests that immigrants integration should be understood in relation to broader processes of social change which are increasingly connected to global forces The transformation of Greece into a multicultural society has taken place during a period of transition and of increasing exposure to the international environment Within this context Thessaloniki has become a new home for immigrants from the Balkans in search of new identities Integration is seen as a multifaceted and dynamic process The concept of incorporation is critically introduced in order to analyse both the ways by which migrants organise their lives in the host society and their structural institutional and cultural conditions The analytical framework is built upon an interdisciplinary approach that takes into account different incorporation contexts socio political responses the labour market housing and social space A number of additional factors are also considered e.g. the composition of migrant populations migratory patterns and dynamics the role of social networks immigrants strategies The book provides an empirical account of the immigrants characteristics explaining the patterns and typologies of immigrants integration in Greece Immigrants become a social category constructed by exclusionary mechanisms restrictive immigration policy labour market exploitation xenophobia However they do make a living in Thessaloniki their integration is subject to time gradually immigrants become organic elements of the host society which shapes but is also being shaped by migration

Globalization and Families Bahira Trask,2009-12-01 As our world becomes increasingly interconnected through economic integration technology communication and political transformation the sphere of the family is a fundamental arena where globalizing processes become realized For most individuals family in whatever configuration still remains the primary arrangement that meets certain social emotional and economic needs It is within families that decisions about work care movement and identity are negotiated contested and resolved Globalization has profound implications for how families assess the choices and challenges that accompany this process Families are integrated into the global economy through formal and informal work through production and consumption and through their relationship with nation states Moreover ever growing communication and information technologies allow families and individuals to have access to others in an unprecedented manner These relationships are accompanied by new conceptualizations of appropriate lifestyles identities and ideologies even among those who may never be able to access them Despite a general acknowledgement of the complexities and social significance inherent in globalization most analyses remain top down focused on the global economy corporate strategies and political streams This limited perspective on globalization has had profound implications for understanding social life The impact of globalization on gender ideologies work family relationships conceptualizations of children youth and the elderly have been virtually absent in mainstream approaches creating false impressions that dichotomize globalization as a separate process from the social order Moreover most approaches to globalization and social phenomena emphasize the Western experience These inaccurate assumptions have profound implications for families and for the globalization process itself In order to create and implement programs and policies that can harness globalization for the good of mankind and that could reverse some of the deleterious effects that have affected the world s most vulnerable populations we need to make the interplay between globalization and families a primary focus
