STORING BATTERIES WHICH HAVE BEEN IN SERVICE Batteries which have been in service may be stored either wet or dry. A battery which is to be out of commission for less than a year may be put into wet storage providing it is in a condition that will not soon require dismantling anyway in which case it should be put into dry storage. Dry storage requires no attention during the storage period. The battery must however be dismantled at the beginning and reassembled at the end of this period. The batteries are prepared for storage as described below.

Wet Storage

- 1 Before putting the batteries in storage give them a complete bench charge. See page 170.
- 2 Store the batteries on a bench or shelf in a convenient location and large enough to allow a little air space around each battery.
- 3 Place each battery upon wooden strips in order to keep the bottom of the battery clear of the bench or shelf.
- 4 Apply vaseline freely to the battery terminals and to exposed copper wires in the battery cables if the cables are burned directly to the battery terminals. If the cables are not burned on, remove them from the battery.
- 5 If convenient, install the necessary wiring switches etc so that batteries may be connected up and charged where they stand. Otherwise the batteries must be charged occasionally on the charging bench.
- 6 Batteries in wet storage may be charged by the Exide Trickle charge method or may be given a bench charge at regular intervals.
