Kremer,2021-11-30 Conceived of as a way to commemorate Missouri s bicentennial of statehood this unique work presents the perspective of Gary Kremer one of the Show Me State s foremost historians as he ponders why history played out as it did over the course of the two centuries since Missouri s admittance to the Union In the writing of what is much more than a survey history Kremer himself a fifth generation

Missourian infuses the narrative with his vast knowledge and personal experiences even as he considers what being a Missourian has meant across the many years and to this day to all of the state's people and how the forces of history time place race gender religion and class shaped people and determined their opportunities and choices in turn creating collective experiences that draw upon the past in an attempt to make sense of the present and plan for the future Key elements of the book include the centrality of race to the Missouri experience from the time Missourians began to seek statehood in 1817 all the way up to the Black Lives Matter movement of the 21st century as well as ongoing tensions created by the urban rural divide and struggle to define the proper role of government in society

**Design After Decline** Brent D. Ryan, 2012-05-22

Almost fifty years ago America's industrial cities Detroit Philadelphia Cleveland Baltimore and others began shedding people and jobs Today they are littered with tens of thousands of abandoned houses shuttered factories and vacant lots With population and housing losses continuing in the wake of the 2007 financial crisis the future of neighborhoods in these places is precarious How we will rebuild shrinking cities and what urban design vision will guide their future remain contentious and unknown In *Design After Decline* Brent D Ryan reveals the fraught and intermittently successful efforts of architects planners and city officials to rebuild shrinking cities following mid century urban renewal With modern architecture in disrepute federal funds scarce and architects and planners disengaged politicians and developers were left to pick up the pieces In twin narratives Ryan describes how America's two largest shrinking cities Detroit and Philadelphia faced the challenge of design after decline in dramatically different ways While Detroit allowed developers to carve up the cityscape into suburban enclaves Philadelphia brought back 1960s style land condemnation for benevolent social purposes Both Detroit and Philadelphia succeeded in rebuilding but at the cost of innovative urban design and planning Ryan proposes that the unprecedented crisis facing these cities today requires a revival of the visionary thinking found in the best modernist urban design tempered with the lessons gained from post 1960s community planning Depicting the ideal shrinking city as a shifting patchwork of open and settled areas Ryan concludes that accepting the inevitable decline and abandonment of some neighborhoods while rebuilding others as new neighborhoods with innovative design and planning can reignite modernism's spirit of optimism and shape a brighter future for shrinking cities and their residents
