Competing Fundamentalisms Sathianathan Clarke, 2017-03-29 Why do certain groups and individuals seek to do harm in the name of God While studies often claim to hold the key to this frightening phenomenon they seldom account for the crucial role that religious conviction plays not just in radical Islam but also in the fundamentalist branches of the world's two other largest religions Christianity and Hinduism As the first book to examine violent extremism in all three religions together *Competing Fundamentalisms* draws on studies in sociology psychology culture and economics while focusing on the central role of religious ideology to paint a richer portrait of this potent force in modern life Clarke argues that the forces of globalization fuel the aggression of these movements to produce the competing feature of religious fundamentalisms which have more in common with their counterparts across religious lines than they do with the members of their own religions He proposes ways to deescalate religious violence in the service of peacemaking
