

# PROVISION OF PHARMACEUTICAL CARE AND WORKING UP A PATIENT IN THE INPATIENT SETTING<sup>1,2,3</sup> – A STUDENT GUIDE

## DESCRIPTION OF GUIDE

This guide has been developed to provide students with a framework to systematically work up a patient, create a care plan, and to communicate this with their practice educator in the inpatient setting.

## LEARNING OBJECTIVES

After reviewing this guide, the student will be able to:

- ✓ Explain what is expected when assigned a patient to work up
- ✓ Develop and implement a comprehensive care plan for a medical condition
- ✓ Describe the steps involved in presenting a patient to the practice educator in the inpatient setting

## PROCESS

***Note:** The resource provided here serves as a general guide for use but the practice educator can amend this at any time to better suit their practice environment and patient population. As approaches and resources may vary, students should always discuss their approach with the practice educator on site prior to completing these types of activities for the first time while on practicum.*

### A) Working-up a patient

Students are encouraged to capture patient work-ups by reviewing the patient's medical records, conducting a patient/caregiver interview, and documenting findings using the **Inpatient Work Up Form**.

- The **Inpatient Work Up Form** is a tool that is meant to assist student's in gathering and organizing information related to their patient that will assist in identifying and preventing drug therapy problems.
- Student's should not be simply copying information from the patient chart, but rather be thinking about each piece of information that they transcribe and how this could potentially affect the Drug Therapy Problems (DTP's) identified and the care plans they develop.

- 1) Collect relevant information from the chart (including old charts, if applicable) including:
  - demographic data
  - gender, weight, height
  - admission information including: chief complaint (reason for admission to hospital), pertinent vitals/physical findings
