Patterns Of Intuition Musical Creativity In The Light Of Algorithmic Composition:

Patterns of Intuition Gerhard Nierhaus, 2015-01-11 The present book is the result of a three year research project which investigated the creative act of composing by means of algorithmic composition Central to the investigation are the compositional strategies of 12 composers which were documented through a dialogic and cyclic process of modelling and evaluating musical materials The aesthetic premises and compositional approaches configure a rich spectrum of diverse positions which is reflected also in the kinds of approaches and methods used These approaches and methods include the generation and evaluation of chord sequences using genetic algorithms the application of morphing strategies to research harmonic transformations an automatic classification of personal preferences via machine learning and an application of mathematical music theory to the analysis and resynthesis of musical material The second part of the book features contributions by Sandeep Bhagwati William Brooks David Cope Darla Crispin Nicolas Donin and Guerino Mazzola These authors variously consider the project from different perspectives offer independent approaches or provide more general reflections from their respective research fields

Formal Methods in Musicology Francis Knights, Pablo Padilla, 2025-04-28 In recent years established techniques from disciplines like mathematics and statistics have successfully been applied to music analysis helping us to understand style chronology and many other components of composition Using examples drawn from a variety of musical types and styles especially classical music this book explains how to use some of these techniques and how they can be applied to various musical genres This is supported by a series of specialist case studies provided by expert researchers together with suggestions as to other types of questions that can be asked and answered using these methods

thedigitalmusician **Experience Music Experiment** William Brooks,2021-08-19 Truth happens to an idea So wrote William James in 1907 and twenty four years later John Dewey argued that artistic experience entailed a process of doing and undergoing But what do these ideas have to do with music or with research conducted in and through music that is with artistic research In this collection of essays fourteen very different authors respond with distinct and challenging perspectives Some report on their own experiments and experiences some offer probing analyses of noteworthy practices some view historical continuities through the lens of pragmatism and artistic experiment The resulting collection yields new insights into what musicians do how they experiment and what they experience insights that arise not from doctrine but from diverse voices seeking common ground in and through experimental discourse artistic research in and of itself
