Domination and Subordination as a Social Organization Principle in Georg Simmel's Soziologie Adele Bianco, 2014-07-16 Analyzing Georg Simmel's theory of domination and subordination as presented in his *Soziologie* 1908 Adele Bianco focuses on concrete case studies to derive an interpretation of globalization processes Within sociology domination and subordination are reciprocal They represent constitutive modes of associated living based on a hierarchical structure Domination and subordination reflect social configurations but are very controversial categories Sometimes perceived as a justification of the status quo they also run the risk of legitimizing the perpetuation of inequalities In truth they are tools to help us understand social order and identify inequalities regulating structures Domination and Subordination as a Social Organization Principle in Georg Simmel's *Soziologie* begins by defining the relationship between domination and subordination at the micro level the relationship among subjects Then after discussing the macro level Bianco employs a variety of case studies to expose the intricacies of Simmel's domination and subordination theory The ensuing discussions of democracy employment relationships social relationships and globalization answer such questions as Why is society divided between a top and a bottom What does it mean to wield authority What degrees of power are held by those in a position of inferiority Why is the strong subject ultimately in need of the weak subject What can be said of a majority winning in a democracy and what is the minority left with How can the social condition of the modern worker be reconciled with his proclaimed freedom and What does subordination to the employer effectively comprise Scholars and students of sociology social theory labor studies and psychology will benefit from this book's combination of intricate theories and real world case studies towards a comprehensive theory of modern globalization **Geschlecht, Klasse, Ethnizität**

International Handbook of Violence Research Wilhelm Heitmeyer, John Hagan, 2003-12-31 An international manual is like a world cruise a once in a lifetime experience All the more reason to consider carefully whether it is necessary This can hardly be the case if previous research in the selected field has already been the subject of an earlier review or even several competing surveys On the other hand more thorough study is necessary if the intensity and scope of research are increasing without comprehensive assessments That was the situation in Western societies when work began on this project in the summer of 1998 It was then too that the challenges emerged any manual especially an international one is a very special type of text which is anything but routine It calls for a special effort the state of the art has to be documented for selected subject areas and its presentation made as compelling as possible The editors were delighted therefore by the cooperation and commitment shown by the eighty one contributors from ten countries who were recruited to write on the sixty two different topics by the constructive way in which any requests for changes were dealt with and by the patient response to our many queries This volume is the result of a long process It began with the first drafts outlining the structure of the work which were submitted to various distinguished colleagues Friedheim Neidhardt of Berlin Gertrud Nunner Winkler of Munich and Roland Eckert of Trier to name only a few supplied valuable comments at this stage
