Dimensions of Locality Georg Stauth, Samuli Schielke, 2015-09-15 As a world religion Islam is based on a highly abstract and absolute notion of the transcendent which its followers establish and celebrate in a seemingly contradictory fashion at very specific sites Mecca Medina Jerusalem and the vast and complex landscapes of mosques and Muslim saints shrines around the world Sacred locality has thus become a paradigm for the relationship between the human and the transcendent a model for urban planning regional networks imaginary spaces and spiritual hierarchies alike This importance of saintly places has however become increasingly complicated and troubled by reformist currents within Islam on the one hand and the emergence of modern archeology and anthropology on the other While they have often tended to posit the local in opposition to the universal in this volume islamologists anthropologists and sociologists offer new ways of thinking about the local the place and the conceptual landscapes and spaces of saints In this its eighth volume the Yearbook for the Sociology of Islam looks at different sites and regions around the Muslim world notably Burkina Faso Egypt Ethiopia and Southeast Asia not as localized versions of a universal Islam but as constitutive of one particular outlook of the universalizing order of a world religion

A Global Middle East Liat Kozma, Cyrus Schayegh, Avner Wishnitzer, 2014-12-03 The start of the twentieth century ushered in a period of unprecedented change in the Middle East These transformations brought about by the emergence of the modern state system and an increasing interaction with a more globalized economy irrevocably altered the political and social structures of the Middle East even as the region itself left its mark on the processes of globalization themselves As a result of these changes there was an intensification in the movement of people commodities and ideas across the globe commercial activity urban space intellectual life leisure culture immigration patterns and education nothing was left untouched It shows how even as the Middle East was responding to increased economic interactions with the rest of the world by restructuring not only local economies but also cultural political and social institutions the region's engagement with these trends altered the nature of globalization itself This period has been seen as one in which the modern state system and its oftentimes artificial boundaries emerged in the Middle East But this book highlights how despite this it was also one of tremendous interconnection Approaching the first period of modern globalization by investigating the movement of people objects and ideas into around and out of the Middle East the authors demonstrate how the Middle East in this period was not simply subject or reactive to the West but rather an active participant in the transnational flows that transformed both the region and the world A Global Middle East offers an examination of a variety of intellectual and more material exchanges such as nascent feminist movements and Islamist ideologies as well as the movement of sex workers across the Mediterranean and Jewish migration into Palestine A Global Middle East emphasises this by examining the multi directional nature of movement across borders as well as this movement's intensity volume and speed By focusing on the theme of mobility as the defining feature of modern globalization in the Middle East it provides an essential examination of the formative years of the region

The Perils of Joy Samuli Schielke, 2012-12-13 Mulids festivals in honor of Muslim friends of God have been part of Muslim religious and cultural life for close to a thousand years While many Egyptians see mulids as an expression of joy and love for the Prophet Muhammad and his family many others see them as opposed to Islam a sign of a backward mentality a piece of folklore at best What is it about a mulid that makes it a threat to Islam and modernity in the eyes of some and an indication of pious devotion in the eyes of others What makes the celebration of a saint's festival appear in such dramatically different contours The Perils of Joy offers a rich investigation both historical and ethnographic of conflicting and transforming attitudes toward festivals in contemporary Egypt Schielke argues that mulids are characterized by a utopian momentum of the extraordinary that troubles the grand schemes of order and perfection that have become hegemonic in Egypt since the twentieth century Not an opposition between state and civil society nor a division between Islamists and secularists but rather the competition between different perceptions of what makes up a complete life forms the central line of conflict in the contestation of festive culture

Contesting Visibility Heike Behrend, 2014-03-15 Since the introduction of photography by commercial studio photographers and the colonial state in Kenya this global medium has been intensely debated and contested among Muslims on the cosmopolitan East African coast This book does not only explore the making circulation and consumption of popular photographs but also the other side their rejection and obliteration an essential aspect of a medium's history that should not be neglected It deals with various social spaces of refusal in the local Muslim milieu and in that of traditional spirit mediums in which gendered visibility was and is contested in various and creative ways It focuses on the aesthetics of withdrawal the various ways and techniques that process the photographic act as well as the photographic image to theatricalize the surface of the image in new ways by veiling masking and concealing In a fragmented historical perspective Heike Behrend seeks to complement decenter and counter the history of photography as it has been told by the West and to narrate another history beginning with preceding local media such as textiles and spirit possession
