Thomas,2012-03-15 The author of the bestselling *Panzer IV at War* delivers a highly illustrated look at a key element in the
German Blitzkrieg during the Second World War [HistoryOfWar.org](#) In the aftermath of the Great War which saw the
introduction of the tank the more far sighted military leaders realized that the future of warfare hinged on a balance of
mobility firepower and protection Tanks would need to be accompanied into battle by supporting arms specifically infantry
artillery and engineers An all fully tracked field army was thought to be too expensive so the semi tracked support vehicle
commonly called a halftrack was born The halftrack concept was embraced by France the US and most notably Germany The
Germans commissioned numerous types of half tracked tractors which were classified by the weight of their towed load
These vehicles were designated Sonderkraffarzeug special motorized vehicle abbreviated as Sd Kfz These front wheel
steering vehicles with tracked drive transformed the fighting quality of the armored divisions They carried the infantry
alongside the advancing panzers and brought guns and pontoon bridge sections The halftrack also became the preferred
reconnaissance vehicle This latest addition to the highly successful and collectable Images of War series has a superb
collection of rare images supported by detailed captions and text of the many Sd Kfz variants in diverse theatres of war It is
worth reflecting that without half tracks there could have been no Blitzkrieg *Panzer-Grenadiers* Peter Chamberlain,Chris
Ellis,1972
