**Workshop on MACHINE LEARNING** Pat Langley, 2014-05-12 Proceedings of the Fourth International Workshop on Machine Learning provides careful theoretical analyses that make clear contact with traditional problems in machine learning This book discusses the key role of learning in cognition Organized into 39 chapters this book begins with an overview of pattern recognition systems of necessity that incorporate an approximate matching process to determine the degree of similarity between an unknown input and all stored references This text then describes the rationale in the Protos system for relegating inductive learning and deductive problem solving to minor roles in support of retaining indexing and matching exemplars Other chapters consider the power as well as the appropriateness of exemplar based representations and their associated acquisition methods This book discusses as well the extensions to the way a case is classified by a decision tree that address shortcomings The final chapter deals with the advances in machine learning research This book is a valuable resource for psychologists scientists theorists and research workers **Teaching the Holocaust in School**

**History** Lucy Russell, 2006-08-17 If we expose students to a study of human suffering we have a responsibility to guide them through it But is this the role of school history This issue is the rationale behind teaching the Holocaust primarily historical moral or social Is the Holocaust to be taught as a historical event with a view to developing students critical historical skills or

as a tool to combat continuing prejudice and discrimination These profound questions lie at the heart of Lucy Russell's fascinating analysis of teaching the Holocaust in school history She considers how the topic of the Holocaust is currently being taught in schools in the UK and overseas Drawing on interviews with educationalists academics and teachers she discovers that there is in fact a surprising lack of consensus regarding the purpose of and approaches to teaching the Holocaust in history Indeed the majority view is distinctly non historical there is a tendency to teach the Holocaust from a social and moral perspective and not as history This book attempts to explain and debate this phenomenon **Beyond**
