**Disnarration and the Unmentioned in Fact and Fiction** Marina Lambrou, 2016-01-14 In this book Marina Lambrou explores the dimension of narrative storytelling described as the disnarrated events that do not happen but which are referred to across three genres of texts personal narratives news stories and fiction literary and film The book begins by asking why such disnarrated narratives are nevertheless considered tellable It moves on to examine the pervasiveness of this phenomenon in news reports about near misses and the shared personal narratives about dangerous experiences where truth is expected to be central their telling It further discusses how disnarration is generated in counterfactual what if scenarios in fiction where characters follow alternative forked paths with fascinating unexpected consequences This engaging work offers original insights to anyone interested in storytelling and will appeal in particular to scholars of language and literature stylistics narratology media film and journalism

**Science Fact and Science Fiction** Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and

human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

**Possible Worlds Theory and Counterfactual Historical Fiction** Riyukta Raghunath,2020-09-10 This book offers a comprehensive Possible Worlds framework with which to analyse counterfactual historical fiction Counterfactual historical fiction is a literary genre that comprises narratives set in worlds whose histories run contrary to the history of our world usually speculating on what would have happened had a significant historical event such as a war turned out differently The author develops a systematic critical approach based on a customised model of Possible Worlds Theory supplemented by cognitive concepts that account for the different processes that readers go through when they read counterfactual historical fiction a genre which relies heavily on pre existing knowledge about history and culture This book will be of interest to anyone working with Possible Worlds including within the fields of philosophy literary studies stylistics cognitive poetics and narratology Truth and Fake in the Post-Factual Digital Age Peter Klimczak,Thomas Zoglauer,2023-05-24 The increase in fake news the growing influence on elections increasing false reports and targeted disinformation campaigns are not least a consequence of advancing digitalisation Information technology is needed to put a stop to these undesirable developments With intelligent algorithms and refined data analysis fakes must be detected more quickly in the future and their spread prevented However in order to meaningfully recognize and filter fakes by means of artificial intelligence it must be possible to distinguish fakes from facts facts from fictions and fictions from fakes This book therefore also asks questions about the distinctions of fake factual and fictional The underlying theories of truth are discussed and practical technical ways of differentiating truth from falsity are outlined By considering the fictional as well as the assumption that information technical further development can profit from humanities knowledge the authors hope that content related technical and methodological challenges of the present and future can be overcome *The Multiverse as Theory in Postmodern Speculative Fictional Narratives* Angélica Cabrera Torrecilla,Francisco Sáez de Adana,2024-11-15 The Multiverse as Theory in Postmodern Speculative Fictional Narratives considers the concept of the multiverse beyond the immediacy of being merely an excuse or scenario for the development of stories instead positioning the multiverse as a theoretical method in

which speculative fiction narratives can explore diverse issues to bridge ideas across cultural social and philosophical analysis Taking a cross cultural approach the book centres around the critical engagements that literary and media texts have with the representations of the multiverse beyond considering this subject as a mere rhetorical flourish or a passing fad A diverse and international team of authors engage with the multiverse from the point of view of other worlds understanding it not as the appearance of another independent world but as the collision of two or more different worlds into one of them From this key finding the multiverse encourages us to pay attention to the influence that fiction exerts on narratives and world building providing possible frameworks to rethink critical aspects of temporality space self society and culture in contemporary times This pioneering work will interest students and scholars working in the areas of media and cultural studies comparative literature popular culture studies speculative fiction and transmedia studies [Fantasy and the Real World in British Children's Literature](#) Caroline Webb,2014-09-15 This study examines the children s books of three extraordinary British writers J K Rowling Diana Wynne Jones and Terry Pratchett and investigates their sophisticated use of narrative strategies not only to engage children in reading but to educate them into becoming mature readers and indeed individuals The book demonstrates how in quite different ways these writers establish reader expectations by drawing on conventions in existing genres only to subvert those expectations Their strategies lead young readers to evaluate for themselves both the power of story to shape our understanding of the world and to develop a sense of identity and agency Rowling Jones and Pratchett provide their readers with fantasies that are pleasurable and imaginative but far from encouraging escape from reality they convey important lessons about the complexities and challenges of the real world and how these may be faced and solved All three writers deploy the tropes and imaginative possibilities of fantasy to disturb challenge and enlarge the world of their readers **Historical Dictionary of Science Fiction Literature** Brian Stableford,2004-04-19 This reference tracks the development of speculative fiction influenced by the advancement of science and the idea of progress from the eighteenth century to the present day The major authors and publications of the genre and significant subgenres are covered Additionally there are entries on fields of science and technology which have been particularly prolific in provoking such speculation The list of acronyms and abbreviations the chronology covering the literature from the 1700s through the present the introductory essay and the dictionary entries provide science fiction novices and enthusiasts as well as serious writers and critics with a wonderful foundation for understanding the realm of science fiction literature The extensive bibliography that includes books journals fanzines and websites demonstrates that science fiction literature commands a massive following [Virtual Worlds - Real Decisions?](#) Ariane Walz,2008 With landscapes there is no room for experimentation Real changes to the landscape become an indelible part of it mostly for decades or even centuries That is why level headed and foresighted planning is required before final decisions are made Computer based models allow the testing and visualization of development options and decision alternatives For this reason

virtual representation of landscape processes is gaining increasing importance in planning The Thematic Synthesis Report V of the National Research Programme 48 Landscapes and Habitats of the Alps shows the potential of computer based models and visualizations for spatial and landscape planning and examines the current state of research The models developed within NRP 48 deal with the most important issues in spatial and landscape planning in the Alps mechanisms and landscape changes through changing agricultural use patterns tourism and intensive settlement development and changes in the natural hazards potential due to global warming Synthesis Report V throws light on chances and obstacles of models and visualizations in planning practice and demonstrates how the formulation of use cases facilitates the development and improvement of computer based models and the corresponding software for the world of practice

**Contemporary Materialism** Paul K. Moser, J. D. Trout, 2002-11-01 Contemporary Materialism brings together the best recent work on materialism from many of our leading contemporary philosophers This is the first comprehensive reader on the subject The majority of philosophers and scientists today hold the view that all phenomena are physical as a result materialism or physicalism is now the dominant ontology in a wide range of fields Surprisingly no single book until now has collected the key investigations into materialism to reflect the impact it has had on current thinking in metaphysics philosophy of mind and the theory of value The classic papers in this collection chart contemporary problems positions and themes in materialism At the invitation of the editors many of the papers have been specially up dated for this collection follow on pieces written by the contributors enable them to appraise the original paper and assess developments since the work was first published The book s selections are largely non technical and accessible to advanced undergraduates The editors have provided a useful general introduction outlining and contextualising this central system of thought as well as a topical bibliography Contemporary Materialism will be vital reading for anyone concerned to discover the ideas underlying contemporary philosophy David Armstrong University of Sydney Jerry Fodor Rutgers University New Jersey Tim Crane University College London D H Mellor University of Cambridge J J C

**Philosophical Papers: Volume 3, Realism and Reason** Hilary Putnam, 1983-04-29 This is the third volume of Hilary Putnam s philosophical papers published in paperback for the first time The volume contains his major essays from 1975 to 1982 which reveal a large shift in emphasis in the realist position developed in his earlier work While not renouncing those views Professor Putnam has continued to explore their epistemological consequences and conceptual history He now crucially sees theories of truth and of meaning that derive from a firm notion of reference as inadequate

*Bridges to Science Fiction* George Edgar Slusser, 1980 Ten new critical essays written for presentation at the first Eaton Conference on Science Fiction and Fantasy Literature held 24-25 February 1979 at the University of California Riverside While critical discussion of science fiction has

become increasingly sophisticated during the past decade there remains a tendency among some teachers and readers to consider science fiction as an independent phenomenon that exists unconnected to the mainstream of our cultural inheritance These essays by Harry Levin Irving Babbitt Professor of Comparative Literature at Harvard University Kent T Kraft Assistant Professor of Comparative Literature at the University of Georgia Athens Stephen Potts writer and instructor at San Diego State University Gregory Benford writer and Associate Professor of Physics at the University of California Irvine Robert Hunt an editor at Glencoe Publishing Eric S Rabkin Professor of English at the University of Michigan Patrick Parrinder instructor at the University of Reading England Thomas Keeling Lecturer in English at the University of California Los Angeles Carl D Malmgren instructor at the University of Oregon Eugene and Thomas Hanzo Professor of English and Chairman of the department at the University of California Davis suggest the connections that exist between science fiction and other aspects of Western cultural tradition Ranging in interest from the specifically philosophical to the specifically literary the essays relate science fiction to such topics as medieval cosmological discourse classical empirical philosophy fairy tale epic and Gothic fiction Emerging from the volume as a whole are both a coherent view of science fiction as a genre and a heightened sense of its complex relation to our cultural heritage

**World Building** Marta Boni, 2025-10-01 Thanks to modern technology we are now living in an age of multiplatform fictional worlds as television film the Internet graphic novels toys and more facilitate the creation of diverse yet compact imaginary universes which are often recognisable as brands and exhibit well defined identities This volume situated at the cutting edge of media theory explores this phenomenon from both theoretical and practical perspectives uncovering how the construction of these worlds influences our own determination of values and meaning in contemporary society

*Dreams and Vampires* Dee Krull, 2011-09-07 As a Clinical Hypnotherapist Laruel knows her business However when her clients are being taken one by one by a vampire calling himself Naken she fears that somehow the hypnotherapy is also responsible Raithe Laurel s best friend and sometimes assistant fears for her own life as well as Laurel s and her clients The two of them race against time to try and figure out why her clients are being taken and how to stop Naken from taking anyone else Ben and Kianas are the two loves in Laurel s life and the choices she makes are tantamount to what the future holds for her and the people she loves Ben a love from her past has just come back into her life Kianas is a new love who promises a future that she could never have imagined on another world called Htrae Htrae is a world from another universe A world filled with beauty beyond belief and danger that threatens Laurel s life and her ability to hold on to her past If she allows Kianas to turn her she may never be a part of her son s life However if she stays human she could die

Rushdie's novels in the light of recent critical developments. It also features new chapters which examine the author's latest works including *Fury* (2001), *Shalimar the Clown* (2005) and *The Enchantress of Florence* (2008), bringing coverage of this important British author up to the present.

Essentials of the Theory of Fiction Michael J. Hoffman, Patrick D. Murphy, 2005-07-06. A third edition of this anthology of the most influential and comprehensive writing on the theory of fiction from the 19th century through modernism and postmodernism to the present.

Illusions of Human Thinking Gabriel Vacariu, 2015-10-19. The book illustrates that the traditional philosophical concept of the Universe the World has led to anomalies and paradoxes in the realm of knowledge. The author replaces this notion by the EDWs perspective i.e. a new axiomatic hyperontological framework of Epistemologically Different Worlds (EDWs). Thus it becomes possible to find a more appropriate approach to different branches of science such as cognitive neuroscience, physics, biology and the philosophy of mind. The consequences are a better understanding of the mind-body problem, quantum physics, non-locality or entanglement, the measurement problem, Einstein's theory of relativity and the binding problem in cognitive neuroscience.

Universe Facts Eleanor Hawking, AI, 2025-02-17. *Universe Facts* explores the vastness of space, diving into cosmology, astrophysics and the search for extraterrestrial life. It tackles the Big Bang theory, galactic formation and stellar evolution, highlighting how elements essential for life are forged within stars. The book emphasizes understanding our place in the cosmos by synthesizing knowledge from physics, astronomy and astrobiology. It investigates exoplanets and analyzes questions such as the Drake equation and the Fermi paradox, all while remaining grounded in empirical evidence from telescopes and space probes. The book progresses from the universe's origins to its potential futures, explaining complex concepts like spacetime and gravity in accessible language. It critically examines the cosmic microwave background and the ongoing debates surrounding dark matter and dark energy. By avoiding speculation and presenting information through a factual lens, *Universe Facts* fosters scientific literacy and empowers readers to evaluate evolving theories about the universe.
