Parental Priorities And Economic Inequality:

Parental Priorities and Economic Inequality Casey B. Mulligan, 1997 Focuses on intergenerational mobility and intergenerational transmission of inequality

Parental Education and Children's Schooling Outcomes Damien de Walque, 2005 Educated parents tend to have educated children But is intergenerational transmission of human capital more nature more nurture or both De Walque uses household survey data from Rwanda that contains a large proportion of children living in households without their biological parents The data allows him to separate genetic from environmental parental influences The nonrandom placement of children is controlled by including the educational attainment of the absent biological parents and the type of relationship that links the children to their adoptive families The results of the analysis suggest that the nurture component of the intergenerational transmission of human capital is important for both parents contrary to recent evidence proposed by Behrman and Rosenzweig 2002 and Plug 2004 The author concludes that mothers education had no environmental impact on children s schooling Interestingly mothers education matters more for girls while fathers education is more important for boys Finally an important policy recommendation in the African context emerges from the analysis the risk for orphans or abandoned children to lose ground in their schooling achievements is minimized if they are placed with relatives

Inequality and Growth: Patterns and Policy Joseph E. Stiglitz, 2016-07-01 It was part of common wisdom that in the early stages of development inequality would rise but it would eventually decline As time passed and growth persisted inequality has however continued to grow casting doubt on the received wisdom

Dynamics of Inequality and Poverty John Creedy, Guyonne Kalb, 2006-07-01 Consists of papers related to the theme of the dynamics of inequality and poverty that are subdivided into four separate parts This volume examines inequality and poverty over time the intergenerational transfer of poverty inequality over time and measurement issues The chapters discuss inequality and poverty in developed countries

Research Handbook on Intergenerational Inequality Elina Kilpi-Jakonen, Jo Blanden, Jani Erola, Lindsey Macmillan, 2024-05-02 The Research Handbook on Intergenerational Inequality is motivated by a core question in social science to what extent does one s family background and childhood experience predict success in life Bringing together experts in their respective fields from across the globe this innovative Research Handbook provides a comprehensive multidisciplinary account of the rich research on intergenerational inequality focusing on its origins in sociology and economics This title contains one or more Open Access chapters

The Economics of Inequality, Discrimination, Poverty, and Mobility Robert S. Rycroft, 2014-12-18 Thoroughly classroom tested this introductory level text surveys what economists have to say about inequality or income and wealth distribution poverty mobility both intragenerational within careers and intergenerational between generations and discrimination on the basis of race ethnicity age gender and many other factors in the United States This text brings the undergraduate treatment of these issues up to date featuring detailed but not mathematical examination of the economic theory underlying the analysis There is a greater

emphasis on mobility on wealth accumulation distribution and inheritance and on discrimination law than in other texts The author provides full and fair treatment of competing sides in several of the controversial issues in the field written in such a way that instructors can use the text material to motivate a variety of classroom discussions An Instructor s Manual featuring solutions to the end of chapter questions is available online to adoptors [The Chicago School](#) Johan Van Overtveldt,2009-03-01 This admirably detailed and thoroughly welcome history provides a fascinating examination of a pivotal moment in the evolution of economic theory The Economist When Richard Nixon said We are all Keynesians now in 1971 few could have predicted that the next three decades would result in a complete transformation of the global economic landscape The transformation was led by a small relatively obscure group within the University of Chicago s business school and its departments of economics and political science These thinkers including Milton Friedman Gary Becker George Stigler Robert Lucas and others revolutionized economic orthodoxy in the second half of the 20th century dominated the Nobel Prizes awarded in economics and changed how business is done around the world Written by a leading European economic thinker The Chicago School is the first in depth look at how this remarkable group came together Exhaustively detailed it provides a close recounting of the decade by decade progress of the Chicago School s evolution As such it s an essential contribution to the intellectual history of our time **The Economics of Inequality, Poverty, and Discrimination in the 21st Century** Robert S. Rycroft,2013-03-07 Leading scholars examine the conflicting paradigms of affluence and destitution in the United States as well as other free societies and discuss the influence of education race and status on economic mobility While recent catastrophic events in New Orleans and Haiti may have magnified issues of social inequity leaders have debated over poverty and discrimination for decades Are the poor disadvantaged by the institutions of society or by the choices they make Through two insightful volumes the author examines differing academic and political perspectives to help shed light on the causes of poverty and inequality the role that gender race age or sexual preference plays in determining opportunity and the effectiveness of current social and economic policies in balancing the inequity among disparate groups The Economics of Inequality Poverty and Discrimination in the 21st Century consists of 2 volumes containing 32 papers divided into 5 categories measurement inequality and mobility institutions and choices demographic groups and discrimination and policy The papers written by economists sociologists philosophers and lawyers deal with the extent of inequality in the United States and how it compares to other countries and the newly emerging evidence on the relationship between inequality and mobility within a society [The Economics of Inequality, Discrimination, Poverty, and Mobility](#) Robert Rycroft,2009-07 Thoroughly classroom tested this introductory level text surveys what economists have to say about inequality or income and wealth distribution poverty mobility both intragenerational within careers and intergenerational between generations and discrimination on the basis of race ethnicity age gender and many other factors in the United States This text brings the undergraduate treatment of these issues up to date featuring detailed but not mathematical

Inequality and Economic Integration Francesco Farina,Ernesto Savaglio,2004-08-02 Internationally globalization and increased economic integration has impacted quality of life and individual well being Attempts to evaluate the impact on income dispersion from this process have been extremely controversial This key volume is the first real attempt to build up indices and a theoretical framework in order to deal with inequality of opportunity and to enable social and political institutions to monitor increasing disparities in well being and social exclusion It thoroughly examines the possible relationships between the recent acceleration in economic integration and inequality among persons and countries and will enable social and political institutions to monitor increasing disparities in well being and social exclusion The contributions to this volume cover various subfields of economics and examine both the negative and positive spillover effects of economic integration on individuals social groups and nations Since the impact of globalization on the most deprived people is multidimensional in nature the theoretical framework is extended to a multivariate context where several individual characteristics are simultaneously considered This original volume covers many important topics and features an impressive array of respected contributors As such it is sure to be an invaluable resource for postgraduates and professionals in the fields of political economy and economics

Inequality, Taxation, and Intergenerational Transmission John A. Bishop,Juan Gabriel Rodríguez,2018-12-14 Research on Economic Inequality volume 26 primarily contains papers presented at the 8th Society for the Study of Economic Inequality ECINEQ meeting The papers cover such topics as the effect of inheritance taxation on the pre distribution of income and tax progressivity under alternative inequality definitions

The American Middle Class Robert S. Rycroft,2017-05-12 What is the American

Dream This book s author argues that contrary to what many believe it is not achieving the wealth necessary to enter the top one percent but rather becoming members of the great middle class by dint of hard work and self discipline Americans of all classes consider themselves to be middle class There are Americans who by any objective standard should be considered poor who would insist they are middle class just as other Americans who should be considered wealthy also insist they are middle class Thinking of yourself and being thought of by others as middle class is the American Dream for tens of millions of people But an enduring problem of the American middle class is the worry that the Dream is coming apart that forces are lurking in the shadows waiting to steal their progress and throw them back into poverty This thought provoking reference explores a disparate multitude of issues associated with being middle class in America It addresses a range of questions and subtopics including the meaning of the term middle class how middle class status is expressed by both the majority and the

various minorities that make up the American mosaic what economic pressures are bearing down on the middle class and how economists and others attempt to make sense of the economic issues of the day Readers will also better understand how political institutions and public policies are shaping the way the middle class views the world how labor housing education and crime related issues have influenced the development and growth of the middle class the norms of the middle class versus those of other classes in society and the role of culture and media in shaping how members of the middle class view themselves and how they are viewed by others This two volume set provides a comprehensive look at the American middle class that supports student research in economics social studies cultural studies and political history The content supports teachers in their development of lesson plans and assignments that directly align with the Common Core State Standards and the recommendations of the National Curriculum Standards for Social Studies NCSS with respect to all ten NCSS themes

Growing Income Inequalities J. Hellier,N. Chusseau,2012-11-13 This book explores the widening gap between the wage packets of skilled and unskilled workers that has become a pressing issue for all states in the globalized world economy Comparing the experiences of more and less developed economies chapters analyse the underlying causes and key social changes that accompany income inequality Modern Developments in Behavioral Economics John Malcolm Dowling,Chin-Fang Yap,2007 This book examines the field of behavioral economics and provides insights into the following questions Does utility bring happiness How do emotions and personal perspectives color our economic decisions How do altruism trust fairness and justice come into play in game theory Why are some organizations so successful in implementing their objectives Can advances in neuroeconomics unlock the secrets of how decisions are made The book looks at decision making and behavior from the point of view of i individual behavior and choice ii group and interactive choice and iii collective choices and decision making In particular it covers the following aspects instances when bounded rationality leads to decisions inconsistent with standard economic assumptions risk and the processes by which investors and consumers make decisions altruistic and cooperative behavior as alternatives to competition game theory as a way to explore motives of cooperation versus competition the determinants of happiness and the relationship between utility and well being the concept of social capital including motivations for charity and being a responsible citizen how trust and fairness relate to economic actions and the motivation to cooperate rather than compete behavior such as crime corruption and bribery from ethical social and economic viewpoints and finally the decision making process of collective choice and how societies develop rules for governing themselves This is the first book to bridge economics psychology sociology and political sciences and explain the nuanced subtleties of decision making **Fall 2001** Andres Velasco,2010-12 This semiannual journal from the Latin American and Caribbean Economic Association LACEA provides a forum for influential economists and policymakers from the region to share high quality research directly applied to policy issues within and among those countries Contents include Intergenerational Mobility in Latin America by Jere R Behrman ALejandro Gaviria and Migue Szekeley Conditional

Cash Transfers and Their Impact on Child Work and Schooling Evidence from the PROGRESA Program in Mexico by Emmanuel Skoufias and Susan W Parker Public Sector Wages and Bureaucratic Quality Evidence from Latin America by Ugo Panizza Integration Interdependence and Regional Goods An Application to Merocsur by Afonso Bevilaqua Marcelo Catena and Ernesto Talvi The Role of American Depositary Receipts in the Development of Emerging Markets by Alberto Moel

Schools and the Equal Opportunity Problem Ludger Woessmann, Paul E. Peterson, 2007 Leading researchers from the United States and Europe report on new findings on the effect of education on equal opportunity using economic and statistical techniques to assess the results of education policy reform in countries including the United States Britain Sweden Germany and Italy Much educational research today is focused on assessing reforms that are intended to create equal opportunity for all students Many current policies aim at concentrating extra resources on the disadvantaged The state of the art research in Schools and the Equal Opportunity Problem suggests however that even sizeable differential spending on the disadvantaged will not yield an equality of results In this CESifo volume leading scholars from the United States and Europe use the tools of economics to assess the outcome of efforts to solve education's equal opportunity problem in a range of countries including the United States Britain Germany Sweden and Italy The evidence shows some routes for advancement testing with high performance standards for example and well designed school choice but also raises considerable doubts about whether many current school policies are effective in dramatically altering the opportunity structure The evidence presented also calls into question the idea that causal peer effects are very strong The contributors examine such topics as the link between education and parental income the problematic past research on peer effects tracking the distribution of educational outcomes human capital policy aimed at disadvantaged students and private public school choice The research suggests that achieving universal primary and secondary education is both urgently needed and feasible Will the international community commit the necessary economic human and political resources The challenge say the editors is as inspiring and formidable as any extraterrestrial adventures and far more likely to enrich and improve life on earth

Marriage and the Economy Shoshana Grossbard-Shechtman, 2003-04-28 Marriage and the Economy explores how marriage influences the monetized economy as well as the household economy Marriage institutions are to the household economy what business institutions are to the monetized economy and marital status is clearly related to the household economy Marriage also influences the economy as conventionally measured via its impact on labor supply workers productivity savings consumption and government programs such as welfare programs and social security The macro economic analyses presented here are based on the micro economic foundations of cost benefit analysis game theory and market analysis Micro economic analysis of marriage divorce and behavior within marriages are investigated by a number of specialists in various areas of economics Western values and laws have been very successful at transforming the way the world does business but its success at maintaining individual commitments to family values is less impressive **Getting**

Rich Lisa A. Keister, 2005-05-30 Although basic facts about wealth inequality are no longer a mystery we still know very little about who the wealthy are how they got there and what prevents other people from becoming rich That is we know very little about the process of wealth mobility This book explores wealth by investigating some of the most basic questions about wealth mobility How much mobility is there Has the nature of mobility changed over time Is entrepreneurship important How much does inheritance matter What other factors encourage or prevent wealth mobility and how do these change over the course of a person's life

Generational Income Mobility in North America and Europe Miles Corak, 2004-11-25

Labour markets in North America and Europe have changed tremendously in the face of increased globalisation and technical progress raising important challenges for policy makers concerned with equality of opportunity This book examines the influence of both changes in income inequality and of social policies on the degree to which economic advantage is passed on between parents and children in the rich countries Standard theoretical models of generational dynamics are extended to examine generational income and earnings mobility over time and across space Over twenty contributors from North America and Europe offer comparable estimates of the degree of mobility changes in mobility and the impact of government policy In so doing they strengthen the analytical tool kit used in the study of generational mobility and offer insights for research and directions in dealing with equality of opportunity and child poverty

The Economics of Education

Daniele Checchi, 2006-03-23 In an important contribution to educational policy Daniele Checchi offers an economic perspective on the demand and supply of education He explores the reasons why beyond a certain point investment in education has not resulted in reductions in social inequalities Starting with the seminal work of Gary Becker Checchi provides an extensive survey of the literature on human capital and social capital formation He draws on individual data on intergenerational transmission of income and education for the USA Germany and Italy as well as aggregate data on income and educational inequality for a much wider range of countries Checchi explores whether resources spent in education are effective in raising students achievement as well as analysing alternative ways of financing education The Economics of Education thus provides the analytical tools necessary to understand the complex relationships between current income inequality access to education and future inequality
