The Participatory Democracy Turn Laurence Bherer, Pascale Dufour, Francoise Montambeault, 2018-12-07 Since the 1960s participatory discourses and techniques have been at the core of decision making processes in a variety of sectors around the world a phenomenon often referred to as the participatory turn Over the years this participatory turn has given birth to a large array of heterogeneous participatory practices developed by a wide variety of organizations and groups as well as by governments Among the best known practices of citizen participation are participatory budgeting citizen councils public consultations etc However these experiences are sometimes far from the original 1960s radical conception of participatory democracy which had a transformative dimension and aimed to overcome

unequal relationships between the state and society and emancipate and empower citizens in their daily lives This book addresses four sets of questions what do participatory practices mean today what does it mean to participate for participants from the perspective of citizenship building how the processes created by the participatory turn have affected the way political representation functions and does the participatory turn also mean changing relationships and dynamics among civil servants political representatives and citizens Overall the contributions in this book illustrate and grasp the complexity of the so called participatory turn It shows that the participatory turn now includes several participatory democracy projects which have different effects on the overall system depending on the principles that they advocate This book was originally published as a special issue of the Journal of Civil Society

Participatory Democratic Innovations in Southeast Europe Irena Fiket, Čedomir Markov, Vujo Ilić, Gazela Pudar Draško, 2024-04-08 This volume strengthens the dialogue between conceptual perspectives approaches and fields on deliberative and participatory forms of democratic innovation and offers novel insights focusing on the Southeast European space Traditional forms of participation seem insufficient in satisfying the growing complexity of the democratic processes especially in the context of autocratizing societies It is crucial to examine the possibilities of democratic innovation in political research and practice trying to establish a connection between the possibilities and limits of representative democracy and social movements as possible carriers of the process of democratic innovation This book offers novel insights into practices of civil society and social movements and their pathways carved to initiate a deep change in political thinking and practice and compelling insights for scholars and students of Southeast Europe social movements and democracy

Challenging Citizens: Democratic Innovations at the Local Level Pavel Šaradín, Hana Hurtíková, Michal Soukop, Markéta Zapletalová, Agnieszka Zogata-Kusz, Ewa Ganowicz, 2023-12-11 The book aims to complement the existing research on democratic innovations mainly by making unique comparative analyses of the democratic innovations at the local level in selected European post communist countries i e the Czech Republic Poland and Slovakia Democratic innovations can help overcome political apathy decreased confidence in democracy and improve efficiency of governance We traditionally consider cities and municipalities to be cradles of democracy and connect them with deliberations on the further development of democratic theory and political practice We therefore argue that the local level is a suitable arena and laboratory for both changes of institutional settings within the traditional model of representative democracy and the structural changes which concern changing relations between local representatives and citizens

Lopez-Rabatel, Yves Sintomer, 2020-02-10 After two centuries during which it had nearly disappeared in Western countries sortition is used again as a method of selecting people who could speak for and in certain cases decide for all the citizenry What is the meaning of this comeback To answer this question this book offers a historical analysis It brings together a number of the best specialists on political sortition from antiquity to contemporary experiments in Europe but also in the Ancient Middle East and in imperial China With a transdisciplinary perspective this volume demonstrates that sortition has been a crucial device in political history that the instruments and places where sortition was practised matter for the understanding of the social and political logics at stake and that these logics have been quite different random selection being sometimes an instrument of radical democracy and in other contexts a tool for solving conflicts among elites Will sortition in politics helps to democratize democracy in the twenty first century **Federalism and the Law of Diversity**

Lauria, Carissa Schively Slotterback, 2020-10-12 Sherry Arnstein writing in 1969 about citizen involvement in planning processes in the United States described a ladder of citizen participation that showed participation ranging from low to high Arnstein depicted the failings of typical participation processes at the time and characterized aspirations toward engagement that have now been elevated to core values in planning practice But since that time the political economic and social context has evolved greatly and planners organizers and residents have been involved in planning and community development practice in ways previously unforeseen Learning from Arnstein's Ladder draws on contemporary theory expertise empirical analysis and practical applications in what is now more commonly termed public engagement in planning to examine the enduring impacts of Arnstein's work and the pervasive challenges that planners face in advancing meaningful public engagement This book presents research from throughout the world including Australia Brazil India Indonesia Portugal

Serbia and the United States among others that utilizes critiques revises and expands upon Arnstein's aspirational vision. It is essential reading for educators and students of planning.

Citizenship and Democratic Innovations in Europe Ireneusz Paweł Karolewski, Carsten Herzberg, 2025-10-16. This book brings together scholarship and debates on citizenship and democratic innovation and examines how democratic innovations might change or even consolidate the existing contours of citizenship. Arguing that the nexus between research on citizenship and democratic innovations can be found in the praxis approach to citizenship where citizenship can be framed as a realm of actions and practices, the book shifts the discussion from the institutional level into a more conceptual realm of analysis. Taking stock of the democratic innovations at the local level, the national level and the EU level such as citizen assemblies, referendums and participatory budgeting, the book further surveys and maps their contribution to the democratic quality of citizenship across various European countries. This book is of key interest to scholars and students of democratic innovations, citizenship studies, democratization, governance and more generally public policy and European Politics and Studies.

Altogether, chapters illuminate how rich and provocative the current debate on the interpretation of how public policies travel is and the vibrancy of the area's research within the broad planet of public policy analysis.

The Legitimacy of Citizen-led Deliberative Democracy Didier Caluwaerts, Min Reuchamps, 2018-06-12. For deliberative democrats, the strength of any democracy is public deliberation, the frequent and reasoned discussion between citizens on political issues. Despite all the theoretical claims made about deliberative systems, the question remains how to empirically assess both the legitimacy and function of deliberative systems in the real world and how individual sites of deliberation interact within the larger political system. In other words, what is the legitimacy of each individual component and under which conditions can these components improve the legitimacy of the wider system? These are the central research questions for this book, looking particularly through the prism of the citizen-led mini-public G1000 in Belgium, which grew out of a feeling of deep democratic crisis. Offering empirically measurable translations of philosophical concepts, the book enhances our understanding of how political systems function and of the viability of a deliberative democracy at a larger scale. Finally, it provokes fundamental normative questions on how we want to shape our society, especially divided ones. This text will be of key interest to scholars, students and practitioners of deliberative democracy and to those interested in democratic theory and more broadly political science, communication, sociology and philosophy.

Popular Democracy Gianpaolo Baiocchi, Ernesto Ganuza, 2016-12-07 Local participation is the new democratic imperative In the United States three fourths of all cities have developed opportunities for citizen involvement in strategic planning The World Bank has invested 85 billion over the last decade to support community participation worldwide But even as these opportunities have become more popular many contend that they have also become less connected to actual centers of power and the jurisdictions where issues relevant to communities are decided With this book Gianpaolo Baiocchi and Ernesto Ganuza consider the opportunities and challenges of democratic participation Examining how one mechanism of participation has traveled the world with its inception in Porto Alegre Brazil and spread to Europe and North America they show how participatory instruments have become more focused on the formation of public opinion and are far less attentive

to or able to influence actual reform Though the current impact and benefit of participatory forms of government is far more ambiguous than its advocates would suggest Popular Democracy concludes with suggestions of how participation could better achieve its political ideals *De Gruyter Handbook of Citizens' Assemblies* Min Reuchamps,Julien Vrydagh,Yanina Welp,2023-05-31 Citizens Assemblies CAs are flourishing around the world Quite often composed of randomly selected citizens CAs arguably come as a possible answer to contemporary democratic challenges Democracies worldwide are indeed confronted with a series of disruptive phenomena such as a widespread perception of distrust and growing polarization as well as low performance Many actors seek to reinvigorate democracy with citizen participation and deliberation CAs are expected to have the potential to meet this twofold objective But despite deliberative and inclusive qualities of CAs many questions remain open The increasing popularity of CAs call for a holistic reflection and evaluation on their origins current uses and future directions The De Gruyter Handbook of Citizens Assemblies showcases the state of the art around the study of CAs and opens novel perspectives informed by multidisciplinary research and renewed thinking about deliberative participatory processes It discusses the latest theoretical empirical and methodological scientific developments on CAs and offers a unique resource for scholars decision makers practitioners and curious citizens to better understand the qualities purposes promises but also pitfalls of CAs **Close Ties in European Local Governance** Filipe Teles,Adam Gendźwiłł,Cristina Stănuș,Hubert Heinelt,2020-09-01 This book develops and tests a typology of local state society relations To deliver such a comparative study on institutionalized relations between local government and societal actors at the municipal level in Europe the book identifies and classifies country specific patterns of these institutionalized governance networks This work explores the diversity within these institutionalized networks approaching it from a strong comparative perspective that is anchored on a new typology allowing a more robust analysis of the identifiable patterns It is a study with appeal to scholars and students of local government public administration and political science as well as to those pursuing this debate and implementing similar agendas as practitioners
