Historical Perspectives in the Conservation of Works of Art on Paper Margaret Holben Ellis, 2015-02-01 This book is the seventh in the Readings in Conservation series which gathers and publishes texts that have been influential in the development of thinking about the conservation of cultural heritage The present volume provides a selection of more than ninety five texts tracing the development of the conservation of works of art on paper Comprehensive and thorough the book relates how paper conservation has responded to the changing place of prints and drawings in society The readings include a remarkable range of historical selections from texts such as Renaissance printmaker Ugo da Carpi's sixteenth century petition to the Venetian senate on his invention of chiaroscuro Thomas Churchyard's 1588 essay in verse A Sparke of Friendship and Warne Goodwill and Robert Bell's 1773 piece Observations Relative to the Manufacture of Paper and Printed Books in the Province of Pennsylvania These are complemented by influential writings by such figures as A H Munsell Walter Benjamin and Jacques Derrida along with a generous representation of recent scholarship Each reading is introduced by short remarks explaining the rationale for its selection and the principal matters covered and the book is supplemented with a helpful bibliography This volume is an indispensable tool for museum curators conservators and students and teachers of the conservation of works of art on paper

Biodeterioration of Cultural Heritage Hanna Szczepanowska, 2023-04-26 Fungi induced stains on paper are one of the most challenging forms of biodeterioration to study and to prevent this is because they involve living organisms and the ways in which fungi respond to changes in the environment and modifications of paper are unpredictable Yet there is a great desire among those who encounter fungi on documents manuscripts or artwork to remove fungi and clean the paper This experience in most cases is particularly challenging What are the reasons behind this challenge This ground breaking book attempts to answer this question among others by exploring the complex interfacial forces between paper fungi and their pigmented secretions which result in bio stains on paper Black fungi collectively referred to as Dematiaceous fungi were used in this study as a subset of pigment producing fungi species The focus is on two under studied aspects of the fungi infestation of paper an interface of fungal pigments and paper and the impact of light on the production of fungi bio stains The results of analytical testing included in this book elucidate the synergistic interactions between the environment biological clocks of the microorganisms and secretion of fungal pigments to paper The black fungal pigment formation is explored in depth in two scenarios one that is natural when the bio stains of original artworks have occurred over time by chance and another induced by *Aspergillus niger* in bio simulation on known papers in a controlled environment The findings are intended to provide guidance for preservation strategies mitigating the biodeterioration of paper and designing conservation treatment when applicable The surface of artworks and artifacts is of great aesthetic and artistic

importance conversely it plays a significant role in governing fungal attachments In this book the paper surface is characterized in detail and in correlation with chemical and physical alterations caused by fungal pigmentation A broad range of analytical instruments was used for surface characterization such as surface metrology profilometers a confocal laser scanning microscope and environmental scanning electron microscope chemical microanalysis was carried out using X ray energy dispersive spectroscopy The novel three dimensional characterization of pigmented fungal inclusions and their interaction with paper matrix was studied with micro X ray computed micro tomography on the synchrotron ESRF The proposed book is the first to explore the complexity of fungal paper interactions with the intention to assist professionals working with cultural materials especially paper based materials to make informed decisions when dealing with the fungi infestation of paper
