interested in understanding more about the university experience through poetic ethnography War for Profit Charles M. Smith, 2012 WASHINGTON The Army official who managed the Pentagon's largest contract in Iraq says he was ousted from his job when he refused to approve paying more than 1 billion in questionable charges to KBR James Risen New York Times June 17 2008 This book by that very Army official provides an eye opening firsthand account of how the US Government hands over your tax dollars to support contractors like KBR and Halliburton rather than supporting the troops This authoritative and well documented record of the LOGCAP contract in Iraq and Afghanistan is at the same time a study of US participation in Iraq and Afghanistan as well as the workings of government agencies and Congress The first chapter sets the scene briefly narrating the author's work on behalf of US military efforts especially in Iraq Subsequent chapters illustrate specific issues in contractor relations that resulted in unsafe conditions for the troops and blew millions of taxpayer dollars Loyal and hard working government officials and employees who tried to keep things on track were turned away and those who sought to rein in the free for all were sacked The author reveals problems with KBR's provision of transportation electricity food and water Other chapters are more analytic and evaluate Army logistics Congressional oversight and the question of whether letting contracts for this kind of support is appropriate at all the kind of problems that concern military policy leaders defense analysts public policy analysts and scholars in these areas as well as the citizens in whose name this is all done **National Directory of Minority-owned Business Firms** , 2001 **A Fatal Addiction** Thomas Block, 2012 America one of the most religious countries in the world is also the most violent Do God and war define the American spirit as much as apple pie and baseball This unsettling book illustrates how bellicose war like language is used to explain the spiritual quest It explores the violence of God tradition as it exists in all religions including Buddhism and then examines how this dynamic is flipped with political leaders using spiritual and religious language to sell war to the general public Although God and religion have often been used to sell war in the United States this has been especially true since 9 11 After surveying the relationship of war and the spiritual quest in the major world religions this study concludes with an overview of how that dynamic has affected the contemporary American public discourse on war Does this intermingling of war and spirituality prepare the population for the coming of war The institutional blending of the sacred and human aggression appear to be fundamental to human society The second section of the book concentrates on the political language and speeches of American politicians since 2002 following the run up to the Iraq war and its continuation over the past decade showing how this mystical war conflation permeates American society **A Treatise on Christian Banking** Morten Bosterud, 2022-08-01 From a moral perspective all banking practice and theory can be seen as value driven Therefore there will be no such thing as value neutral banking activities and the application of Christian ethical and pastoral principles adds insights to the field of banking for all its involved stakeholders This book contributes to the specific scientific discourse of practical theology as this typically appears within the subfields of ethics and pastoral studies Christian ethics and pastoral

principles as applied in banking make up a largely neglected area in the wider academic discourse found within practical theology and the research presented in this book contributes new knowledge to the field with particular emphasis on banking practice It is expected that the theories presented herein will be of interest for other scholars not only within the realm of practical theology but also in a cross domain perspective where scholars in a broad field of disciplines may find the research and academic positions of interest Such academic fields would include economics finance business administration sociology history anthropology and perhaps more This expectation may not least be derived from the increasing focus on Corporate Social Responsibility CSR as this has emerged over the last decades within the wider business realm in general whence the world of banking has followed suit Alongside this development an emergence of Islamic banking has been seen which has showed substantial growth and success

You Can Get It Andrew Ross, 2009-04-01 2009 Choice Outstanding Academic Title A survey into an emerging pattern of labor instability and uneven global development Is job insecurity the new norm With fewer and fewer people working in steady long term positions for one employer has the dream of a secure job with full benefits and a decent salary become just that a dream In Nice Work If You Can Get It Andrew Ross surveys the new topography of the global workplace and finds an emerging pattern of labor instability and uneven development on a massive scale Combining detailed case studies with lucid analysis and graphic prose he looks at what the new landscape of contingent employment means for workers across national class and racial lines from the emerging creative class of high wage professionals to the multitudes of temporary migrant or low wage workers Developing the idea of precarious livelihoods to describe this new world of work and life Ross explores what it means in developed nations comparing the creative industry policies of the United States United Kingdom and European Union as well as developing countries by examining the quickfire transformation of China s labor market He also

responds to the challenge of sustainability assessing the promise of green jobs through restorative alliances between labor advocates and environmentalists Ross argues that regardless of one's views on labor rights globalization and quality of life this new precarious and indefinite life and the pitfalls and opportunities that accompany it is likely here to stay and must be addressed in a systematic way A more equitable kind of knowledge society emerges in these pages less skewed toward flexploitation and the speculative beneficiaries of intellectual property and more in tune with ideals and practices that are fair just and renewable
