Martin's History of France: the Age of Louis XIV: 1683-1715 Henri Martin, 1865 The Jesuits in Syria: 1625-1683 Mazin Tadros, 2024-07-26 This book examines cross cultural encounters of the Jesuit missionary enterprise in early modern Southwest Asia It analyzes the early mission to Syria paying attention to the key interlocutors of the Jesuits and the many challenges they experienced in their exchanges with other Europeans Ottoman officials and Eastern Christians It demonstrates that there was nominal Muslim Christian dialogue and important relationships formed between the Jesuits and their Christian and Muslim hosts The Jesuits in Syria shows that the Jesuits worked in a very complex environment where competing factions of Europeans European religious Eastern Christians Arab Muslims Turkish officials and Turkish Muslims not to mention renegades played important roles The book examines missionary correspondence and other complementary sources It also contrasts the way that the Jesuits wrote about their efforts internally with how they addressed the same topics in public documents either printed or manuscript It shows that the Jesuits described Islam and Syria in several ways depending on the nature of the sources For internal audiences they wrote of their challenges with Franciscans French and Venetian consular figures and Ottoman officials For the broader public whether in Jesuit colleges or in print they harped on the problems posed by schismatics and Muslims In this way this volume enriches the story of the early modern Mediterranean The Register of the Privy Council of Scotland: 1683-1684 Scotland. 1683-1694 Royal Society (Great Britain), Charles Hutton, Richard Pearson, 1809 Austria's Wars of Emergence, 1683-1797 Michael Hochedlinger, 2015-12-22 The Habsburg Monarchy has received much historiographical attention since 1945 Yet the military aspects of Austria's emergence as a European great power in the seventeenth and eighteenth centuries have remained obscure This book shows that force of arms and the instruments of the early modern state were just as important as its marriage policy in creating and holding together the Habsburg Monarchy Drawing on an impressive up to date bibliography as well as on original archival research this survey is the first to put Vienna's military back at the centre stage of early modern Austrian history 1661-1683 Henri Martin, 1865 Etienne Fourmont, 1683-1745 Cécile Leung, 2002 Fourmont was the first scholar of the Chinese language in 17th century France This book analyzes his life and The Jesuit Relations and Allied Documents: Lower Canada, Iroquois, Ottawas 1681-1683 Jesuits, 1900 work Dutch and Flemish Newspapers of the Seventeenth Century, 1618-1700 (2 Vols.) Arthur der Weduwen, 2017-11-06 Winner of the 2019 Menno Hertzberger Encouragement Prize for Book History and Bibliography In Dutch and Flemish Newspapers of the Seventeenth Century Arthur der Weduwen presents the first comprehensive account of the early newspaper in the Low Countries Composed of two volumes this survey provides detailed introductions and bibliographical descriptions of 49 newspapers surviving in over 16 000 issues in 84 archives and libraries This work presents a crucial overview of the first fledgling century of newspaper publishing and reading in one of the most advanced political cultures of early modern Europe

Seventy years after Folke Dahl s Dutch Corantos first documented early Dutch newspapers Der Weduwen offers a brand new approach to the bibliography of the early modern periodical press This includes amongst others a description of places of correspondence listed in each surviving newspaper The bibliography is accompanied by an extensive introduction of the Dutch and Flemish press in the seventeenth century What emerges is a picture of a highly competitive and dynamic market for news in which innovative publishers constantly adapt to the changing tastes of customers and pressures from authorities at home and abroad Martin's History of France: 1661-1683 Henri Martin, 1865 *The Life and Times of the Hon.* Algernon Sydney, 1622-1683 Alexander Charles Ewald, 1873 'All manner of ingenuity and industry' Alastair Compston, 2021-08-02 This book celebrates the quatercentenary of the birth of Thomas Willis on 27 January 1621 As a physician in Oxford Willis s work in the 1650s provides an example of rural medical practice in early modern England As a member of the Oxford Philosophical Club that met from the 1640s he was central to the move from classical scholasticism to accounts of anatomy and physiology based on observation and experiment As Sedleian professor of natural philosophy in Oxford the surviving records of his lectures from the 1660s provide an example of pedagogy in medicine at that time And after moving to London in 1667 Willis continued to interact with a community of scientists and physicians who transformed ideas on respiration muscular movement and the nervous system Despite a busy clinical practice Willis found time to write extensively on anatomy and physiology clinical medicine and therapeutics These contributions are recognized as wise original and influential Between 1659 and 1675 Willis published fourteen treatises These appeared in six published works one in two parts written in Latin Four of the titles contain engraved plates depicting the brain muscle lungs and stomach The illustrators were Christopher Wren Richard Lower Edmund King and possibly Willis himself Soon after his death the treatises were published as collected works also in Latin Starting in 1679 his writings were translated into English and published as Dr Willis s practice of physic eventually completed in 1684 The eighteen chapters of this bio bibliography are in four sections chapter 1 is biographical chapters 2 4 describe aspects of the history of the book and illustration relevant to Willis s printed works chapters 5 14 provide bibliographical details of Willis s treatises contained in 102 copies printed in Latin English Dutch and French between 1659 and 1721 and chapters 15 18 summarise the content of Willis s works and their contribution to medical science **The Term Catalogues, 1668-1709 A.D.: 1683-1696** Edward Arber, 1905 Oueen Anne Edward Gregg, 2014-11-01 The reign of Queen Anne the last Stuart monarch was a period of significant progress for the country Britain became a major military power on land the union of England and Scotland created a united kingdom of Great Britain and the economic and political basis for the Golden Age of the eighteenth century was established However the queen herself has received little credit for these achievements and has long been pictured as a weak and ineffectual monarch dominated by her advisers This landmark biography of Queen Anne shatters that image and establishes her as a personality of integrity and invincible stubbornness the central figure of her age Praise for the earlier edition A thoughtful and authoritative study easily
