

# BOW SAFETY

## DRY-FIRE

**Definition:** *Releasing the string of a fully drawn bow without an arrow nocked and attached to the string.*

Never shoot your bow without an arrow on the string. Without the arrow attached to the string to absorb the stored energy of the bow, a dry-fire will occur. "Dry-firing" can damage your bow and could cause personal injury to you or by-standers. If a dry-fire occurs, check carefully for damage on all visible parts. Especially make sure the strings are in the cam grooves and idler wheel grove. In most cases, a dry-fire does not damage the bow, however multiple dry-fire will. Only a small percentage of bows will require repair from a single dry-fire, usually a string or cable, or cable slide replacement is all that is required.

## WARNING

**Damage caused to your Parker Compound bow due to the event of a dry-fire will not be covered under the warranty.**

**Parker will replace or repair and damaged parts at factory cost to our customer as a courtesy.**
