The Garden District of New Orleans Jim Fraiser, 2012-03-01 The Garden District of New Orleans has enthralled residents and visitors alike since it arose in the 1830 s with its stately white columned Greek Revival mansions and double galleried Italianate houses decorated with lacy cast iron Photographer West Freeman evokes the romance of this elegant neighborhood with lovely images of private homes dazzling gardens and public structures Author Jim Fraiser vividly details the historical significance and architectural styles of more than a hundred structures and chronicles both the political and cultural evolution of the neighborhood The Garden District unlike the French Quarter evolved under the auspices of

predominantly Anglo American architects hired by newly arriving and newly wealthy Americans Beyond these wealthy homeowners the Garden District also offers a startlingly diverse and freewheeling history teeming with African American slaves free men and women of color French Italians Germans Jews and Irish all of whom helped fashion it into one of America's first suburbs and most extraordinary neighborhoods Fraiser animates the Garden District's story with such notables as Mark Twain Jefferson Davis occupying Union general Benjamin Butler flamboyant steamboat captain Thomas Leathers crusading Reverend Theodore Clapp Confederate generals Jubal Early and Leonidas Polk jazzmen Joe King Oliver and Nate King Cole champion pugilist John L. Sullivan local authors Grace King George Washington Cable and Anne Rice Mayor Joseph R. E. Rouse architects Henry Howard Lewis Reynolds and Thomas Sully cotton magnate Henry S. Buckner and Louisiana Lottery co-founder John A. Morris In words and photographs Fraiser and Freeman explore the unexpected evolution of this district and reveal how war plagues politics religion cultural conflict and architectural innovation shaped the incomparable Garden District

Greater New Orleans Bridge No. 2, Orleans/Jefferson Parishes, 1978. Public Spaces, Private Gardens Lake Douglas, 2011-05-17. Landscape architect Lake Douglas employs written accounts, archival data, historic photographs, lithographs, maps, and city planning documents many of which have never before been published to explore public and private outdoor spaces in New Orleans and those who shaped them. The result offers the first in-depth examination of the city's landscape history. Douglas presents this beautiful and imposing city as a work of art crafted by numerous influences. His survey from the colonial period to the twentieth century finds that geography, climate, and above all the multicultural character of its residents have made New Orleans unique in American landscape design history. French and Spanish settlers, Africans, and Native Americans, as well as immigrants from Germany, Ireland, Italy, and other parts of the world, all participated in creating this community's unique public and private landscapes. Places such as Congo Square, Audubon Park, the river levees, and neutral grounds, local residents' own term for medians together with ordinary residential gardens, are all testaments to the city's international imprint. Douglas identifies five types of public and private designed landscapes in New Orleans: squares, linear open spaces, urban parks, commercial pleasure gardens, and domestic gardens. Discussing their design, function, and content, he shows how specific examples of each contribute to the city's unique character and also fit within the larger context of American landscape design history. Each type has its own complexion and reflects the influence of those who occupied it. Though New Orleanians lived in strata according to language, cultural identity, economics, and race, they found common ground literally in their community's landscapes. Douglas's sweeping study, illustrated with over 90 color and black and white images, includes an exploration of archival horticultural books, almanacs, and periodicals; information about laborers who actually built landscapes; details of horticultural commerce, services, and marketing materials; and an exhaustive inventory of plants grown in New Orleans for agricultural, medicinal, and ornamental uses. Public Spaces, Private Gardens provides an informative look at two hundred years of the designed landscapes and horticulture of New Orleans and a fresh perspective on one of America's most interesting and historic cities.

Kornwolf, Georgiana Wallis Kornwolf, 2002 Incorporating more than 3 000 illustrations Kornwolf's work conveys the full range of the colonial encounter with the continent's geography from the high forms of architecture through formal landscape design and town planning From these pages emerge the fine arts of environmental design an understanding of the political and economic events that helped to determine settlement in North America an appreciation of the various architectural and landscape forms that the settlers created and an awareness of the diversity of the continent's geography and its peoples Considering the humblest buildings along with the mansions of the wealthy and powerful public buildings forts and churches Kornwolf captures the true dynamism and diversity of colonial communities their rivalries and frictions their outlooks and attitudes as they extended their hold on the land **Driven from New Orleans** John Arena, 2012 In the early 1980s the tenant leaders of the New Orleans St Thomas public housing development and their activist allies were militant uncompromising defenders of the city's public housing communities Yet ten years later these same leaders became actively involved in a planning effort to privatize and downsize their community an effort that would drastically reduce the number of affordable apartments What happened John Arena a longtime community and labor activist in New Orleans explores this drastic change in *Driven from New Orleans* exposing the social disaster visited on the city's black urban poor long before the natural disaster of Katrina magnified their plight Arena argues that the key to understanding New Orleans's public housing transformation from public to private is the co-optation of grassroots activists into a government and foundation funded nonprofit complex He shows how the nonprofit model created new political allegiances and financial benefits for activists moving them into a strategy of insider negotiations that put the profit making agenda of real estate interests above the material needs of black public housing residents In their turn white developers and the city's black political elite embraced this newfound political realism because it legitimized the regressive policies of removing poor people and massively downsizing public housing all in the guise of creating a new racially integrated mixed income community In tracing how this shift occurred *Driven from New Orleans* reveals the true nature and the true cost of reforms promoted by an alliance of a neoliberal government nonprofits community activists and powerful real estate interests **Capital Problem** Arthur S. Marks, 2013-01-01 Explores the history application and accrued meanings of the attic order in America beginning with Benjamin Henry Latrobe who employed the order The author traces the genealogy of the architectural influence as it passes from Latrobe to his disciples to their disciples Latrobe saw a singular exception a unique design feature that besides having a direct and indisputable association with ancient Greece also offered

Americans an architectural order that might be naturalized that might be made their own The work is extremely fine grained and rich in references especially to 18th and 19th century architectural literature 45 b w plates
