Educational Times ,1880 Meeting the Challenges to Measurement in an Era of Accountability Henry
Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators
based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on
test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language
arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher
workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and
subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range
of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It
addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning
objectives In each case issues related to design and development psychometric considerations and validity challenges are
covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and
