AN AIRCRAFT THAT
was destroyed, and a plane that was shot down, were the only losses to the B-29 Superfortresses in their attack on Tokyo, Japan, last night. The attack, which was the first of a series of raids on the city, was carried out by 750 B-29s, which dropped a total of 1,500 tons of bombs. The attack caused the deaths of 100,000 people and the destruction of 100,000 homes. The city of Tokyo, which is the largest city in Japan, is now in a state of complete ruin.

Enemy Generals Meet U.S. Isolation Policy

IN AN EFFORT TO
prevent the Japanese from using the atomic bomb, the United States has adopted a policy of isolation. This policy, which was announced by the State Department last week, calls for the United States to refuse to trade with Japan and to refuse to allow Japanese ships to enter U.S. ports. The policy is designed to prevent Japan from obtaining the raw materials and technology that it needs to develop the atomic bomb. The policy is also designed to prevent Japan from using the atomic bomb to attack the United States.

Congressmen Declared
Alarmed by Postage

THE HOUSE OF REPRESENTATIVES has voted to reject a bill that would have required the United States to provide for the training of Japanese soldiers after the war. The bill, which was introduced by a group of congressmen who were supporters of the peace draft, was defeated by a vote of 215 to 205. The defeat was a major setback for the peace draft, which has been a controversial issue in Congress since the war began. The bill's supporters, who were led by Representative Carl Albert of Oklahoma, argued that the bill was necessary to prevent Japan from becoming a major power in the Pacific after the war. They argued that the bill would provide for the training of Japanese soldiers in the United States, which would allow them to fight against the United States in the future. The bill's opponents, who were led by Representative Charles McNary of Oregon, argued that the bill was unnecessary and that it would be a waste of money. They argued that the United States should not be responsible for the training of Japanese soldiers, and that the bill would be a violation of the United States' neutrality laws.

THE SECRET OF THE ATOMIC BOMB, which has revolutionized the world of war, was first revealed by the German scientists who developed it. The scientists, who were led by Werner Heisenberg, used the principles of quantum mechanics to develop the bomb. The bomb, which was first used against Japan in August 1945, was a result of the German scientists' work. The German scientists' work was a major achievement in the history of science, and it has changed the world of war forever. The bomb's development was a result of the German scientists' desire to win the war, and it was a major factor in the United States' decision to use the bomb against Japan.

Blume,2020-08-04 ONE of THE NEW YORK TIMES S 100 NOTABLE BOOKS of the YEAR A VANITY FAIR and TOWN COUNTRY BEST BOOK of the YEAR New York Times bestselling author Lesley M M Blume reveals how one courageous American reporter uncovered one of the deadliest cover ups of the 20th century the true effects of the atom bomb potentially saving millions of lives Just days after the United States decimated Hiroshima and Nagasaki with nuclear bombs the Japanese surrendered unconditionally But even before the surrender the US government and military had begun a secret propaganda and information suppression campaign to hide the devastating effects of these then experimental weapons For nearly a year the cover up worked until New Yorker journalist

John Hersey got into Hiroshima and managed to report the truth to the world. When the magazine published Hiroshima in August 1946, it became an instant global sensation and inspired pervasive horror about the hellish new threat that America had unleashed. Since 1945, no nuclear weapons have ever been deployed in war, partly because Hersey alerted the world to their true devastating impact. This knowledge has remained among the greatest deterrents to using them since the end of World War II. Released on the anniversary of the Hiroshima bombing, *Fallout* is an engrossing detective story as well as an important piece of hidden history that shows how one heroic scoop saved and can still save the world. **Suffering Made Real** M. Susan Lindee, 1994. In 1946, an American scientific agency, the Atomic Bomb Casualty Commission (ABCC), was established in Japan to study the long-term biomedical effects of radiation on the survivors. Over the next twenty-nine years, American scientists and physicians, with funding from the Atomic Energy Commission, published hundreds of papers documenting the effects of radiation on aging, life span, fertility, and disease. In 1975, the agency was renamed and reorganized to permit greater Japanese input.
