Digital Video Floriano De Rango,2010-02-01 This book tries to address different aspects and issues related to video and multimedia distribution over the heterogeneous environment considering broadband satellite networks and general wireless systems where wireless communications and conditions can pose serious problems to the efficient and reliable delivery of content Specific chapters of the book relate to different research topics covering the architectural aspects of the most famous DVB standard DVB T DVB S S2 DVB H etc the protocol aspects and the transmission techniques making use of MIMO hierarchical modulation and lossy compression In addition research issues related to the application layer and to the content semantic organization and research on the web have also been addressed in order to give a complete view of the problems The network technologies used in the book are mainly broadband wireless and satellite networks The book can be read by intermediate students researchers engineers or people with some knowledge or specialization in network topics **Axmedis**

2008 Jaime Delgado,Paolo Nesi,2008 The present book covers topics both on fluvial and lagoon morphodynamics The first

part is dedicated to tidal environments Topics include an overview of main morphological features and mechanisms of estuaries and tidal channels and a model devoted to investigate flow field pattern and bed topography in tidal meandering channels and a comparison with recent observational evidence of meanders within different tidal environments The general failure of Bagnold hypothesis when applied to equilibrium bedload transport at even relatively modest transverse slope is demonstrated A new model is then proposed based on an empirical entrainment formulation of bed grains

Digital Video Distribution in Broadband, Television, Mobile and Converged Networks Sanjoy Paul, 2011-06-20 A unique treatment of digital video distribution technology in a business context Digital Video Distribution in Broadband Television Mobile and Converged Networks explores a range of diverse topics within the field through a combination of theory and practice to provide the best possible insight and exposure The theoretical foundations inside assist a fuller understanding of the technologies used in practice while real world examples are correspondingly used to emphasize the applicability of theory in the commercial world Fully illustrated throughout to help explain the fundamental concepts of digital media distribution Digital Video Distribution in Broadband Television Mobile and Converged Networks is divided into three major parts starting initially with the basic industry trends that have been driving the adoption of video and making its distribution over the Internet an economically viable solution This is followed with detail descriptions of challenges and solutions in distributing video in open networks such as the Internet The final part focuses on the challenges and solutions for distributing video in closed networks such as the managed network of Telcos Provides an A to Z of digital video distribution featuring technology business research products and case studies Features research topics exploring P2P Streaming Digital Video Distribution over Disruption Tolerant Networks and Scalable Video on Demand Includes real world product descriptions on Transcoders such as Rhonet and IPTV Quality of Service Monitoring product such as Ineoquest

Network Design for IP Convergence Yezid Donoso, 2009-02-23 The emergence of quality of service QoS mechanisms continues to propel the development of real time multimedia services such as VoIP and videoconferencing However many challenges remain in achieving optimized standardization convergence Network Design for IP Convergence is a comprehensive global guide to recent advances in IP network implementation Providing an introduction to basic LAN WAN MAN network design the author covers the latest equipment and architecture addressing QoS policies and integration of services among other topics The book explains how to integrate the different layers of reference models and various technological platforms to mirror the harmonization that occurs in the real world of carrier networks It furnishes appropriate designs for traditional and critical services in the LAN and carrier networks both MAN and WAN and it clarifies how a specific layer or technology can cause those services to malfunction This book lays a foundation for understanding with concepts and applicability of QoS parameters under the multilayer scheme and a solid explanation of service infrastructure It goes on to describe integration in both real time and not real time elaborating on how both processes can co exist within the same IP network and concluding with the designs

and configurations of service connections Learn How to Overcome Obstacles to Improve Technology This sweeping analysis of the implementation of IP convergence and QoS mechanisms helps designers and operators get past key obstacles such as integrating platform layers and technologies and implementing various associated QoS concepts to improve technology and standards

Advances in Next Generation Services and Service Architectures Anand R. Prasad, John F. Buford, Vijay K.  Slezak, Thanos Vasilakos, MingChu Li, Kouichi Sakurai, 2009-12-01 As future generation information technology FGIT becomes
 specialized and fr mented it is easy to lose sight that many topics in FGIT have common threads and because of this advances
 in one discipline may be transmitted to others Presentation of recent results obtained in different disciplines encourages this
 interchange for the advancement of FGIT as a whole Of particular interest are hybrid solutions that c bine ideas taken from
 multiple disciplines in order to achieve something more signi cant than the sum of the individual parts Through such hybrid
 philosophy a new principle can be discovered which has the propensity to propagate throughout mul faceted disciplines FGIT
 2009 was the first mega conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple
 events related to particular disciplines of IT conducted by separate scientific committees but coordinated in order to expose
 the most important contributions It included the following international conferences Advanced Software Engineering and Its
