Standards & Objectives

Addressed in Sound Energy

Overarching Question: How does sound energy travel?

Standard Addressed:
4-PS3-2 Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.

Objectives:

Station 1
To make observations and provide evidence that a sound is a wave.

Station 2
To make observations and provide evidence that sound travels in all directions.
To understand that sound waves travel occur through compression and rarefaction.

Station 3
To make observations and find evidence that increasing force/energy increases the amplitude.

Station 4
To make observations and find evidence that when sound waves enter a new medium, the waves are longer, and the sound produced has a lower frequency.

Station 5
To make observations and find evidence that dense materials conduct sound better than less dense materials and that sound bounces off flat surfaces better than bumpy and/or rough surfaces.

Station 6
To make observations and find evidence that sound travels best through solids, then through liquids, and worst through gases.
