Experiential Therapies for Eating Disorders Lynne M. Hornyak, Ellen K. Baker, 1989-03-24 It should not surprise us that so many are finding unique value in the experiential techniques The fact that eating disordered patients adopt physical and often complex metaphoric means of expressing their emotional pain suggests the difficulty we are likely to encounter in asking them to articulate the inarticulable In moving to spatial kinesthetic and symbolic expression we are in a sense agreeing to speak the patient's language rather than our own Given the very nature of eating disorders many clinicians are finding that experiential methods are particularly applicable for treating patients who suffer from them Providing a valuable new tool for practitioners EXPERIENTIAL THERAPIES FOR EATING DISORDERS is the first text to focus solely on the application of expressive therapies and experiential techniques to the treatment of anorexia nervosa and bulimia Each chapter of this innovative work systematically reviews a single experiential treatment approach Among these are guided imagery hypnosis structured eating family sculpting psychodrama and gestalt therapy dance movement therapy art therapy music therapy and metaphor poetry therapy Throughout important clinical issues that often accompany eating disorders also are addressed including such topics as self awareness self esteem autonomy identity impulse regulation affect modulation body image and interpersonal relationships Countertransferential issues are examined and areas needing further exploration

such as father's role in the development of eating disorders the hypnotizability of eating disordered patients and the role of family in the treatment process are delineated The contributing authors experienced practitioners from a variety of disciplines systematically establish the theoretical framework of each treatment approach fully describe specific techniques and then consider their practical applications in both inpatient and outpatient settings providing numerous case examples for illustration They also offer helpful recommendations for incorporating these techniques into ongoing treatment plans

EXPERIENTIAL THERAPIES FOR EATING DISORDERS a valuable clinical resource for psychologists psychiatrists and all mental health professionals called on to treat patients suffering from anorexia and bulimia nervosa This innovative work illustrates the use of guided imagery hypnosis structured eating family sculpting psychodrama and gestalt therapy and dance movement art music and metaphor poetry therapy in the treatment of anorexia and bulimia nervosa Systematically presented are the theoretical framework of each treatment approach specific techniques and their practical applications illustrated by numerous case examples All professionals who treat clients with eating disorders will find this volume a most valuable clinical resource *Arts - Therapies - Communication European Arts Therapy* Line Kossolapow, Sarah Scoble, 2005

Stipulation of a present actual position of Art Therapy however inevitably leads to further thoughts about ongoing development Everything required for the theoretical practical founding of a European Art Therapy as discipline still has to be done including construction of a communicative bridge to partners in other continents or countries This development work has two strands of development One follows a more theoretical direction with European Art Therapy as a research and teaching subject as an objective in view The other is directed more towards practical fieldwork which in turn can lead to the establishment of funds of experience as well as quantitative and qualitative investigations and thus to theoretical methodical statements In the contributions on hand both connections pervade Naturally the individual articles in this collection do not fully expound the volume of art therapeutic work throughout Europe but they are a source of information and inspiration for the user from theory and or practice who can then find his particular niche with his own specific interests within the cross section and subsequently continue the discourse spatially and objectively **The Use of the Creative Therapies with**
