Modern Warships Up Close Martin J. Dougherty, 2015-12-15 In the last century there have been some pretty amazing advances in naval technology This visually arresting reference guide profiles several dozen warships The naval vessels featured include submarines amphibious landing craft aircraft carriers and destroyers Both historically significant ships from the past and today's newest high tech vessels have their moments in the spotlight The book features amazing images of the vessels profiled which were created in 3D then rendered as elevations This one is sure to delight anybody who has an interest in the military history technology or the ocean

Emerging Technologies and International Security Reuben Steff, Joe Burton, Simona R. Soare, 2020-11-25 This book offers a multidisciplinary analysis of emerging technologies and their impact on the new international security environment across three levels of analysis While recent technological developments such as Artificial Intelligence AI robotics and automation have the potential to transform international relations in positive ways they also pose challenges to peace and security and raise new ethical legal and political questions about the use of power and the role of humans in war and conflict This book makes a contribution to these debates by considering emerging technologies across three levels of analysis 1 the international system systemic level including the balance of power 2 the state and its role in international affairs and how these technologies are redefining and challenging the state's traditional roles and 3 the relationship between the state and society including how these technologies affect individuals and non state actors This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space The chapters examine the implications of these technologies for the balance of power examining the strategies of the US Russia and China to harness AI robotics and automation and how their militaries and private corporations are responding how smaller and less powerful states and non state actors are adjusting the political ethical and legal implications of AI and automation what these technologies mean for how war and power is understood and utilized in the 21st century and how these technologies diffuse power away from the state to society individuals and non state actors This volume will be of much interest to students of international security science and technology studies law philosophy and international relations

Clausewitz and Modern Strategy Michael I. Handel, 2012-11-12 Published in 1996 Clausewitz and Modern Strategy is a valuable contribution to the field of Military Strategic Studies The magnum opus of Carl von Clausewitz On War is a work frequently quoted usually the one famous quotation but often superficially read The essays in this book were presented at an international conference On Clausewitz held at the US Army War College in Carlisle Barracks Pennsylvania in April 1985

The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies

the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within

A History of the Modern Chinese Navy, 1840-2020 Bruce A. Elleman, 2021-05-09 This book provides a comprehensive history of the modern Chinese navy from 1840 to the present Beginning with a survey of naval developments in earlier imperial times the book goes on to show how China has since the mid 19th century four times built or rebuilt its navy after the Opium Wars a navy which was sunk or captured by the Japanese in the war of 1894 1895 during the 1920s and 1930s a navy again sunk or lost to Japan in the war of 1937 1945 in the 1950s a navy built with Soviet help which stagnated following the Sino Soviet split in the early 1960s and finally the present navy which absorbed its predecessor but with the most modern sections dating from the 1990s a navy which continues to grow and prosper The book also shows how the underlying strategic imperative for the Chinese navy has been the defense of China's coasts and major rivers how naval mutiny was a key factor in the overthrow of the Qing and the Nationalist regimes and how successive Chinese governments aware of the potent threat of naval mutiny have restricted the growth independence and capabilities of the navy Overall the book provides at a time when many people in the West view China and its navy as a threat a rich detailed and realistic assessment of the true nature of the Chinese navy and the contemporary factors that affect its development

War and State Formation in Ancient China and Early Modern Europe Victoria Tin-bor Hui, 2005-07-04 The Eurocentric conventional wisdom holds that the West is unique in having a multi state system in international relations and liberal democracy in state society relations At the same time the Sinocentric perspective believes that China is destined to have authoritarian rule under a unified empire In fact China in the Spring and Autumn and Warring States periods 656 221 BC was once a system of sovereign territorial states similar to Europe in the early modern period Both cases witnessed the prevalence of war formation of alliances development of the centralized bureaucracy emergence of citizenship rights and expansion of international trade This book first published in 2005 examines

why China and Europe shared similar processes but experienced opposite outcomes This historical comparison of China and Europe challenges the presumption that Europe was destined to enjoy checks and balances while China was preordained to suffer under a coercive universal status **Fiscal year 1978 authorization for military procurement, research and development, and active duty, selected reserve, and civilian personnel strengths** United States. Congress. Senate. Committee on Armed Services,1977 *A Modern Chinese Journey to the West* Ulric Killion,2006 This book begins and perhaps should end with an excerpt from the writings of the late eminent Chinese scholar Fung Yu lan or Feng Youlan 1895 1990 who wrote The ancient Chinese culture is an inherent factor determining the Chinese style If the latter enunciation of Fung Yu lan stirs one s interest in Chinese culture for the typical reasons such as an interest in ancient periods of China romanticism which focuses on the exotic and mysterious for example Zen Buddhism and Taoism or simply as the source of exotic objects d art then all the better Because for a typical Westerner bound in Western conventionalism and parochialism engendering an understanding of the policies and practices of the People s Republic of China China necessitates understanding a modern China in light of Chinese traditional culture or philosophy or a China in antiquity The consequence of Chinese traditional culture affects many political economy concerns of modern China ranging from socio economic political to international trade and other concerns Indeed philosophical antecedents influence modern Chinese policies and practices

Defence Industries in the 21st Century Çağlar Kurç, Richard A. Bitzinger, Stephanie G. Neuman, 2021-05-14 *Defence Industries in the 21st Century* explores the transformation in the global defence industrial production through examining the interaction between international and domestic factors With the global defence industry and arms market likely continue to expand and mature the ways in which this progression could influence international politics remain obscure In practice as the contents of this book show the defence industrial bases and arms export policies of emerging states display significant variance This variance is the result of a unique balance between domestic and international factors that has shaped the defence industrialisation behaviour and policies of the less industrialised states One of the most important conclusions of the book is that the interplay between domestic and international factors clearly influences the variation in the emerging states defence industrialisation policies as well as their success or failure While international factors create opportunities they also limit the options available to emerging economies Domestic factors also play an important role by shaping the policy choices of the states decision makers Exploring the balance between international and domestic factors and the ways in which they influence defence industrialisation in emerging states *Defence Industries in the 21st Century* will be of great interest to scholars of Defence Industries Arms Manufacturing and Defence Strategic and Security Studies more generally The chapters were originally published in *Defence Studies Comparative Strategy and All Azimuth* **The History of Modern Japanese Education** Benjamin C. Duke, 2009 *The History of Modern Japanese Education* is the first account in English of the construction of a national school system in Japan as outlined in the 1872 document the Gakusei Divided into three parts

tracing decades of change the book begins by exploring the feudal background for the Gakusei during the Tokugawa era which produced the initial leaders of modern Japan Next Benjamin Duke traces the Ministry of Education's investigations of the 1870s to determine the best western model for Japan including the decision to adopt American teaching methods He then goes on to cover the eventual reverse course sparked by the Imperial Household protest that the western model overshadowed cherished Japanese traditions Ultimately the 1890 Imperial Rescript on Education integrated Confucian teachings of loyalty and filial piety with Imperial ideology laying the moral basis for a western style academic curriculum in the nation's schools

Engineering War and Peace in Modern Japan, 1868-1964 Takashi Nishiyama, 2014-04-15 The role of engineering communities in taking Japan from a defeated war machine into a peacetime technology leader Naval aeronautic and mechanical engineers played a powerful part in the military buildup of Japan in the early and mid twentieth century They belonged to a militaristic regime and embraced the importance of their role in it Takashi Nishiyama examines the impact of war and peace on technological transformation during the twentieth century He is the first to study the paradoxical and transformative power of Japan's defeat in World War II through the lens of engineering Nishiyama asks How did authorities select and prepare young men to be engineers How did Japan develop curricula adequate to the task and from whom did the country borrow Under what conditions What did the engineers think of the planes they built to support Kamikaze suicide missions But his study ultimately concerns the remarkable transition these trained engineers made after total defeat in 1945 How could the engineers of war machines so quickly turn to peaceful construction projects such as designing the equipment necessary to manufacture consumer products Most important they developed new high speed rail services including the Shinkansen Bullet Train What does this change tell us not only about Japan at war and then in peacetime but also about the malleability of engineering cultures Nishiyama aims to counterbalance prevalent Eurocentric Americentric views in the history of technology Engineering War and Peace in Modern Japan 1868 1964 sets the historical experience of one country's technological transformation in a larger international framework by studying sources in six different languages Chinese English French German Japanese and Spanish The result is a fascinating read for those interested in technology East Asia and international studies Nishiyama's work offers lessons to policymakers interested in how a country can recover successfully after defeat
