Milevsky, 2022-01-31 David Novak is widely recognized as one of the most prominent Jewish thinkers in North America today and his most important contribution to philosophy has been his work on natural law This book is an exploration of the shift in the content and context of that theory by reference to the metaphysical meaning that Novak ultimately assigns to reason This change is then analyzed within the framework of Novak's covenantal theology and his developing view of redemption in particular Through this examination this book highlights the contribution of Novak's natural law theory to the continuing debate over the role of reason in Judaism The Concept of Tolerance in Judaism, Christianity and Islam Catharina

Intersections of Religion and Migration Jennifer B. Saunders, Elena Fiddian-Qasmiyeh, Susanna Snyder, 2016-09-28 This innovative volume

introduces readers to a variety of disciplinary and methodological approaches used to examine the intersections of religion and migration. A range of leading figures in this field consider the roles of religion throughout various types of migration including forced, voluntary and economic. They discuss examples of migrations at all levels from local to global and critically examine case studies from various regional contexts across the globe. The book grapples with the linkages and feedback between religion and migration, exploring immigrant congregations, activism among and between religious groups and innovations in religious thought in light of migration experiences among other themes. The contributors demonstrate that religion is an important factor in migration studies and that attention to the intersection between religion and migration augments and enriches our understandings of religion. Ultimately, this volume provides a crucial survey of a burgeoning cross-disciplinary, interreligious and global area of study.

The Individual in International Law Anne Peters, Tom Sparks, 2024-02-28. Shifts across the corpus of international law have brought the international legal system into a closer alignment with the interests of the individual. This has led to a great and growing interest in the roles and status of individuals in international law and provided new impulses for debate. *The Individual in International Law* is an exploration of what is described as the humanisation of international law. It examines how international law has accommodated individuals and how individual status, rights and obligations have become denser and more important in the international legal system. Split into two parts, the book analyses the humanisation of international law in different historical periods and from various theoretical perspectives. The first part focuses on the historical evolution of international law, exploring how the interests of individuals have shaped the development of the legal system from antiquity to 1945, providing a counterpoint to State-centric readings of international law's history. The second part contains theoretical debates, critical approaches and interdisciplinary investigations offering perspectives from *ius positivism* and *ius naturalism*, Marxism, TWAIL, feminism, global law, global constitutionalism, law and economics and legal anthropology. The book aims to stimulate further research on the humanisation and dehumanisation of new fields ranging from the *ius contra bellum* to climate law. The editors' introduction and conclusion frame the contributions, draw together their findings and address critiques comprehensively. Written by a team of acknowledged experts in their fields, this volume elucidates how the interests, rights, obligations and responsibilities of individuals have shaped international norms and regimes and suggests how a reoriented transformative humanism can inform and develop international law in an era of profound ideological, ecological and technical challenge. This is an open access title. It is made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 International licence. It is available to read and download as a PDF version on the Oxford Academic platform.

Aquinas's Eschatological Ethics and the Virtue of Temperance Matthew Levering, 2019-11-15 Matthew Levering offers a biblical and Thomistic portrait of the cardinal virtue of temperance and its allied virtues in dialogue with an ecumenical range of theologians and scholars In Aquinas's Eschatological Ethics and the Virtue of Temperance Levering argues that Catholic ethics make sense only in light of the biblical worldview that Jesus has inaugurated the kingdom of God by pouring out his spirit Jesus has made it possible for us to know and obey God's law for human flourishing as individuals and communities He has reoriented our lives toward the goal of beatific communion with him in charity which affects the exercise of the moral virtues that pertain to human flourishing Without the context of the inaugurated kingdom Catholic ethics as traditionally conceived will seem like an effort to find a middle ground between legalistic rigorism and relativistic laxism which is especially the case with the virtue of temperance the focus of Levering's book After an opening chapter on the eschatological biblical character of Catholic ethics the ensuing chapters engage Aquinas's theology of temperance in the Summa theologiae which identifies and examines a number of virtues associated with temperance Levering demonstrates that the theology of temperance is profoundly biblical and that Aquinas's theology of temperance relies for its intelligibility upon Christ's inauguration of the kingdom of God as the graced fulfillment of our created nature The book develops new vistas for scholars and students interested in moral theology
