Americans experienced a sea change in their lives Given the enormous profits from issuing credit banks and chain stores used aggressive marketing to reach Americans experiencing such crises as divorce or unemployment to help them make ends meet or to persuade them that they could live beyond their means After banks exhausted the profits from this group of people they moved into the market for college credit cards and student loans and then into predatory lending through check cashing stores and pawnshops to the poor In 2003 Americans owed nearly 8 trillion in consumer debt amounting to 130 percent of their average disposable income The role of credit and debt in people s lives is one of the most important social and economic issues of our age Brett Williams provides a sobering and frank investigation of the credit industry and how it came to dominate the lives of most Americans by propelling the social changes that are enacted when an economy is based on debt Williams argues that credit and debt act to obscure reproduce and exacerbate other inequalities It is in the best interest of the banks corporations and their shareholders to keep consumer debt at high levels By targeting low income and young people who would not be eligible for credit in other businesses these companies are able quickly to gain a stranglehold on the finances of millions Throughout Williams provides firsthand accounts of how Americans from all socioeconomic levels use credit These vignettes complement the history and technical issues of the credit industry including strategies people use to manage debt how credit functions in their lives how they understand their own indebtedness and the sometimes tragic impact of massive debt on people s lives
