The International Academy of Cytology Yokohama System for Reporting Breast Fine Needle Aspiration Biopsy Cytopathology Andrew S. Field, Wendy A. Raymond, Fernando Schmitt, 2020-02-22. This text describes a system of reporting breast fine needle aspiration biopsy that uses five clearly defined categories, each described by a specific term and each with a specific risk of malignancy. The five categories are insufficient, inadequate, benign, atypical, suspicious of malignancy and malignant. Each category has a risk of malignancy and is linked to management recommendations which include several options because it is recognized that diagnostic infrastructure such as the availability of core needle biopsy and ultrasound guidance vary between developed and low and middle income countries. This text includes key diagnostic cytological criteria for each of the many lesions and tumors found in the breast. The cytopathology of specific lesions is illustrated with high quality photomicrographs with clear

figure descriptions Chapters also discuss current and potential future ancillary tests liquid based cytology nipple cytology and management An additional chapter provides an overview of an approach to the diagnosis of direct smears of breast fine needle aspiration biopsies The International Academy of Cytology Yokohama System for Reporting Breast Fine Needle Aspiration Biopsy Cytopathology provides a clear logical approach to the diagnosis and categorization of breast lesions by FNAB cytology and aims to facilitate communication with breast clinicians further research into breast cytopathology and related molecular pathology and improve patient care

Atlas of Fine Needle Aspiration Cytology Henryk A. Domanski, 2018-10-29 This updated and expanded second edition covers all of the diagnostic areas where FNAC is used today Each chapter follows a similar practical format diagnostic criteria with an emphasis of differential diagnoses diagnostic problems and pitfalls and relevant findings of ancillary methods Authoritative discussions will reflect accepted international viewpoints The interaction of the cytologist or cytopathologist with other specialists radiologists oncologists and surgeons is emphasized and illustrated throughout With contributions from experts in the field internationally and many new colour images Atlas of Fine Needle Aspiration Cytology Second Edition provides a comprehensive and up to date guide to FNAC for pathologists cytopathologists radiologists oncologists surgeons and others involved in the diagnosis and treatment of patients with suspicious mass lesions

DNA Vaccines Mark W. Saltzman, Hong Shen, Janet L. Brandsma, 2008-02-02 In the early 1990s almost 200 yr after Edward Jenner demonstrated the effectiveness of the smallpox vaccine a new paradigm for vaccination emerged The conventional method of vaccination required delivery of whole pathogens or structural subunits but in this new approach DNA or genetic information was administered to elicit an immunological response Once it was observed that plasmid DNA delivered in vivo led to production of an encoded transgene 1 two ground breaking studies demonstrated that immunological responses could be generated against antigenic transgenes via plasmid DNA delivered by DNA vaccination as this approach is called 2 3 The appearance of this new vaccination strategy coincided with advances in molecular biology which provided new tools to study and manipulate the basic elements of an organism's genome and also could also be applied to the design and production of DNA vaccines DNA Vaccines is a major updated and enhancement of the first edition It reviews state of the art methods in DNA vaccine technology with chapters describing DNA vaccine design delivery systems adjuvants current applications methods of production and quality control Consistent with the approach of the Methods in Molecular Medicine series these chapters contain detailed practical procedures on the latest DNA vaccine technology The enthusiasm for DNA vaccine technology is made clear by the number of research studies published on this topic since the mid 1990s
