Nice New Construction Two More Stories:

Electricity, 1896 **Your Day in Court** Bradley J. Franks, Robert C. Simpson, 2023-01-18 For those Americans who know the difference between a U S Citizen and a true American Remember U S Policies Statutes Codes or Ordinances do not apply to Americans that exercise their rights set forth by the U S Constitution Those who come from a different Country apply for Citizenship become U S citizens The government has forgotten these facts and will be held accountable for their crimes against Americans **From Al-Andalus to Monte Sacro** Dolores Luna Guinot, 2014-03-06 During the time he spent in the Portuguese islands of Porto Santo and Madeira Cristopher Columbus a navigator from Genoa was in charge of a dying sailor from Castile whose caravel had been carried by the current from the Gulf of Guinea to a remote sea possibly the Caribbean On his deathbed this man had told Columbus the secret of some lands where Siberians had arrived during the Pleistocene and some documents about some possible previous trips This sailor assured that such lands he had achieved carried by the currents were the same ones he was referring to When Columbus arrived in Spain he tried to convince the Crown of Castile about his projects which were precisely the same ones that Isaiah had prophesied as destined for getting the limits of the horizons During his description Columbus looked so sure that both the Queen Isabel and the King Fernando wondered whether he was trying to conceal a proved reality a mystery he took to his grave When Columbus asked them for a subsidy Fernando el Catlico commented him that coffers were empty at that point as they had just subjugated the whole Al Andalus after the seizure of Granada and therefore the defeat of the most unlucky Nasrid king Boabdil known as the little man Due to the Spanish explorers of the 15th century Spain became the biggest commercial power amongst the European countries They built up settlements which would last until three centuries later in a colonizing expansive process until the loss of Spanish power on such territories from the decade of 1810s on when the Independence began Since the late 18th century until the early 19th Century the West witnessed a series of chain revolutions which affected Western Europe and Spanish America at the same time The invasion of Napoleon Francisco de Miranda Simon Bolivar Masonic lodges together with envies betrayals or lovers make this book to be a thrilling adventure based on historic real **America's Textile Reporter**, 1908 **The Story of the Great War (Complete)** Various Authors, What lesson will America draw from the present Great War Must she see the heads of her own children at the foot of the guillotine to realize that it will cut or will she accept the evidence of the thousands which have lain there before Will she heed the lesson of all time that national unpreparedness means national downfall or will she profit from the experience and misfortunes of others and take those needed measures of preparedness which prudence and wisdom dictate In a word will she draw any valuable lessons from the Great War This is the question which is so often asked As yet there is no answer It is the question uppermost in the minds of all those who are intelligently interested in our country's welfare and safety It is the question which vitally concerns all of us as it concerns the defense and possibly the very existence of our nation The answer must be Preparedness If we are to live

preparedness to oppose the force of wrong with the strength of right Will it be That s the question Or will America drift on blind to the lessons of the world tragedy heedless of consequences concerned with the accumulation of wealth satiated with a sense of moral worth which the world does not so fully recognize planning to capture the commerce of the warring nations and expecting at the same time to retain their friendship and regard Let us hope that in the light of what is and as a preparation against what may be the answer will be characteristic of a great people peaceful but prudent and foreseeing that it will be thorough carefully thought out preparedness preparedness against war A preparedness which if it is to be lasting and secure must be founded upon the moral organization of our people an organization which will create and keep alive in the heart of every citizen a sense not only of obligation for service to the nation in time of war or trouble but also of obligation to so prepare himself as to render this service effective An organization which will recognize that the basic principle upon which a free democracy or representative government rests and must rest if they are to survive the day of stress and trouble is that with manhood suffrage goes manhood obligation for service not necessarily with arms in hand but for service somewhere in that great complex mass which constitutes the organization of a nation s might and resources for defense organization which will make us think in terms of the nation and not those of city State or personal interest organization which will result in all performing service for the nation with singleness of purpose in a common cause preparedness for defense preparedness to discharge our plain duty whatever it may be Such service will make for national solidarity the doing away with petty distinctions of class and creed and fuse the various elements of this people into one homogeneous mass of real Americans and leave us a better and a stronger people Once such a moral organization is accomplished the remaining organization will be simple This will include an organization of transportation on land and sea and of communications An organization of the nation s industrial resources so that the energy of its great manufacturing plants may be promptly turned into making what they can best make to supply the military needs of the nation By military needs we mean all the complex requirements of a nation engaged in war requirements which are many of them requirements of peace as well as of war It will also include a thorough organization of the country s chemical resources and the development thereof so that we may be as little dependent as possible upon materials from overseas At present many important and essential elements come from overseas nations and would not be available in case of loss of sea control
