New Technologies and Environmental Innovation Joseph Huber, 2004-01-01 Joseph Huber's book contains a wealth of information on technological environmental innovations. The scrutiny of this material leads to powerful conclusions with which scholars should concern themselves. Highly recommended. Ren Kemp Maastricht University The Netherlands. This timely and impressive volume brings technology back into the centre of discussions and debates on environmental reform. In articulating an ecological modernisation perspective, Joseph Huber presents an inspiring optimistic and at times provocative assessment of the potential and future role of radical technological innovations in greening production consumption cycles. Arthur P J Mol Wageningen University The Netherlands. In this insightful book, Joseph Huber investigates the life cycle analysis of technological and environmental innovations. TEIs are new technologies, products and practices which have benign environmental effects and which can increase eco efficiency. More importantly, they can also improve metabolic consistency, thus laying the foundations for a sustainable industrial ecology.

Environmental Innovation and Ecodesign Romain Debref, 2018-08-01 The end of the post war economic boom was marked by the recognition of the environmental problem with the oil crises of the 1970s and in 1972 the first major UN conference devoted to the human environment. Successive international meetings have resulted in a context where technical change, innovation and industry have assumed a central place in the creation of a new model of society. Against this consensus, the author demonstrates from economic analysis and wide ranging examples that the environmental innovation doctrine and ecodesign methods remain fragile and can lead to paradoxical results.

Employee Environmental Innovation in Firms Catherine Anne Ramus, 2018-02-05 This title was first published in 2003. Testing policies promoted by current environmental management literature, this book puts forward a new conceptual model to identify which organizational and supervisory support factors can positively influence employees to promote environmental initiatives in businesses. The model uses employee knowledge of and belief in management commitment, testing thirteen environmental policies that influence employee eco initiatives and six sets of organizational behaviour and supervisory support factors. The book features a thorough review of relevant organizational behaviour and corporate environmental management literature describing what motivates adoption of company policies of sustainable development factors motivating employees to implement innovation and learning organization type managerial behaviours that encourage employee actions. A survey questionnaire using behaviourally anchored rating scales enables employees to assess the behaviours of their direct supervisors without the usual biases that occur in other opinion based surveys. The survey highlights counter intuitive results related to information sharing and environmental policies and the author proposes recommendations for more effective future policies.

Adoption of Environmental Innovations Koos van Dijken, Yvonne Prince, T.J. Wolters, Marco Frey, Giuliano Mussati, Paul Kalff, Ole Hansen, Søren Kerndrup, Bent Søndergård, Eduardo Lopes Rodrigues, Sandra Meredith, 2012-12-06 How do small and medium sized enterprises (SMEs) adopt

environmental innovations Do they have the necessary internal competence Is any support offered by external parties i e network involvement What are the policy implications This book is based on extensive fieldwork conducted in four traditional industrial sectors offset printing electroplating textile finishing and industrial painting The work was carried out in Denmark Italy the Netherlands Portugal and the UK Twenty company based case studies were analyzed and a telephone survey was conducted among 527 companies As a result the Innovation Triangle came to be formulated which is presented here defining and combining the determinants of SME innovativeness The Innovation Triangle distinguishes three major determinants of innovativeness business competence environmental orientation and network involvement The Innovation Triangle allows one to diagnose current environmental and innovation policies indicating which policy measures might be effective in increasing the adoption of environmentally friendly technologies allowing environmental objectives to be achieved

Environment and Innovation Clara Inés Pardo Martínez, Alexander Cotte Poveda, 2021-09-14 This book seeks to show the role of sustainability and innovation in the business and productive sector as good strategy to improve performance and contribute to growth and sustainable development through innovative strategies applied to the management process Different public and private organizations seek to maintain their business and market share while developing strategies to improve environmental performance through innovation and address new challenges that seek a productive sector responsible on environmental issues This book offers an analysis of the relationship between sustainability and innovation in production with the aim to offer strategies to improve sustainability performance

OECD Environmental Performance Reviews: Italy 2013 OECD, 2013-03-08 This report is the third OECD review of Italy's environmental performance It evaluates progress towards sustainable development and green growth with a focus on policies that promote more effective and efficient water management and provide better incentives to tackle climate change

Energy Tax and Regulatory Policy in Europe Ian Parry, Karen Pittel, Herman Vollebergh, 2017-08-11 Concise introductions to the main issues in energy policy and their interaction with environmental policies in the EU The European Union EU faces critical challenges in energy policy making the most pressing of which are how to achieve the deep greenhouse gas reductions promised at the

December 2015 UN Conference of the Parties in Paris and how this effort can be coordinated with already existing policies Energy policy is primarily a member state responsibility and policy makers need an overarching view of the main issues in energy policy and their interaction with environmental policies This volume aims to fill this need offering concise introductions to some of the major issues as well as practical suggestions for policy making The contributors discuss reforms to the EU Emissions Trading System ETS the world s largest carbon market ways to improve the operation and integration of the EU s power grids in terms of both supply and demand changes to the EU s Energy Tax Directive which sets tax floors for fuels outside the ETS the coordination of climate policies with policies to promote renewables and energy efficiency research into clean technology challenges to shale gas development and transportation policy and the need for action on such externalities as traffic congestion Finally contributors consider obstacles to reform including its potential effects on vulnerable households and energy intensive industries Contributors Mikael Skou Andersen Niels Anger Bruno De Borger Antoine Dechezlepr tre Jos Delbeke Ottmar Edenhofer Christian Flachsland Beatriz Gaitan Polona Gregorin Cameron Hepburn Alan Krupnick Andreas L schel Claudio Marcantonini Felix Christian Matthes Paul Nahmmacher Ian Parry Karen Pittel David Popp Stef Proost Christina Roolfs Bert Saveyn Oliver Schenker Stephen Smith Alexander Teytelboym Kurt Van Dender Herman Vollebergh Nils Henrik M von der Fehr Zhongmin Wang Georg Zachmann Advances in the Leading Paradigms of Urbanism and their Amalgamation Simon Elias Bibri, 2020-06-20 This book explores the recent advances in the leading paradigms of urbanism namely compact cities eco cities and data driven smart cities and the evolving approach to their amalgamation under the umbrella term of smart sustainable cities It addresses these advances by investigating how and to what extent the strategies of compact cities and eco cities and their merger have been enhanced and strengthened through new planning and development practices and are being supported and leveraged by the applied solutions pertaining to data driven smart cities The ultimate goal is to advance sustainability and harness its synergistic effects on multiple scales This entails developing and implementing more effective approaches to the balanced integration of the three dimensions of sustainability as well as to producing combined effects of the strategies and solutions of the prevailing approaches to urbanism that are greater than the sum of their separate effects in terms of the tripartite value of sustainability Sustainable urban development is today seen as one of the keys towards unlocking the quest for a sustainable world And the big data revolution is set to erupt in cities throughout the world heralding an era where instrumentation datafication and computation are increasingly pervading the very fabric of cities and the spaces we live in thanks to the IoT Big data and the IoT technologies are seen as powerful forces that have tremendous potential for advancing urban sustainability Indeed they are instigating a massive change in the way sustainable cities can tackle the kind of special conundrums wicked problems and significant challenges they inherently embody as complex systems They offer a multitudinous array of innovative solutions and sophisticated approaches informed by groundbreaking research and data driven science As such they are becoming

essential to the functioning of sustainable cities Besides yet knowing to what extent we are making progress towards sustainable cities is problematic adding to the fragmented conflicting picture that arises of change on the ground in the face of the escalating rate and scale of urbanization and in the light of emerging ICT and its novel applications In a nutshell new circumstances require new responses This timely and multifaceted book is intended for a wide readership As such it will appeal to researchers academics urban scientists urbanists planners designers policy makers and futurists as well as all readers interested in sustainable cities and their ongoing and future data driven transformation

Towards Environmental Innovation Systems K. Matthias Weber,Jens Hemmelskamp,2005-02-11 Here is a dialog among worldwide experts across disciplines concerning theoretical frameworks and practical experiences to guide research and policy towards environmental innovation systems The contributors explore new directions of research at the border of two research traditions systems of innovation and environmental innovations The text examines the four main components of environmental innovation systems conceptual foundations empirical experiences strategic approaches and experiences with policy instruments

Innovations and the Environment Yoram Krozer,2008-05-06 This book Innovations and the Environment aims to review the state of knowledge and to provide an empirical basis for the development and use of new technologies products and services to reduce the impact of human activities on environmental quality This is at the core of the debate on economics and the environment The message is optimistic Advances in thinking and actions make it possible to maintain high environmental quality at reasonable costs sometimes even having a positive effect on corporate results The progress is by no means automatic Risk taking by entrepreneurs managers and policy makers is necessary The idea to write a book about innovations and the environment was born during discussions with Professor Han Brezet who was convinced of the importance of this subject for engineering students This is because he has found many stories about the successes and failures of environmental technologies and even more on the impact of technologies on environmental qualities but no reviews on technology and the mindset of entrepreneurship to explain the forces that drive innovations for sustainable development

Lead Markets for Environmental Innovations Klaus Jacob,Marian Beise,Jürgen M. Blazejczak,Dietmar Edler,Rüdiger Haum,Martin Jänicke,Thomas Löw,Ulrich Petschow,Klaus Rennings,2006-03-30 Some countries are earlier than others in the development and introduction of environmental innovations Often the leadership in technological development is accompanied by a leadership in environmental policy The book provides an analysis of lead markets for innovations such as fuel cells photovoltaics and others Contributions of innovation economics policy analysis and environmental economics are assessed regarding their potential to explain the leadership of single countries The book

depicts the policy frameworks that are favourable to the creation of such lead markets on the basis of theoretical considerations and case studies Finally recommendations for R and D policies environmental and industrial policies are derived

Technological, Managerial and Organizational Core Competencies: Dynamic Innovation and Sustainable Development Nobre, Farley Simon, 2011-09-30 Innovation involves a set of processes which support the production and transformation of knowledge into new processes technologies and products goods and services and provide an organization with particular strengths and value relative to other firms In such a view innovation is a key source of customer benefits and sustainable competitive advantage Technological Managerial and Organizational Core Competencies Dynamic Innovation and Sustainable Development investigates the impact of knowledge management information systems finance organizational networks internationalization strategic management marketing entrepreneurship and sustainability on an organization that pursues dynamic innovation and sustainable advantage This book provides research and practice for graduate and undergraduate programs as well as business firms with different technological managerial and organizational perspectives Further Description from the Editors This book represents the culmination of an international project to compile inter disciplinary research that most contributes to innovation More specifically this book is about innovation in firms industries nations and society It speaks to professionals and researchers who want to improve their understanding of dynamic innovation and sustainable development The Editors goal is to foster cross pollination among researchers To this aim the Editors have selected and assembled 35 chapters that illustrate multidisciplinary theoretical perspectives and empiric results on innovation and the roles of Sustainability Organizational Networks Entrepreneurship Knowledge Management R D T Research Development and Technology Management Marketing Finance Internationalization and Information Systems in the organization that pursues dynamic innovation and sustainable development Innovation involves processes organizational elements or resources and Organizational Abilities OA that support the production and transformation of knowledge into new knowledge processes structures technologies and products goods and services At the firm and industry levels of analysis innovation can provide organizations with strengths relative to other firms clusters and nations and it is a key source of customer benefits and sustainable development At the collective and societal levels of analysis innovation can provide humanity with economic social and environmental wealth through sustainable development The uniqueness of this book lies in the participants efforts to identify Organizations Creative Areas OCA that can provide core competencies for the organization in pursuit of dynamic innovation and sustainable development In this perspective innovation is a dynamic system and it is contingent upon a set of core competencies that couple to each other Therefore changing of even one competence can affect the organization s ability to innovate The book avoids the term competitive advantage and adopts a more fruitful perspective of sustainable development the process of achieving human development in an inclusive connected equitable prudent and secure manner An inclusive perspective sees traditional competitive advantage

as occupying one extreme whereas truly sustainable development occupies the opposite extreme Sustainable development must benefit not only the organization and its customers but also the whole society and the future of humanity through sustainability Most chapters of this book fall between these extremes **OECD Employment Outlook 2012**
