New Race Politics in America Jane Junn, Kerry L. Haynie, 2008-05-05 Foreign migration to the United States is dramatically altering the demographic profile of the American electorate Nearly a third of all Americans are of non white and non European descent Latinos and Hispanics have recently eclipsed African Americans as the largest minority group in the United States Between 1990 and 2000 Asians doubled the size of their population to more than 4 percent of Americans Though immigration has altered the racial and ethnic composition of every state in the nation surprisingly little is known about the consequences of this new heterogeneity for American politics This book explores the impact and political consequences of immigration After considering the organizations that mobilize new citizens to politics the authors examine the political psychology of group consciousness for political mobilization Finally they consider the emerging patterns and choices of new voters

Charting the Range of Black Politics Michael Mitchell, 2017-07-05 The election of 2008 brought onto the national stage complexities arising when the member of a minority group assumes power over national political institutions It also underlined the limits placed on that power by the double accountability such a figure faces The question posed in this volume of the NPSR is Might the ascendancy of President Obama lead to a deracialization of American politics or its opposite The contributions to this volume examine this question in a variety of ways David Wilson and Khalilah

Brown Dean analyze black attitudes towards the candidates for the Democratic Party nomination in the presidential race of 2008 Lorenzo Morris asks how perceptions of race have defined expectations of the African American ambassadors to the United Nations Horace Bartilow and Kihong Eom use a game theoretic approach to examine US drug strategies in the Caribbean A works in progress section follows with personal reflections by Michael C Dawson and Andra Gillespe They relate how personal concerns and curiosities guide their research A book review section provides a discussion about works of interest to scholars studying black politics

Grassroots and Coalitions Michael Mitchell, 2017-07-12 The main focus of this volume is an exploration of the patterns of competition for political power at the state and local levels in American politics This volume looks at institutionalized patterns of black political power as they have evolved in the aftermath of the civil rights movement in the 1960s The editors argue that enough time has elapsed to warrant a new look at the circumstances in which black politics in America has played out Chapters include an examination of the ability of black candidates to win statewide elections with crucial white support an analysis of the impact of local political organizations in enhancing the chances of black candidates in winning local races a look at the messages of black pastors regarding solidarity with the Latino community and an investigation of the extent of the differences in the political participatory styles of poor blacks and poor whites The editors note that changes have taken place

as black American politics has confronted new complexities A works in progress section explains how theories of racial violence can be used to analyze racial incidents in the United States Other essays include reflections on blacks in Brazil and in urban American politics *A Midwestern Mosaic* J. Celeste Lay,2012-05-25 Drawn by low skilled work and the safety and security of rural life increasing numbers of families from Latin America and Southeast Asia have migrated to the American heartland In the path breaking book *A Midwestern Mosaic* J Celeste Lay examines the effects of political socialization on native white youth growing up in small towns Lay studies five Iowa towns to investigate how the political attitudes and inclinations of native adolescents change as a result of rapid ethnic diversification Using surveys and interviews she discovers that native adolescents adapt very well to foreign born citizens and that over time gaps diminish between diverse populations and youth in all white Anglo towns in regard to tolerance political knowledge efficacy and school participation *A Midwestern Mosaic* looks at the next generation to show how exposure to ethnic and cultural diversity during formative years can shape political behavior and will influence politics in the future *Race, Racial Attitudes and Stratification Beliefs* Matthew O. Hunt,George Wilson,2011-06-09 This book presents readers with a collection of cutting edge studies by leading scholars of inequality and race looking specifically at racial attitudes and stratification beliefs research *New Directions in American Political Parties* Jeffrey M. Stonecash,2010-06-10 Our portraits of voters have changed significantly within the last 10 to 15 years In a short period of time we have gone from concern that parties are not responsive or sufficiently different to whether polarization has become too great This volume with contributions from some of the most noted scholars of political parties brings together assessments of these changes to provide a comprehensive overview of current trends in the field *Americanizing Latino Politics, Latinoizing American Politics* Rodolfo O. de la Garza,Alan Yang,2019-11-20 Using the most extensive and currently available survey opinion data this book empirically supports the argument that Latinos have emerged as a convergent panethnic political group beyond the individual national origin identities dating to the time of the 1990 Latino National Political Survey when Mexican Americans Puerto Ricans and Cuban Americans were treated conceptually as politically distinct groups Replete with data and supplemented by an extensive online resource this book offers scholars students and sophisticated general readers evidence and inspiration for understanding the dynamics of Latino politics in the U S today *The Politics of Voter Suppression* Tova Andrea Wang,2012-07-27 *The Politics of Voter Suppression* arrives in time to assess actual practices at the polls this fall and to reengage with debates about voter suppression tactics such as requiring specific forms of identification Tova Andrea Wang examines the history of how U S election reforms have been manipulated for partisan advantage and establishes a new framework for analyzing current laws and policies The tactics that have been employed to suppress voting in recent elections are not novel she finds but rather build upon the strategies used by a variety of actors going back nearly a century and a half This continuity along with the shift to a Republican domination of voter suppression efforts for the past fifty years should inform what we think about reform policy today Wang argues that

activities that suppress voting are almost always illegitimate while reforms that increase participation are nearly always legitimate In short use and abuse of election laws and policies to suppress votes has obvious detrimental impacts on democracy itself Such activities are also harmful because of their direct impacts on actual election outcomes Wang regards as beneficial any legal effort to increase the number of Americans involved in the electoral system This includes efforts that are focused on improving voter turnout among certain populations typically regarded as supporting one party as long as the methods and means for boosting participation are open to all Wang identifies and describes a number of specific legitimate and positive reforms that will increase voter turnout

Black Mosaic Candis Watts Smith, 2019-07-30 Historically Black Americans have easily found common ground on political social and economic goals Yet there are signs of increasing variety of opinion among Blacks in the United States due in large part to the influx of Afro Latino Afro Caribbean and African immigrants to the United States In fact the very definition of African American as well as who can self identify as Black is becoming more ambiguous Should we expect African Americans shared sense of group identity and high sense of group consciousness to endure as ethnic diversity among the population increases In Black Mosaic Candis Watts Smith addresses the effects of this dynamic demographic change on Black identity and Black politics Smith explores the numerous ways in which the expanding and rapidly changing demographics of Black communities in the United States call into question the very foundations of political identity that has united African Americans for generations African Americans political attitudes and behaviors have evolved due to their historical experiences with American Politics and American racism Will Black newcomers recognize the inconsistencies between the American creed and American reality in the same way as those who have been in the U S for several generations If so how might this recognition influence Black immigrants political attitudes and behaviors Will race be a site of coalition between Black immigrants and African Americans In addition to face to face interviews with African Americans and Black immigrants Smith employs nationally representative survey data to examine these shifts in the attitudes of Black Americans Filling a significant gap in the political science literature to date Black Mosaic is a groundbreaking study about the state of race identity and politics in an ever changing America

Urban Citizenship and American Democracy Amy Bridges, Michael Javen Fortner, 2016-05-31 After decades of being defined by crisis and limitations cities are popular again as destinations for people and businesses and as subjects of scholarly study Urban Citizenship and American Democracy contributes to this new scholarship by exploring the origins and dynamics of urban citizenship in the United States Written by both urban and nonurban scholars using a variety of methodological approaches the book examines urban citizenship within particular historical social and policy contexts including issues of political participation public school engagement and crime policy development Contributors focus on enduring questions about urban political power local government and civic engagement to offer fresh theoretical and empirical accounts of city politics and policy federalism and American democracy

Racial Dynamics in Early Twentieth-Century Austin, Texas Jason

McDonald,2012-06-14 This pioneering study sheds new light on racial dynamics in the urban Southwest at a critical juncture in the history of the region and the nation It focuses upon the experiences of ethnoracial minorities particularly African Americans and Mexican immigrants in Austin Texas from the dawn of the Progressive Era to the onset of the Great Depression Through this lens McDonald explores the issues of migration proletarianization marginalization adaptation identity and community He reveals how in response to the exponential growth of the local ethnic Mexican population the white elite of the Lone Star State s capital adapted the city s bipartite system of segregation which had traditionally separated blacks from whites to incorporate Mexicans as a third and separate element neither black nor white As well as examining how African Americans and Mexican Americans responded to life in a racially stratified society McDonald examines the often fraught relationship between these groups *Conventional Wisdom, Parties, and Broken Barriers in the 2016 Election* Jennifer C. Lucas,Tauna Starbuck Sisco,Christopher J. Galdieri,2017-11-20 The 2016 presidential election was unconventional in many ways The election of President Donald Trump caught many by surprise with a true outsider a candidate with no previous governmental experience and mixed support from his own party won the election by winning in traditionally Democratic states with coattails that extended to Republican Senate candidates and resulted in unified Republican government for the first time since 2008 This result broke with the pre election conventional wisdom which expected Hillary Clinton to win the presidency and a closer Senate divide This surprising result led many political scientists to question whether 2016 truly marked a major turning point in American elections as portrayed in the media a break from the conventional wisdom or whether it was really the exception that proved the rule In this volume political scientists examine previous theories and trends in light of the 2016 election to determine the extent to which 2016 was a break from previous theories While in some areas it seems as though 2016 was really just what would have been predicted in others this election and the new president pose significant challenges to mainstream theories in political science In particular prominent political scientists examine whether voter trends with particular focus on groups by gender age geography and ethnicity and election issues especially the role of the Supreme Court followed or bucked recent trends Several political scientists examine the unconventional nomination process and whether this signals a new era for political parties The role of conspiracy theories and voter confidence in the administration of elections are also discussed Finally contributors also examine the indirect effect the presidential candidates especially Trump played in congressional election rhetoric **Civic Hopes and Political Realities** S. Karthick Ramakrishnan,Irene Bloemraad,2008-07-10 For many Americans participation in community organizations lays the groundwork for future political engagement But how does this traditional model of civic life relate to the experiences of today s immigrants Do community organizations help immigrants gain political influence in their neighborhoods and cities In *Civic Hopes and Political Realities* experts from a wide range of disciplines explore the way civic groups across the country and around the world are shaping immigrants quest for political effectiveness *Civic Hopes and*

Political Realities shows that while immigrant organizations play an important role in the lives of members their impact is often compromised by political marginalization and a severe lack of resources S Karthick Ramakrishnan and Irene Bloemraad examine community organizations in six cities in California and find that even in areas with high rates of immigrant organizing policymakers remain unaware of local ethnic organizations Looking at new immigrant destinations Kristi Andersen finds that community organizations often serve as the primary vehicle for political incorporation a role once played by the major political parties Floris Vermeulen and Maria Berger show how policies in two European cities lead to very different outcomes for ethnic organizations Amsterdam s more welcoming multicultural policies help immigrant community groups attain a level of political clout that similar organizations in Berlin lack Janelle Wong Kathy Rim and Haven Perez report on a study of Latino and Asian American evangelical churches While the church shapes members political views on issues such as abortion and same sex marriage church members may also question the evangelical movement s position on such issues as civil rights and immigration Els de Graauw finds that many non profit organizations without explicitly political agendas nonetheless play a crucial role in advancing the political interests of their immigrant members Recent cuts in funding for such organizations she argues block not only the provision of key social services but also an important avenue for political voice Looking at community organizing in a suburban community Sofya Aptekar finds that even when immigrant organizations have considerable resources and highly educated members they tend to be excluded from town politics Some observers worry that America s increasing diversity is detrimental to civic life and political engagement Civic Hopes and Political Realities boldly advances an alternative understanding of the ways in which immigrants are enriching America s civic and political realms even in the face of often challenging circumstances
