New Technologies And Human Rights Challenges To Regulation:

New Technologies and Human Rights Mr Mario Viola de Azevedo Cunha, 2013-10-28 Whilst advances in biotechnology and information technology have undoubtedly resulted in better quality of life for mankind they can also bring about global problems The legal response to the challenges caused by the rapid progress of technological change has been slow and the question of how international human rights should be protected and promoted with respect to science and technology remains unexplored The contributors to this book explore the political discourse and power relations of technological growth and human rights issues between the Global South and the Global North and uncover the different perspectives of both regions They investigate the conflict between technology and human rights and the perpetuation of inequality and subjection of the South to the North With emerging economies such as Brazil playing a major role in trade investment and financial law the book examines how human rights are affected in Southern countries and identifies significant challenges to reform in the areas of international law and policy *New Technologies and Human Rights*

Land, Jay D. Aronson, 2018-04-19 New technological innovations offer significant opportunities to promote and protect human rights At the same time they also pose undeniable risks In some areas they may even be changing what we mean by human rights The fact that new technologies are often privately controlled raises further questions about accountability and transparency and the role of human rights in

regulating these actors This volume edited by Molly K Land and Jay D Aronson provides an essential roadmap for understanding the relationship between technology and human rights law and practice It offers cutting edge analysis and practical strategies in contexts as diverse as autonomous lethal weapons climate change technology the Internet and social media and water meters This title is also available as Open Access

The Oxford Handbook of Law, Regulation and Technology Roger Brownsword, Eloise Scotford, Karen Yeung, 2017 The variety pace and power of technological innovations that have emerged in the 21st Century have been breathtaking These technological developments which include advances in networked information and communications biotechnology neurotechnology nanotechnology robotics and environmental engineering technology have raised a number of vital and complex questions Although these technologies have the potential to generate positive transformation and help address grand societal challenges the novelty associated with technological innovation has also been accompanied by anxieties about their risks and destabilizing effects Is there a potential harm to human health or the environment What are the ethical implications Do these innovations erode or antagonize values such as human dignity privacy democracy or other norms underpinning existing bodies of law and regulation These technological developments have therefore spawned a nascent but growing body of law and technology scholarship broadly concerned with exploring the legal social and ethical dimensions of technological innovation This handbook collates the many and varied strands of this scholarship focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors through which leading scholars in the field interrogate the interfaces between law emerging technology and regulation Structured in five parts the handbook I establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance II explores the relationship between technology development by focusing on core concepts and values which technological developments implicate III studies the challenges for law in responding to the emergence of new technologies examining how legal norms doctrine and institutions have been shaped challenged and destabilized by technology and even how technologies have been shaped by legal regimes IV provides a critical exploration of the implications of technological innovation examining the ways in which technological innovation has generated challenges for regulators in the governance of technological development and the implications of employing new technologies as an instrument of regulatory governance V explores various interfaces between law regulatory governance and new technologies across a range of key social domains

Case Studies on the Regulatory Challenges Raised by Innovation and the Regulatory Responses OECD, Korea Development Institute, 2021-12-14 The pace and scope of innovation are challenging the way governments regulate Existing regulatory frameworks might not be agile enough to accommodate the fast pace of technological development and as a consequence rules might become outdated

Strengthening the Human Right to Sanitation as an Instrument for Inclusive Development Pedi Obani, 2018-05-03 Over a third of the current 7.3 billion people worldwide are burdened with poor sanitation services The resulting social relational and ecological exclusion make the realisation of the human right to sanitation HRS a critical concern development concern However the literature has evolved in a largely compartmentalised

manner focusing on the formal recognition of the HRS in domestic legal systems without sufficiently addressing the drivers of poor sanitation services This research expounds on the impact of the HRS on human wellbeing and the environment within the context of a developing country like Nigeria as a case study The findings show that contrary to the focus in the literature the drivers of poor sanitation services are not confined to legal factors such as the formal recognition of the HRS within domestic legal systems Rather the drivers include social economic and environmental limitations to improved sanitation services Based on the findings the book argues that the focus in the literature on the formal recognition of the HRS in national legal systems is insufficient for tackling the main drivers of poor sanitation services It is therefore necessary to reformulate the HRS discourse using complementary governance instruments that advance social relational and ecological inclusion

Transnational Governance and Constitutionalism Christian Joerges, Inger-Johanne Sand, Gunther Teubner, 2004-06-30 The term transnational governance designates untraditional types of international and regional collaboration among both public and private actors These legally structured or less formal arrangements link economic scientific and technological spheres with political and legal processes

They are challenging the type of governance which constitutional states were supposed to represent and ensure They also provoke old questions Who bears the responsibility for governance without a government Can accountability be ensured The term constitutionalism is still widely identified with statal form of democratic governance The book refers to this term as a yardstick to which then contributors feel committed even where they plead for a reconceptualisation of constitutionalism or a discussion of its functional equivalents Transnational governance is neither public nor private nor purely international supranational nor totally denationalised It is neither arbitrary nor accidental that we present our inquiries into this phenomenon in the series of International Studies on Private Law Theory *Archives and Human Rights* Jens Boel,Perrine Canavaggio,Antonio González Quintana,2021-02-09 Why and how can records serve as evidence of human rights violations in particular crimes against humanity and help the fight against impunity *Archives and Human Rights* shows the close relationship between archives and human rights and discusses the emergence at the international level of the principles of the right to truth justice and reparation Through a historical overview and topical case studies from different regions of the world the book discusses how records can concretely support these principles The current examples also demonstrate how the perception of the role of the archivist has undergone a metamorphosis in recent decades towards the idea that archivists can and must play an active role in defending basic human rights first and foremost by enabling access to documentation on human rights violations Confronting painful memories of the past is a way to make the ghosts disappear and begin building a brighter more serene future The establishment of international justice mechanisms and the creation of truth commissions are important elements of this process The healing begins with the acknowledgment that painful chapters are essential parts of history archives then play a crucial role by providing evidence This book is both a tool and an inspiration to use archives in defence of human rights The Open Access version of this book available at <http://www.taylorfrancis.com/books/e> ISBN has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Pandemics, Public Health, and the Regulation of Borders Colleen M. Flood,Y.Y. Brandon Chen,Raywat Deonandan,Sam Halabi,Sophie Thériault,2024-02-15 This book examines how the COVID 19 pandemic has engendered a new and challenging environment in which borders drawn around people places and social structures have hardened and new ones have emerged Over the course of the COVID 19 pandemic borders closed or became unwelcoming at the international national sub national and local levels Debate persists as to whether those countries and territories that tightly managed their borders like New Zealand Australia or Hong Kong got it right compared to those that did not Without doubt a majority of those who suffered and died throughout the pandemic have been those from vulnerable populations Yet on the other hand efforts taken to manage the spread of the disease such as through border management have also disproportionately affected those who are most vulnerable How then is the right balance to be struck acknowledging too the economic and other imperatives that may dissuade governments from taking public health steps This book considers how international organizations countries and

institutions within those countries should conceive of and manage borders as the world continues to struggle with COVID 19 and prepares for the next pandemic Engaging a range of international and sub national examples the book thematizes the main issues at stake in the control and management of borders in the interests of public health This book will be of considerable interest to academics in the fields of health law anthropology economics history medicine public health and political science as well as policymakers and public health planners at national and sub national levels
