that is on the move with growing opportunities for both real and virtual travel and the blurring of boundaries between
previously defined places societies and cultures the theme of this book is firmly grounded in the interdisciplinary field of
Mobilities Mobilities deals with the movement of people objects capital information ideas and cultures on varying scales and
across a variety of borders from the local to the national to the global It includes all forms of travel from forced migration for
economic or political reasons to leisure travel and tourism to virtual travel via the myriad of electronic channels now
available to much of the world s population Underpinning the choice of theme is a desire to consider the important role of
languages and intercultural communication in travel and border crossings an area which has tended to remain in the
background of Mobilities research The chapters included in this volume represent unique interdisciplinary understandings of
the dual concepts of mobile language and border crossings from crossings in virtual life and real life to crossings in literature
and translation and finally to crossings in the semioscape of tourist guides and tourism signs This book was originally
