Special Correspondence and the Newspaper Press in Victorian Print Culture, 1850-1886 Catherine Waters, 2019-02-06 This book analyses the significance of the special correspondent as a new journalistic role in Victorian print culture within the context of developments in the periodical press throughout the second half of the nineteenth century Examining the graphic reportage produced by the first generation of these pioneering journalists through a series of thematic case studies it considers individual correspondents and their stories and the ways in which they contributed to and were shaped by the broader media landscape While commonly associated with the reportage of war special correspondents were in fact tasked with routinely chronicling all manner of topical events at home and abroad What distinguished the work of these journalists was their effort to picture the news to transport readers imaginatively to the events described While criticised by some for its sensationalism special correspondence brought the world closer shrinking space and time and helping to create our modern news culture **A Bibliography of Journalism** Hubert W. Peet, 1915 The Journalist's Library University of Missouri. School of Journalism, Charles Edward Kane, 1916 ... *Selections from American Authors* Pitnam, Sir Issac, and sons, publishers, 1892 **Powers of the Press** Aled Jones, 2016-12-05 The power of the popular press presents all modern societies with difficulties It is however a problem with a history the hold of the press over public opinion was debated with urgency throughout the 19th century This book looks at the ways in which individuals pressure groups political organisations and the state sought to understand the mass communications media of the 19th century and use them to influence public opinion and effect moral and social reform Aled Jones addresses the problem by using three approaches first he considers the 19th century theories of the influence of communications media on patterns of social thought and behaviour then he examines attitudes towards the press in both high and popular culture finally he explores the social and intellectual world of the reader the consumer both of the press as a commodity and of the hidden moral strategies that were built into it The tensions between Victorian moral imperatives and the operation of the free commercial market raised issues of great public

concern such as whether the mass media should be under private or public control These tensions have dominated the way in which Britain and other western societies have thought about the newer broadcasting media but their origins are older and more complex than studies of contemporary media acknowledge A guide to English composition James Henry Bacon,1892
