Graduate Students at Work Tessa Brown, 2023-02-28 Graduate Students at Work highlights the expertise and experiences of graduate students to demonstrate what graduate study entails what it makes possible and what it constrains in the context of corporatizing higher education This collection of full length research articles and short personal essays illustrates graduate students experiences organizing tactics and strategies for staying in or moving out of the academy Speaking from personal experience as well as reporting research findings the contributors of Graduate Students at Work illustrate the significant expertise that graduate students are asked to enact in their time intensive jobs as teachers researchers and administrators even as they are kept in poverty wages for the decade or so it takes to move through a master's and doctoral program into the promised land of a tenure track job While these students are the leaders of the academic labor movement they have yet to receive as much attention as adjunct instructors and other laborers in the university system Though they experience harassment discrimination and exploitation graduate students rarely have access to labor protections because they are often misclassified as students not employees a key rhetorical strategy universities use to fight graduate student organizing These essays and articles also draw insightful connections between the labor conditions of graduate student workers and other workers navigating poverty wages labor migration limited benefits and harassment and discrimination around lines of race gender ability and citizenship the most

important connection perhaps being the possibility for organization and unionization to fight for better working conditions for all

University Keywords Andy Hines, 2025-09-09 How American universities operate as social and economic engines that shape society beyond their traditional educational roles University Keywords gathers contextualizes and develops original understandings of 27 key terms that define the study and operation of the American university today Editor Andy Hines and the book s contributors invite readers to rethink the university beyond its public image as a space of learning and understand how it also operates as a real estate powerhouse a hedge fund a debt machine and even a crisis producing entity embedded in the broader American

economy Through essays written by over thirty contributors from a variety of disciplines this book examines the university's intersecting functions from its financial entanglements to its often contradictory roles in society Contributors illustrate how universities simultaneously link and separate communities faculty students nurses janitors and the surrounding public through administrative processes that promote a sense of isolation and division even within shared spaces By defining and expanding the terms that drive public and scholarly conversations about postsecondary education University Keywords situates what appear to be auxiliary aspects of colleges and universities as directly impacting and at times displacing the central academic mission of these institutions In its role as a crucible for societal hierarchies and economic interests the university both drives and reflects major shifts in social structure labor practices and economic power The book's exploration of key terms like debt police and union offers readers a new framework for understanding the university's transformation into an instrument of capital accumulation as well as its ongoing relevance in the fight for a world where education labor and social justice converge

Handbook of Research on Library Response to the COVID-19 Pandemic Holland, Barbara, 2021-03-19 Since the spread of COVID 19 conferences have been canceled schools have closed and libraries around the world are facing difficult decisions on which services to offer and how ranging from minimal restrictions to full closures Depending on the country state or city a government may have a different approach sometimes ordering the closure of all institutions others indicating that it's business as usual and others simply leaving decisions up to library directors All libraries worldwide have been affected from university libraries to public library systems and national libraries Throughout these closures libraries

continue to provide services to their communities which has led to an emerging area of research on library services new emerging technologies and the advancements made to libraries during this global health crisis The Handbook of Research on Library Response to the COVID 19 Pandemic consists of chapters that contain essential library services and emerging research and technology that evolved and or has continued during the COVID 19 pandemic as well as the challenges and opportunities that have been undertaken as a result The chapters provide in depth research surveys and information on areas such as remote working machine learning data management and the role of information during COVID 19 This book is a valuable reference tool for practitioners stakeholders researchers academicians and students who are interested in the current state of libraries during a pandemic and the future outlook Hendricks Chapel Richard L. Phillips,Donald G. Wright,2005-07-05 Hendricks Chapel is one of Syracuse University s most recognizable landmarks and a beloved campus institution standing both literally and figuratively at the heart of its campus The chapel has been the site of some of the university s most significant events from antiwar protests in the sixties to the vigil of nearly 3 000 people held on September 11 2001 Its efforts to foster intellectual cultural and spiritual growth within the campus community have drawn distinguished speakers from all fields the painter Grant Wood poets Carl Sandberg and Robert Frost novelists Paul Gallico and Ayn Rand the arctic explorer Vilhjalmur Stefansson politicians such as Franklin D Roosevelt Lyndon Johnson and Hillary Clinton and religious figures and social activists such as Paul Tillich the Dalai Lama Elie Wiesel and James Baldwin as well as scientists economists and other scholars This book with contributions from other deans and staff traces the history and evolution of the chapel from its construction in 1930 when it was dedicated to promoting the moral and spiritual welfare of the generations of young men and women at Syracuse University to its many current functions as an inclusive spiritual and social resource for the university and the community at large *Traumatic Defeat* Patrick Gallagher,2018-05-08 War breeds myths especially those made up by the vanquished to explain or soften their loss Occasionally the myths of the defeated center on prisoners of war POWs and those missing in action MIAs to justify the lost struggle mute national guilt and sometimes even reject the reality of defeat itself Traumatic Defeat takes a close comparative look at two cases of this kind of mythmaking in West Germany in the wake of World War II and in the United States after the Vietnam War The book examines a specific case of mythmaking that revolves around the ambiguity of missing men and the trauma resulting from their unresolved fates The secret camp myth so called for the covert facilities where the missing supposedly survive shared certain features in postwar Germany and America Both nations suffered extreme trauma and struggled to find redemptive elements in their wartime experiences both focused on POWs and MIAs to minimize their guilt and recast themselves as victims of wars they had started Author Patrick Gallagher examines the similarities between West Germany s myth aimed at men lost in the Soviet Union and America s myth directed at those missing in Southeast Asia The differences however are instructive particularly the longevity of the American myth involving a few thousand soldiers compared with the relative short life of the more

plausible German version involving millions In search of the nature and meaning of these myths Gallagher takes us into the wars themselves the circumstances in which soldiers went missing and the manner in which each nation framed its losses according to its own political ideological and historical needs Traumatic Defeat the first in depth comparative study of this phenomenon reveals how myths conjured in the trauma of military defeat can distort and dominate national conversations on the history of warfare aftermath and loss Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
