Gender: The Key Concepts Mary Evans, Carolyn Williams, 2013-02-11 This invaluable volume provides an overview of 37 terms theories and concepts frequently used in gender studies which those studying the subject can find difficult to grasp Each entry provides a critical definition of the concept examining the background to the idea its usage and the major figures associated with the term Taking a truly interdisciplinary and global view of gender studies concepts covered include Agency Diaspora Heteronormativity Subjectivity Performativity Class Feminist Politics Body Gender identity Reflexivity With cross referencing and further reading provided throughout the text Gender The Key Concepts unweaves the relationships between different aspects of the field defined as gender studies and is essential for all those studying gender in interdisciplinary contexts as undergraduates postgraduates and beyond

Politics and History Louis Althusser, 2020-05-05 In the first two essays of this book Louis Althusser analyses the work of two of the greatest thinkers of the Enlightenment Montesquieu and Rousseau He shows that although they made considerable advances towards establishing a science of politics particularly in comparison with the theorists of natural law they nevertheless remained the victims of the ideologies of their day and class Montesquieu accepted as given the political notions current in French absolutism Rousseau attempted to impose by moral conversion an already outdated mode of production The third essay examines Marx s relationship to Hegel and elaborates on the discussions of this theme in Althusser s earlier books For Marx and Lenin and Philosophy Althusser argues that Marx was able to establish a theory of historical materialism and the possibility of a Marxist philosophy of dialectical materialism not simply by turning his back on Hegel but by extracting and converting certain categories from Hegel s Logic and applying them to English political economy and French socialist political theory

Truth, Politics, Morality Cheryl Misak, 2002-02-07 Cheryl Misak argues that truth ought to be reinstated to a central position in moral and political philosophy She argues that the correct account of truth is one found in a certain kind of pragmatism a true belief is one upon which inquiry could not improve a belief which would not be defeated by experience and argument This account is not only an improvement on the views of central figures such as Rawls and Habermas but it can also make sense of the idea that despite conflict pluralism and the expression of difference our moral and political beliefs aim at truth and can be subject to criticism Anyone interested in a fresh discussion of political theory and philosophy will find this a fascinating read

Heidegger on Technology Aaron James Wendland, Christopher Merwin, Christos Hadjioannou, 2018-09-13 This collection offers the first comprehensive and definitive account of Martin

Heidegger's philosophy of technology It does so through a detailed analysis of canonical texts and recently published primary sources on two crucial concepts in Heidegger's later thought *Gelassenheit* and *Gestell* *Gelassenheit* translated as releasement and *Gestell* often translated as enframing stand as opposing ideas in Heidegger's work whereby the meditative thinking of *Gelassenheit* counters the dangers of our technological framing of the world in *Gestell* After opening with a scholarly overview of Heidegger's philosophy of technology as a whole this volume focuses on important Heideggerian critiques of science technology and modern industrialized society as well as Heidegger's belief that transformations in our thought processes enable us to resist the restrictive domain of modern techno scientific practice Key themes discussed in this collection include the history development and defining features of modern technology the relationship between scientific theories and their technological instantiations the nature of human agency and the essence of education in the age of technology and the ethical political and environmental impact of our current techno scientific customs This volume also addresses the connection between Heidegger's critique of technology and his involvement with the Nazis Finally and with contributions from a number of renowned Heidegger scholars the original essays in this collection will be of great interest to students of Philosophy Technology Studies the History of Science Critical Theory Environmental Studies Education Sociology and Political Theory

Karen Barad as Educator Karin Murris, 2022-04-12 This book is about becoming touched and moved by Karen Barad's agential realism Karen Barad as Educator is not biographical It is not about Barad There is much to be learned about teaching and education research through the human and other than human narrative characters in Barad's writings and way of life Reading this book is about becoming entangled with and being inspired by a passionate yearning for a radical reconfiguration of education in all its settings and phases e.g. day care centres schools colleges universities but also homes museums or therapy rooms This book will appeal to lecturers teachers artists therapists parents and grandparents funders of education research organisers of educational events as well as detached youth workers In short this book will speak to anyone interested in the what and the how of educational encounters and who is interested in alternatives to the dominant neoliberal national curricula educational policies and humanist teaching research and conference agendas The book aims to offer a gripping account for educators to be inspired by the invigorating and elusive philosophy of agential realism with a specific focus on iterative performative practices that profoundly matter to what counts as knowledge teaching learning and response able education science

Richard Rorty Michael Bacon, 2008-01-01 Michael Bacon gives a critical presentation of Rorty's writings on pragmatism and political theory comparing and contrasting him with pragmatists such as Hilary Putnam and Susan Haack and liberals such as John Rawls and Brian Barry The result is an imaginative presentation of one of contemporary philosophy's most innovative and important thinkers

Light Without Heat David Carroll Simon, 2018-06-15 Argues for the importance of states of careless inattention and easygoing dispassion to literary and scientific works inspired by Francis Bacon's philosophy of nature retrieving a counternarrative to the rise of scientific

method and its attendant ethos of rigor in the intellectual culture of seventeenth century England *After Heidegger?* Gregory Fried, Richard Polt, 2017-11-08 This unique volume collects more than 30 new essays by prominent scholars on what remains philosophically provocative in Heidegger's thought His writings continue to invite analysis and application particularly in the light of his political affiliations they must also be critiqued Philosophy today takes place after Heidegger in that his views should not be accepted naively and there are new issues that he did not address but also in that we continue to think in the wake of important questions that he raised The contributors to this volume ask questions such as What does it mean to think after Heidegger What is valuable in his early work on finite existence and in his early and late phenomenology What is the root of his political errors Are there still elements in his thought that can yield helpful political insights Should we emulate his turn toward releasement Can he help us understand the postmodern condition Readers will find thought provoking echoes and points of contention among these engaging and lively essays **Philosophical Interventions** Martha C. Nussbaum, 2012-01-24 This volume collects the notable published book reviews of Martha C Nussbaum an acclaimed philosopher who is also a professor of law and a public intellectual Her academic work focuses on questions of moral and political philosophy and on the nature of the emotions But over the past 25 years she has also written many book reviews for a general public in periodicals such as The New Republic and The New York Review of Books Dating from 1986 to the present these essays engage constructively and also critically with authors like Roger Scruton Allan Bloom Charles Taylor Judith Butler Richard Posner Catharine MacKinnon Susan Moller Okin and other prominent intellectuals of our time Throughout her views defy ideological predictability heralding valuable work from little known sources deftly criticizing where criticism is due and generally providing a compelling picture of how philosophy in the Socratic tradition can engage with broad social concerns For this volume Nussbaum provides an intriguing introduction that explains her selection and provides her view of the role of the public philosopher *The Politics of Rationality* Charles Webel, 2013-12-04 What are reason and rationality How significant are recent postmodernist and neuroscientific challenges to these longheld notions Should we abandon a belief in reason and an adherence to rationality Or can reason and rationality be reformulated and reframed And what does politics have to do with how we think about reason and why we act more or less rationally The Politics of Rationality differs from other books with reason or rationality due to its historical political depth psychological and multidisciplinary approach to understanding reason through history Charles P Webel eloquently clarifies the links among ideas their creators the relevant mental processes and the political cultures within which such important concepts as reasons and rationality take hold He demonstrates how reason and rationality irrationality have become what they mean for us today and proposes a way to rethink reason and rationality in light of the withering critiques leveled against them In doing so he presents a history of reason and rationality by examining the intellectual and political contexts of four representative theorists of reason and rationality Plato Machiavelli Kant and Weber and by addressing contemporary challenges posed by

postmodernism depth psychology and neurophilosophy **Alexander Bogdanov and the Politics of Knowledge after the October Revolution** Maria Chehonadskih,2023-12-30 In this book Maria Chehonadskih unsettles established narratives about the formation of a revolutionary canon after the October Revolution Displacing the centre of gravity from dialectical materialism to the rapid dissemination canonisation and decline of a striking convergence of empiricism and Marxism she explores how this tendency overshadowed by official historiography establishes a new attitude to modernity and progress nature and environment agency and subjectivity party and class knowledge and power The book traces the adventure of the synthesis of empiricism and Marxism across philosophy science politics art and literature from the 1890s to the 1930s offering a radical rethinking of the true scope and scale that the main proponent of Empirio Marxism Alexander Bogdanov had on the post revolutionary socialist legacies Chehonadskih draws on both key and forgotten figures and movements such as Proletkult Productivism and Constructivism filling a gap in the literature that will be particularly significant for Marxism continental philosophy art theory and Slavic studies specialists **Politics, Sociology, and Social Theory** Anthony Giddens,1995-01-01 This book is built upon a series of critical encounters with major figures in classical and present day social and political thought The volume offers not only a challenging critique of major traditions of social and political analysis but unique insights into the ideas which Anthony Giddens had developed over the past two decades **G.H. Mead** Filipe Carreira da Silva,2007-11-05 G H Mead is rightly considered to be one of sociology s founding fathers yet to date there have been surprisingly few books devoted to his life and work This book fills the gap by introducing Mead s ideas to a younger generation of social scientists Beginning with a biographical account of the main events in Mead s career Filipe Carreira da Silva provides a thorough examination of Mead s social theory of the self the reception of his ideas into sociology and the relevance of his work to the contemporary social sciences He focuses in detail on the core ideas associated with Mead s work including gesture and the significant symbol the I me distinction and the generalized other as well as exploring less well known aspects of his writing This comprehensive introduction to Mead s thinking will appeal to students across the social sciences providing a refreshing perspective on the social nature of the individual self Re-Thinking the Cogito Christopher Norris,2010-08-12 Re Thinking the Cogito seeks to combine a strongly naturalistic with a distinctively rationalist perspective on some nowadays much discussed issues in philosophy of mind Against the common view that they involve downright incompatible conceptions of mind knowledge and ethics it seeks to unite a naturalism that draws on recent advances in neurophysiology and cognitive science with an outlook that gives full weight to those normative values at the heart of rationalist thought True to the book s constructive spirit Norris offers various detailed proposals for bringing the two approaches into a mutually enhancing though also mutually provocative relationship He finds that claim strikingly prefigured in Spinoza s working out of a non reductive yet metaphysically uncompromising mind body monism Moreover he suggests how a thoroughly naturalised approach might yet become a locus of productive engagement with the work of an ultra

rationalist thinker such as Alain Badiou Thus Norris puts the case that physically embodied human thought has cognitive intellectual and creative powers that cannot and need not be accounted for in terms of conscious let alone self conscious reflection

The Politics of Constructionism Irving Velody, Robin Williams, 1998-06-10 This broad ranging and clearly structured book critically overviews the many themes of social constructionism and its relevance to contemporary social and political issues It brings together leading international contributors from across the social sciences drawing on insights from psychology sociology politics philosophy cultural gender and science studies Major questions and topics explored in its critique and application of constructionist ideas include the theory and practice of scientific method the development of social and political policy the use of social science statistical methods self identity and the politics of collective identities and technological advances in reproductive medicine

Politics in the impasse Bill Martin, 1996-01-10 This book contributes a radical politics of community one that engages with practical questions in the context of hypersecular postmodern capitalism Going beyond the bounds of the modern political spectrum of left and right even while tunneling within these boundaries and questioning the very idea of the spectrum Bill Martin moves from the possibilities of rethinking the socialist and Marxist projects through recent debates on liberalism and communitarianism the difficult issues of anti-Semitism in Marx and Marxism and the legacy of Mao for revolutionary practice to the practical issues raised by the Gulf War and its ideological aftermath and the 1992 uprisings in Los Angeles
