**The Possibility of Language** Alan K. Melby, C. Terry Warner, 1995 This book is about the limits of machine translation It is widely recognized that machine translation systems do much better on domain specific controlled language texts domain texts for short than on dynamic general language texts general texts for short The authors explore this general domain distinction and come to some

uncommon conclusions about the nature of language Domain language is claimed to be made possible by general language while general language is claimed to be made possible by the ethical dimensions of relationships Domain language is unharmed by the constraints of objectivism while general language is suffocated by those constraints Along the way to these conclusions visits are made to Descartes and Saussure to Chomsky and Lakoff to Wittgenstein and Levinas From these conclusions consequences are drawn for machine translation and translator tools for linguistic theory and translation theory The title of the book does not question whether language is possible it asks with wonder and awe why communication through language is possible      *The Place of the Mosque* Akel Ismail Kahera,2022-06-14 The Place of the Mosque Genealogies of Space Knowledge and Power extends Foucault s analysis Of Other Spaces and the ideological conflicts which underlie the controversies of our day and take place between pious descendants of time and tenacious inhabitants of space This book uses Foucault s framework to illuminate how mosques have been threatened in the past from the Cord ba Mosque in the eighth century to the development of Moorish aesthetics in the United States in the nineteenth century to the clashes surrounding the building of mosques in the West in the twentieth and twenty first centuries Akel Kahera uses Foucault s genealogy to elaborate on and study the subjects that are caught in the emergence of a battle the social and political will to power the networks of power and the rituals of power within the interstitial space In going beyond individual buildings to broader geographical and genealogical dimensions of the power struggles The Place of the Mosque reconciles the public space experience governmentality and micro powers paving the way for a new philosophical language Expanding architectural and urban regional approaches Kahera shows the biopolitical significance of the problem of space      **The Semiotic Web 1990: Recent Developments in Theory and History** Thomas A.
