## **Meaningful Differences In The Everyday Experience Of Young American Children:**

**Meaningful Differences in the Everyday Experience of Young American Children** Betty Hart, Todd R. Risley, 1995  
Meaningful Differences in the Everyday Experience of Young American Children is the story of the landmark research study that uncovered the widely cited word gap between children from low income homes and their more economically advantaged peers. This groundbreaking research has spurred hundreds of studies and programs including the White House's Bridging the Word Gap campaign and Too Small to Fail, a joint initiative of the Bill and Melinda Gates Foundation and the Clinton Foundation. Betty Hart and Todd Risley wanted to know why, despite best efforts in preschool programs to equalize opportunity, children from low income homes remain well behind their more economically advantaged peers years later in school. Each month they recorded one full hour of every word spoken at home between parent and child in 42 families categorized as professional, working class, or welfare families. Two and a half years of coding and analyzing every utterance in 1,318 transcripts followed. By age 3, the recorded spoken vocabularies of the children from the professional families were larger than those of the children in the welfare families. Between professional and welfare parents, there was a difference of almost 300 words spoken per hour. Extrapolating this verbal interaction to four years, a child in a professional family would accumulate experience with almost 45 million words, while an average child in a welfare family would hear just 13 million. Coining the phrase the 30 million word gap, the implications of this painstaking study are staggering. Hart and Risley's follow-up studies at age 9 show that the large differences in children's language experience were tightly linked to large differences in child outcomes. As the authors note in their preface to the 2002 printing of Meaningful Differences, the most important aspect to evaluate in child care settings for very young children is the amount of talk actually going on moment by moment between children and their caregivers. By giving children positive interactions and experiences with adults who take the time to teach vocabulary, oral language concepts, and emergent literacy concepts, children should have a better chance to succeed at school and in the workplace. Learn more about how parent and children's language interactions affect learning to talk in Hart and Risley's companion book, *The Social World of Children: Learning to Talk*. [Meaningful Differences in the Everyday Experience of Young American Children](#) Betty Hart, Todd R. Risley, 1995-01-01. This major new book describes the parent-child interactions of the language acquisition years, revealing differences in the experiences of one- and two-year-olds from families across a spectrum of socioeconomic status. The authors show how the amount of time parents spend talking to their children in the early years of life directly influences children's future accomplishments.

**Meaningful Differences in the Everyday Experience of Young American Children** Betty Hart, Todd R. Risley, 2007  
**Meaningful Differences in the Everyday Experience of Young American Children** Betty Hart, 2018-05. More widely cited than ever before, this book presents findings on the disparities in daily interactions between parents and children of different socioeconomic backgrounds and the effect of these disparities on children's vocabulary and later intellect.

**At A Loss For Words** Betty Bardige, 2011-02-07. Drawing on the

latest research on development among toddlers and preschoolers At a Loss for Words lays out the importance of getting parents policy makers and child care providers to recognize the role of early literacy skills in reducing the achievement gap that begins before three years of age Readers are guided through home and classroom settings that promote language contrasting them with the merely mediocre child care settings in which more and more young children spend increasing amounts of time Too many of our young children are not receiving the level of input and practice that will enable them to acquire language skills the key to success in school and life Bardige explains how to build better community support systems for children and better public education in order to ensure that toddlers learn the power of language from their families and teachers

The Death and Life of the Great American School System Diane Ravitch,2010-03-02 Discusses how school choice misapplied standards of accountability the No Child Left Behind mandate and the use of a corporate model have all led to a decline in public education and presents arguments for a return to strong neighborhood schools and quality teaching
