Measures for Clinical Practice and Research, Volume 2: Adults Kevin Corcoran, Joel Fischer, 2013-07-03 One of the key challenges of all types of practice and research is finding a way to measure the problem

This seminal 2 volume book contains hundreds of the most useful measurement tools for use in clinical practice and in research. All measures are critiqued by the editors who provide guidance on how to select and score them and the actual measures are wholly reproduced. This second volume focusing on measures for use with adults whose conditions of concerns are not focused on family relationships or couple relationships includes an introduction to the basic principles of measurement, an overview of different types of measures and an overview of the Rapid Assessment Inventories included herein. Volume II also contains descriptions and reviews of each instrument as well as information on how they were selected and how to administer and score them. This book is designed as the definitive reference volume on assessment measures for both practice and research in clinical mental health. This fifth edition of Corcoran and Fischers *Measures for Clinical Practice and Research* is updated with a new preface, new scales and updated information for existing instruments, expanding and cementing its utility for members of all the helping professions including psychology, social work, psychiatry, counseling, nursing and medicine. Alone or as a set, these classic compendiums are powerful tools that clinicians and researchers alike will find an invaluable addition to or update of their libraries.

Measures for Clinical Practice and Research: a Sourcebook Joel Fischer, Kevin Corcoran, David W. Springer, 2020. So far in this book we have reviewed the role of measurement to help in monitoring your client's progress and in evaluating your effectiveness using single system research designs. Our discussion included an overview of the basic principles of reliable and valid measures, the principles related to using measures in practice and issues regarding interpreting scores. We also discussed some of the different types of measures including the advantages and disadvantages of rapid assessment instruments. While we clearly believe this type of measure is particularly valuable, we know that there may be times when you will want other measurement tools as well as additional rapid assessment instruments. To this end, we presented information on determining what to measure within the context of practice, how to locate measures and pertinent questions you might ask when evaluating which measure to use. Finally, we presented some guidelines for you to consider when administering instruments.
