Media Control News As An Institution Of Power And Social Control:

Media Control Robert E. Gutsche, Jr., 2015-10-22 Media Control News as an Institution of Power and Social Control challenges traditional and even some radical perceptions of how the news works While it s clear that journalists don t operate objectively reporters don t just cover news but they make it Media Control goes a step further by arguing that the cultural institution of news approaches and presents everyday information from particular and dominant cultural positions that benefit the power elite From analysing how the press operate as police agents by conducting surveillance and instituting social order through its coverage of crime and police action to bolstering private business and neoliberal principles by covering the news through notions of boosterism Media Control presents the news through a cultural lens Robert E Gutsche Jr introduces or advances readers applications of critical race theory and cultural studies scholarship to explore cultural meanings within news coverage of police action the criminal justice system and embedding into the news democratic values that are later used by the power elite to oppress and repress portions of the citizenry Media Control helps the reader explicate how the power elite use the press and the veil of the Fourth Estate to further white ideologies and American Imperialism

commentary Humanising Critical Journalistic Translation Studies Ali Jalalian Daghigh, Pei Soo Ang, 2025-07-31 Ali Jalalian Daghigh and Pei Soo Ang's book provides new insights into the relationships between translation journalism ideology and power via a humanising approach. Carving out a niche within Journalistic Translation Studies, the book introduces and expands on Critical Journalistic Translation Studies (CJTS). The authors critically evaluate the state of the art while advocating for humanising research by focusing on the experiences of both translators and readers. Using the Chinese journalistic translation landscape as a case study, the book investigates the socio-political and socio-cognitive dimensions of journalistic translation. Through applications of sociological, cognitive, and critical discourse approaches, it sheds light on the working conditions of news translators, their cognitive and emotional experiences, the influence of power and ideology on the translation process, the effects of ideological manipulation on translated news texts, and the subsequent impact of such news on audience perceptions and emotions. By opening fresh methodological pathways, not only does this book illuminate the Chinese journalistic translation landscape, but it also opens new avenues in CJTS. This book is an indispensable resource for academics, postgraduate students, and researchers in Translation Studies, Media Studies, and Journalism Studies, offering a transformative focus on humanising CJTS.

News, Neoliberalism, and Miami's Fragmented Urban Space Moses Shumow, Robert E. Gutsche Jr., 2016-11-23 *News, Neoliberalism, and Miami's Fragmented Urban Space* examines cultural and social forces responsible for inequalities that have emerged in the rampant development of Miami as a world city. This book argues that neoliberal movements rely on the power of journalistic discourses to authorize and legitimize harmful social acts such as gentrification. Moses Shumow and Robert E. Gutsche Jr. provide original analyses of intersections among memory, race, capitalism, and journalistic power, particularly at a time of immense political and environmental change. The authors examine changes in neighborhoods and in public-private developments that are bound to widen an already great divide between classes and races in South Florida.

Geographies of Journalism Robert E. Gutsche Jr., Kristy Hess, 2018-10-09 *Geographies of Journalism* connects theoretical and practical discussions of the role of geotechnologies, social media, and boots on the ground journalism in a digital age to underline the complications and challenges that place-making in the press brings to institutions and ideologies. By introducing and applying approaches to geography, cultural resistance, and power as it relates to discussions of space and place, this book takes a critical look at how online news media shapes perceptions of locales. Through verisimilitude, storytelling methods, and journalistic evidence shaped by sources and news processes, the press plays a critical role in how audiences shape interpretations of social conditions here and there and place responsibility for socio-political issues that appear in everyday life. Issues of proximity, place, territory, news, myth, placemaking, and power align in this book of innovative and new assessments of journalism in the digital age. This is a valuable resource for scholars across the fields of human geography, journalism, and mass media.

Holding the Blue Line in Australia Virginia Small, 2025-09-26 This book examines the portrayal of contemporary policing in New South Wales Australia by mainstream media and how its sourcing of social media influences public opinion The observable and measurable consequences of this intermingling of news content with viewpoints is that mainstream media in tandem with social media influence political leaders to respond and pivot readily towards platformed views with either quick reactions through policymaking and new or revised legislation or arbitrarily letting matters slide The phenomenon is analysed through specific case studies in the book and the complications for police media and crisis management are identified This extensive research has relevance for policing globally because mainstream media relies heavily on social media content that is instantaneous global curated and reliant on marketable and readily understood narratives The book analyses the selective process by which actors in mainstream media construct news relying on prior framing narratives and perpetuating the received opinion of social media as if it represents general belief Media framing disrupts and interrupts public understandings of the role of policing and perpetuates

misunderstanding in the public arena of the institutional values and legislated responsibilities of a police force In addition strategies employed by social media activists to frame and re contextualise crisis events impact on police law enforcement operations and can hamper police capacity to respond to protect public safety Trumping the Media Michael Mario Albrecht,2022-08-11

The ascendancy of Donald J Trump to the office of president was not a fluke Changes in the media environment and changes in the political landscape converged and provided fertile ground for a demagogic populist to exploit existing structures for his personal and political gains A right wing ecosystem had developed that included cable television talk radio social media and imageboards The political rise of Trump occurred alongside a mainstreaming of far right politics and a skepticism towards long established institutions Trump was able to exploit the shifts in politics and the media environment for his political gain He deployed a post truth strategy that challenged established media and political institutions and their claims to be arbiters of truth and protectors of democracy This book explores the shifts in the media environment that made the political career of Donald Trump possible The author shows the ways that Trump was able to inhabit the new media and political landscape and take advantage of journalistic norms and practices that were susceptible to exploitation by a demagogue with no allegiance to the truth and no reverence towards the foundations of liberal democracy Understanding the ways in which Trump was able to emerge as a powerful political force is essential to those invested in challenging the momentum of the alt right and forwarding the project of democracy **Journalism Research in**

Ideas Go to Die Michael McDevitt (Professor of journalism),2020 Ideas die at the hands of journalists This is the controversial thesis offered by Michael McDevitt in a sweeping examination of anti intellectualism in American journalism A murky presence anti intellectualism is not acknowledged by reporters and editors It is not easily measured by scholars as it entails opportunities not taken context not provided ideas not examined Where Ideas Go to Die will be the first book to

document how journalism polices intellect at a time when thoughtful examination of our society's news media is arguably more important than ever. Through analysis of media encounters with dissent since 9/11, McDevitt argues that journalism engages in a form of social control routinely suppressing ideas that might offend audiences. McDevitt is not arguing that journalists are consciously or purposely controlling ideas but rather that resentment of intellectuals and suspicion of intellect are latent in journalism and that such sentiment manifests in the stories journalists choose to tell or not to tell. In their commodification of knowledge, journalists will, for example, clarify ideas to distill deviance, dismiss nuance as untranslatable, and funnel productive ideas into static partisan binaries. Anti-intellectualism is not unique to American media. Yet McDevitt argues that it is intertwined with the nation's cultural history and consequently baked into the professional training that occurs in classrooms and newsrooms. He offers both a critique of our nation's media system and a way forward to a media landscape in which journalists recognize the prevalence of anti-intellectualism and take steps to avoid it and in which journalism is considered an intellectual profession.

The BBC Asian Network Gurvinder Aujla-Sidhu, 2021-04-19. This ground-breaking new book provides a unique in-depth analysis of the BBC Asian Network, the BBC's national ethnic-specific digital radio station in the UK. Gurvinder Aujla-Sidhu offers an insight into the internal production culture at the radio station, revealing the challenges minority ethnic producers faced as they struggled to create a cohesive and distinct community of listeners. Besides the differences of opinion that emerged within the inter-generational British Asian staff over how to address the audience's needs, the book also reveals the ways in which race is managed by the BBC and how the culture of managerialism permeates recruitment strategies, music playlists, and mother-tongue language programmes. In-depth interviews unveil how the BBC's gatekeeping system limits the dissemination of original journalism about British Asian communities through the marginalisation of the expertise of narratives created by the network's own minority ethnic journalists.

Taking Conspiracy Theories Seriously Matthew R. X. Dentith, 2018-11-16. The contributors to this volume argue that whilst there is a commonplace superstition, conspiracy theories are examples of bad beliefs and that the kind of people who believe conspiracy theories are typically irrational. Many conspiracy theories are rational to believe; the members of the Dewey Commission were right to say that the Moscow Trials of the 1930s were a sham. Woodward and Bernstein were correct to think that Nixon was complicit in the conspiracy to deny any wrongdoing in the Watergate Hotel break-in, and if we either accept the terrorist events of 9/11 were committed by Al Qaeda or that the Bush Administration was responsible, then it seems we are endorsing some theory about a conspiracy to commit an act of terror on American soil. As such, there is no reason to reject conspiracy theories *sui generis*. This volume challenges the *prima facie* that conspiracy theories are irrational beliefs, arguing that we should treat conspiracy theories and the phenomena of conspiracy theories seriously. It presents fresh perspectives from the wider philosophical, sociological, and psychological community on what is becoming an issue of increasing relevance in our time.
