Identity Excellence Perry L. Glanzer, 2022-07-18 American higher education historically and inherently is a morally

formative endeavor Yet in order to respond to America's moral pluralism higher education has increasingly taken a reductionistic approach to moral formation Consequently it abandoned the effort to supply students with moral expertise Current approaches help students learn how to be excellent professionals and citizens but they fail to provide the necessary tools for living the good life in college and beyond Identity Excellence A Theory of Moral Expertise for Higher Education addresses this problem by setting forth a multi disciplinary theory of moral expertise for fostering moral excellence in an array of important identities To this end it teases apart the essential elements of what it means to be excellent in an identity before discussing the philosophical sociological psychological and educational processes necessary for students to internalize traditions of identity excellence as part of their own moral identities Overall the emergent theory exposes the shortcomings in contemporary general education professional ethics and co curricular education Finally this book sets forth a bold but compelling vision for a more hopeful future for American higher education As outlined within such education involves teaching students excellence in the Great Identities as well as how to prioritize and integrate their pursuit of identity excellence

Viva Journalism! John Calhoun Merrill, Ralph Lynn Lowenstein, 2010 In a previous book John Merrill and Ralph Lowenstein were the first journalism academics in America to predict correctly that newspapers and magazines as we know them would soon disappear to be replaced by digitized products Drawing on their long experience in journalism and journalism education they lay out in this book their observations suggestions and predictions not only for the American media but for the education of future journalists They believe many media moguls have abused their fiduciary responsibility to maintain the financial strength and credibility of the press They believe few university presidents understand the important relationship between journalism education and political democracy They describe the chain of neglect that has led to press insolvency staff unemployment and J school misdirection They believe print journalism will be the strongest form of journalism well into the future although the print will not be on paper It will be on what the authors call an s slate silicon slate and they believe that every individual from kindergartner to senior citizen will have a personal s slate in the future to retrieve and read books magazines and newspapers Merrill and Lowenstein assert that readers of the s slate will pay for everything they read The co authors

observe that journalism education's ties to professional journalism are more problematic than at any time in their mutual history and that there is an unfortunate lack of self examination about this tragic disconnect in both academe and the mass media One remedy they suggest is the addition of a half year to the undergraduate curriculum in which students immerse themselves in an intensive practicum involving print radio and television The reward at the end will be a meaningful certification in addition to their bachelor's degree The co authors also suggest that faculty should serve the media better and teach university administrators better about the true worth of journalism education to the political system **Journalism**
