Journey of Discovery Paula Johnson, 2004-04 Candid astonishing and commanding your attention Journey of Discovery reveals things hidden in the life of a writer Divulging secrets from the diary of a poet Paula Denise Johnson once again helps us to understand that a writer does not just write for the sake of writing but to convey the hidden world to us the best way they know how Some do this through novels short stories and songs but she through the art of poetry conveys her most honest and intimate thoughts to us The poems Hidden Realm and Loving Me are both reflections of a young woman s struggle to find true love within herself Through the bold and realistic poems Easily Led and No Love she explains how others explore themselves through other people without first taking time to love themselves The romantic sensual and erotic poems Paradisiacal Xperience and Loving This Man express notions of love by Paula Denise Johnson that are alluring but surprising This is an insightful look at the diary of a poet

The Joy of Discovery Walter Thirring, 2011 Walter Thirring is the last offspring of an Austrian family of scientists In this moving narrative he describes how he survived the Nazi occupation and became instrumental in reconstructing European science Thirring is one of the last living physicists who worked on the greatest discoveries and with the greatest scientists of the 20th century He recollects encounters with the old masters like Einstein Schrödinger Heisenberg Pauli and others as well as his collaborations with the present stars like Murray Gell Mann and Elliott Lieb The book presents the challenges faced when one of the major paradigm shifts took place namely the shift away from atomistic theory and Newtonian physics towards field theory and quantum mechanics Every step is presented in clear understandable language which reflects Thirring s extensive experience in training the next generation Additionally Thirring describes his fascinating and profound life experiences growing up under Nazi occupation serving in the war striving to establish scientific excellence and in reaching out across the Iron Curtain A true Renaissance man he concludes by discussing his love of music and it is clear that his passion for learning is only matched by his passion for music a sampling of which can be found at <http://phaidra.univie.ac.at/o:1459> A work that inspires at every junction and is decisively readable Thirring s autobiography is assuredly a must have for anyone interested in science physics and history
