Assistant Professor Morten Jerven, 2015-06-11 A valuable corrective to the fraying narrative of African failure *Foreign Affairs* Not so long ago Africa was being described as the hopeless continent Recently though talk has turned to Africa rising with enthusiastic voices exclaiming the potential for economic growth across many of its countries What then is the truth behind Africa's growth or lack of it In this provocative book Morten Jerven fundamentally reframes the debate challenging mainstream accounts of African economic history Whilst for the past two decades experts have focused on explaining why there has been a chronic failure of growth in Africa Jerven shows that most African economies have been growing at a rapid pace since the mid nineties In addition African economies grew rapidly in the fifties the sixties and even into the seventies Thus African states were dismissed as incapable of development based largely on observations made during the 1980s and early 1990s The result has been misguided analysis and few practical lessons learned This is an essential account of the real impact economic growth has had on Africa and what it means for the continent's future **Statistical Tragedy in Africa?**

Morten Jerven, Deborah Johnston, 2017-10-02 What do we know about economic development in Africa The answer is that we know much less than we would like to think This collection assesses the knowledge problem present in statistics on poverty agriculture labour education health and economic growth While diverse in origin the contributors to this book are unified in

two conclusions the quality and quantity of data needs to be improved and this is a concern not just for statisticians Weaknesses in statistical methodology and practice can misinform policy makers international agencies donors the private sector and the citizens of African countries themselves This is also a problem for academics from various disciplines from history and economics to social epidemiology and education policy Not only does academic work on Africa regularly use flawed data but many problems encountered in surveys challenge common academic abstractions By exploring these flaws this book will provide a guide for scholars policy makers and all those using and commissioning surveys in Africa This book was originally published as a special issue of The Journal of Development Studies

The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

The Economy of Ghana Mozammel Huq, Michael Tribe, 2018-09-12 The book follows a first edition published in 1989 which focused on the severe economic crisis Ghana faced during the late 1970s and the early 1980s In this second edition the authors extend the review up to the mid 2010s covering the entire period since independence with a special focus on shifts in economic policy starting with the adoption of the Economic Recovery Programme in 1983 Huq and Tribe provide systematic coverage of Ghanaian economic development since its independence reviewing the two main modes of development that have been practiced and offer an updated rich data bank By analyzing the wider macroeconomy of Ghana its individual sectors money banking and trade infrastructure and environmental policies and Ghana's poverty welfare and income distribution the authors are able to draw vital lessons from

the country's economic development **Livelihood and Landscape Change in Africa: Future Trajectories for Improved Well-Being under a Changing Climate** Sheona Shackleton, Paul Hebinck, Chinwe Ifejika Speranza, Vanessa Masterson, Dian Spear, Maria Tengö, 2019-10-08 This book is based on a Special Issue of the journal LAND that draws together a collection of 11 diverse articles at the nexus of climate change landscapes and livelihoods in rural Africa all explore the links between livelihood and landscape change including shifts in farming practices and natural resource use and management The articles which are all place based case studies across nine African countries cover three not necessarily mutually exclusive thematic areas namely smallholder farming livelihoods under new climate risk five articles long term dynamics of livelihoods and landscape change and future trajectories two articles and natural resource management and governance under a changing climate spanning forests woodlands and rangelands four articles The commonalities key messages and research gaps across the 11 articles are presented in a synthesis article All the case studies pointed to the need for an integrated and in depth understanding of the multiple drivers of landscape and livelihood change and how these interact with local histories knowledge systems cultures complexities and lived realities Moreover where there are interventions such as new governance systems REDD or climate smart agriculture it is critical to interrogate what is required to ensure a fair and equitable distribution of emerging benefits *Inequality Knowledge* Felix Römer, 2023-11-06 Poverty and inequality have pervaded British society to this day but this has not always been self evident to contemporaries popular understandings have depended on existing knowledge *Inequality Knowledge* provides the first detailed history of the numbers about the gap between rich and poor It shows how they were produced used and suppressed at times and how activists scientists and journalists eventually wrestled control over the figures from the state The book traces the making and the politics of statistical knowledge about economic inequality in the United Kingdom from the post war era to the 1990s What kind of knowledge was available to contemporaries about socio economic disparities in Britain and how they evolved over time How was this knowledge produced and by whom What did policy makers and civil servants know about the extent of poverty and inequality in British society and to what extent did they take the distributional impact of their social and fiscal policies into account Far from just a technical matter inequality knowledge had far reaching implications for key debates and the wider political culture in contemporary Britain *Historicizing inequality knowledge* speaks to a long tradition of historical research about social class divisions and cultural representations of economic disparities in twentieth century Britain

The Green State in Africa Carl Death, 2016-01-01 A provocative reassessment of the relationship between states and environmental politics in Africa From climate related risks such as crop failure and famine to longer term concerns about sustainable urbanization environmental justice and biodiversity conservation African states face a range of environmental issues As Carl Death demonstrates the ways in which they are addressing them have important political ramifications and challenge current understandings of green politics Death draws on almost a decade of research to reveal how central African
