Metaphor and the Historical Evolution of Conceptual Mapping R. Trim, 2011-10-03 An investigation of the historical evolution of figurative language within the framework of cognitive linguistics It examines how and why metaphors evolve through the ages discusses the role of culture patterns of metaphor evolution how many people use particular expressions Mapping English Metaphor Through Time Wendy Anderson, Ellen Bramwell, Carole Hough, 2016-08-18 This volume offers an empirical and diachronic investigation of the foundations and nature of metaphor in English Metaphor is one of the hot topics in present day linguistics with a huge range of research focusing on the systematic connections between different concepts such as heat and anger fuming inflamed sight and understanding clear see or bodies and landscape hill foot river mouth Until recently the lack of a comprehensive data source made it difficult to obtain an overview of this phenomenon in any language but this changed with the completion in 2009 of The Historical Thesaurus of English the only historical thesaurus ever produced for any language Chapters in this volume use this unique resource as a basis for case studies of semantic domains including Animals Colour Death Fear Food Reading and Theft providing a significant step forward in the data driven understanding of metaphor *Mapping the Origins of Figurative Language in Comparative Literature* Richard Trim, 2021-10-05 This book investigates the origins of figurative language in literary discourse within a cognitive framework It represents an interface between linguistics and literature and develops a 6 tier theoretical model which analyses the different factors contributing to the creation of figurative words and expressions By examining features ranging from language structure to figurative thought cultural history reference narrative and the personal experience of authors it develops a global overview of the processes involved Due to its particularly innovative characteristics in literature the theme of death is explored in relation to universal concepts such as love and time These aspects are discussed in the light of well known authors in comparative literature such as D H Lawrence Simone De Beauvoir Hermann Hesse and Jorge Luis Borges The origins can involve complex conceptual mappings in figures of speech such as metaphor and symbolism They are often at the roots of an author's personal desires or represent the search for answers to human existence This approach offers a wide variety of new ideas and research possibilities for postgraduate and research students in modern languages linguistics and literature It would also be of interest to academic researchers in these disciplines as well as the general public who would like to delve deeper into the relevant fields **The Routledge Handbook of Metaphor and Language** Elena Semino, Zsófia Demjén, 2016-11-03 The Routledge Handbook of Metaphor and Language provides a comprehensive overview of state of the art interdisciplinary research on metaphor and language Featuring 35 chapters written by leading scholars from around the world the volume takes a broad view of the field of metaphor and language and brings together diverse and distinct theoretical and applied perspectives to cover six key areas Theoretical approaches to metaphor and language covering Conceptual Metaphor Theory Relevance Theory Blending Theory and Dynamical Systems Theory Methodological

approaches to metaphor and language discussing ways of identifying metaphors in verbal texts images and gestures as well as the use of corpus linguistics Formal variation in patterns of metaphor use across text types historical periods and languages Functional variation of metaphor in contexts including educational commercial scientific and political discourse as well as online trolling The applications of metaphor for problem solving in business education healthcare and conflict situations Language metaphor and cognitive development examining the processing and comprehension of metaphors The Routledge Handbook of Language and Metaphor is a must have survey of this key field and is essential reading for those interested in language and metaphor *Metaphor across Time and Conceptual Space* James J. Mischler, III, 2013-09-18 Contemporary linguistic forms are partially the product of their historical antecedents and the same is true for cognitive conceptualization The book presents the results of several diachronic corpus studies of conceptual metaphor in a longitudinal and empirical mixed methods design employing both quantitative and qualitative analysis measures the study design was informed by usage based theory The goal was to investigate the interaction over time between conceptualization and cultural models in historical English speaking society The main study of two linguistic metaphors of anger spans five centuries A D 1500 to 1990 The results show that conceptualization and cultural models understood as non autonomous encyclopedic knowledge work together to determine both the meaning and use of a linguistic metaphor In addition historically a wide variety of emotion concepts formed a complex cognitive array called the Domain Matrix of emotion The implications for conceptual metaphor theory research methodology and future study are discussed in detail **Extended Conceptual Metaphor Theory** Zoltán Kövecses, 2020-04-23 The phenomenon known as metaphor is an extremely complex mental event we cannot capture its complexity if we tie ourselves to existing standard views on metaphor This book offers fresh insight into metaphor updating an established theory conceptual metaphor theory CMT in the context of current cognitive linguistic theory and clarifying many of the issues that researchers in the study of metaphor have raised against conceptual metaphor theory Starting with an introduction to CMT the subsequent chapters set out propositions for Extended Conceptual Metaphor Theory including a discussion on whether literal language exists at all whether conceptual metaphors are both conceptual and contextual and whether they are both offline and online Providing a fresh take on a constantly developing field this study will enrich the work of researchers in areas ranging from metaphorical cognition to literary studies **Variation in Metonymy** Weiwei Zhang, 2016-04-11 The monograph presents new findings and perspectives in the study of variation in metonymy both theoretical and methodological Theoretically it sheds light on metonymy from an onomasiological perspective which helps to discover the different conceptual or lexical pathways through which a concept or a group of concepts has been designated by going back to the source concepts In addition it broadens the perspective of Cognitive Linguistics research on metonymy by looking into how metonymic conceptualization and usage may vary along various dimensions Three case studies explore significant variation in metonymy across different languages time periods genres and social lects

Methodologically the monograph responds to the call in Cognitive Linguistics to adopt usage based empirical methodologies The case studies show that quantification and statistical techniques constitute essential parts of an empirical analysis based on corpus data The empirical findings demonstrate the essential need to extend research on metonymy in a variationist Cognitive Linguistics direction by studying metonymy s cultural historical and social lectal variation Researching Metaphors Michele Prandi,Micaela Rossi,2022-09-07 This collection advocates for a more holistic picture of metaphor extending the field s focus beyond the cognitive paradigm and conventional metaphorical concepts to illustrate the possibilities afforded by the study of living metaphors The volume brings together a diverse range of researchers in the discipline towards critically examining the presuppositions of the cognitive approach The book shines a light on living metaphors creative interpretations of conflictual meaning specific to a text or communicative act with their own unique functions to throw into relief long held tenets in existing metaphor research Chapters reflect on the notion that creative metaphors spring from independent sources not merely from metaphorical concepts and the subsequent implications for our understanding of the relationship between linguistic forms and conceptual structures and the role of creative metaphors in organizing thought and action Taken together the book offers a complementary vision of languages and figures which integrates disparate lines of study within the cognitive paradigm with alternative perspectives for a more comprehensive portrait of metaphors This book will be of interest to students and scholars interested in the study of metaphor including such disciplines as theoretical linguistics cognitive linguistics semantics literary studies and philosophy of language

Metaphor and Metonymy across Time and Cultures Javier E. Díaz-Vera,2014-12-11 This volume offers new insights into figurative language and its pervasive role as a factor of linguistic change The case studies included in this book explore some of the different ways new metaphoric and metonymic expressions emerge and spread among speech communities and how these changes can be related to the need to encode ongoing social and cultural processes in the language They cover a wide series of languages and historical stages

Proverbs within Cognitive Linguistics Sadia Belkhir,2024-06-15 The volume presents an innovative set of researches featuring theoretical and practical discussions of the proverb in cognition and culture To date there seems to be a

Korangy,2024-05-31 Bringing together a wide selection of work on cultural linguistics and pragmatics this comprehensive handbook offers global comparative insights into the field Diversity does not always imply differences but it also offers insights into surprising similarities and parallels when it comes to expressions By the same token this collection shows that when we see that linguistic differences when they exist stem from not merely language but from the cultural and historical context that cultivates and nurtures them Within that paradigm then this handbook locates the importance of philosophy religion or even the lack thereof political affiliations and so on in forming expressions In addition comparisons with other models of cultural linguistics are undertaken These trends provide readers with a comprehensive introduction to issues in cultural linguistics addressing the peculiarities of the field under the rubric of localized studies and speaking to the possibilities that exist in interpretation of what metaphors are The book highlights the complexities that are so tightly interwoven into the fabric of every word and a sentence across cultures and linguistic traditions A must have collection for anthropologists philosophers linguists philologists theoreticians rhetoricians and scholars of poetics this is the one stop reference in cultural linguistics Metaphor from the Ground Up Daniel C. Strack,2019-02-20 Metaphor from the Ground Up introduces Conceptual Filtering Theory a theory of mental processing that describes figurative language communication in terms of conceptual domain projection and contextual disambiguation In an attempt to match theoretical observations from cognitive semantics and pragmatics with related knowledge about mental processes from cognitive neuroscience CFT first examines the distributed nature of conceptualization and then uses this background information to explain metonymic binding and metaphoric mapping Once the perceptual origins of metonymy and metaphor have been demonstrated CFT offers a detailed account of how salient aspects of conceptualization differentially combine to achieve predictable inferencing results in linguistic communication In addition CFT characterizes the role of contextual effects in pruning salient inferencing options and demonstrates how situational frames can be manipulated to guide semantic outcomes The book as a whole will

assert that figurative language processing cannot be characterized in terms of a generically constituted base system that receives inputs and spits out predictable results according to logical probability in a situational vacuum Rather it is a dynamic context sensitive process that continually reweights the underlying system so as to rapidly select situation relevant lines of inferencing from among a variety of salient inferencing options *Language, Expressivity and Cognition* Mikolaj Deckert,Piotr Pezik,Raffaele Zago,2023-01-26 Providing an up to date multi perspective and cross linguistic account of the centrality of the expressive function in communication this book explores the conceptualization of emotions in language and the high emotional temperature of a variety of contemporary discourses Adopting a number of methodological angles both qualitative and quantitative the chapters present insights from cognitive linguistics critical discourse analysis corpus linguistics and sociolinguistics as well as those resulting from the combination of these approaches Using a wide variety of data types from song lyrics and TV series to Twitter posts and political speeches and through the analysis of a range of languages including Arabic English Polish Italian Hungarian and Turkish the book offers a panoramic view of the multifaceted interaction between language expressivity and cognition **Metamorphoses of the Absolute** Otto

Neumaier,Daina Teters,2019-01-10 This collection of essays is devoted to the diversity of the conceptual and terminological definitions of the notion of the absolute Absolute comprises both the concepts of the Western world related to God and the verbal constructions flowing from these ideas in the spheres of law philosophy linguistics politics medicine literature and arts Over time absolute and its neologisms have undergone various modifications assuming the associated characteristics of syntactic ambiguity and inflation Absolute can imply an increase in the degree of a quality attached to some object or phenomenon and can be used as either an adverbial modifier or a proper noun In its appearances as a procedural term absolute mostly conveys a negative connotation when evaluating some action The question posed in this book is not what absolute is but what possibilities exist with regard to perceiving and conceptualizing it in human terms both historically and in the present *Metaphors of ANGER across Languages: Universality and Variation* Zoltan Kövecses,Réka

Benczes,Veronika Széld,2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger

and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context

Unpacking Metaphor-related Prepositions in Political Discourse Mokhtar Ounis, 2023-11-27 This book explores the context around why English prepositions are used in figurative language more frequently than nouns and verbs using corpus based evidence to examine the most often used prepositions and how they are employed and for what purpose While research on cognitive approaches to metaphor has significantly expanded in recent decades little attention has been paid to prepositions as vehicles of figurative language owing to their polysemous complex and inconsistent nature To bridge this gap Ounis introduces an innovative conceptual framework that integrates conceptual metaphor theory diachronic linguistics and discourse pragmatics Drawing upon an extensive corpus of American presidential inaugural addresses this book considers the linguistic conceptual pragmatic and contextual dimensions of English prepositions revealing the fascinating interplay between language culture and cognition This volume will be of interest to scholars in pragmatics metaphor studies English language rhetoric studies and historical linguistics

The Dynamic Lexicon of English Julia Landmann, 2023-05-08 The open access publication of this book has been published with the support of the Swiss National Science Foundation This study investigates the interrelation between use meaning and the mind as a central issue of contact induced linguistic variation and change using the influence of French Spanish German and Yiddish on English as case studies It relies on innovative methodological approaches including the use of an integrative socio cognitive model of the dynamic lexicon to describe borrowing processes and their linguistic outcomes The multitude of socio cultural contexts relevant to the introduction of the various borrowings since the nineteenth century has been reconstructed This implies the identification of borrowings reflecting connections of linguistic features and culturally embedded attitudes Taking the effects of cognitive and social factors on conventionalization and entrenchment processes into account this study makes an original contribution to existing research

Mixing Metaphor Raymond W. Gibbs, Jr., 2016-03-18 Mixing metaphors in speech writing and even gesture is traditionally viewed as a sign of inconsistency in thought and language Despite the prominence of mixed metaphors there have been surprisingly few attempts to comprehensively explain why people mix their metaphors so frequently and in the particular ways they do This

volume brings together a distinguished group of linguists psychologists and computer scientists who tackle the issue of how and why mixed metaphors arise and what communicative purposes they may serve These scholars almost unanimously argue that mixing metaphors is a natural consequence of common metaphorical thought processes highlighting important complexities of the metaphorical mind *Mixing Metaphor* for the first time offers new critical empirical and theoretical insights on a topic that has long been ignored within interdisciplinary metaphor studies
