Metaphors Of Mind Metaphors Of Mind:

Metaphors of Mind Robert J. Sternberg, 1990-07-27 *Metaphors of Mind* seeks to help readers understand human intelligence as viewed from a variety of standpoints such as those of psychology anthropology computational science sociology and philosophy Much of the present confusion surrounding the concept of intelligence stems from our having looked at it from these different standpoints without considering how they relate to each other or how they might be combined into a unified view that goes beyond the boundaries of a particular discipline Readers of *Metaphors of Mind* will come away with a comprehensive understanding of the concept of intelligence and how ideas about it have evolved and are continuing to evolve

Metaphors of Memory D. Draaisma, 2000-12-07 What is memory It is at the same time ephemeral unreliable and essential to everything we do Without memory we lose our sense of identity reasoning even our ability to perform simple physical tasks Yet it is also elusive and difficult to define and throughout the ages philosophers and psychologists have used metaphors as a way of understanding it First published in 2000 this fascinating book takes the reader on a guided tour of these metaphors of memory from ancient times to the present day Crossing continents and disciplines it provides a compelling history of ideas about the mind by exploring the way these metaphors have been used metaphors often derived from the techniques and instruments developed over the years to store information ranging from wax tablets and books to photography computers and even the hologram Accessible and thought provoking this book should be read by anyone who is interested in memory and the mind

Metaphors of Mind in Fiction and Psychology Michael S. Kearns, 2021-10-21 Curiosity about the human mind what it is and how it functions began long before modern psychology But because the mind and its processes are so elusive they could be described only by means of metaphor Michael Kearns in this prize winning study examines the development of metaphors of the mind in psychological writings from Hobbes through William James and in fiction from Defoe through Henry James Throughout the eighteenth century and even into the early nineteenth metaphors of the mind as a relatively simple entity either mechanical or biological dominated both those engaged in psychological theorizing and novelists ranging from Richardson and Smollett through Dickens and the Brontes In the nineteenth century such psychologists as Herbert Spencer and Alexander Bain conceived of the mind as a complex organism quite different from that embodied in earlier thinking but their figurative language did not keep pace The result was a tension between theoretical expression and actual discussion of mental phenomena

Metaphors: Figures of the Mind Z. Radman, 1996-12-31 This book deals with various aspects of metaphors and yet it is not only or perhaps not even primarily about metaphor itself Rather it is concerned with the argument from metaphor In other words it is about what I think we can learn from metaphor and the possible consequences of this lesson for a more adequate understanding for instance of our mental processes the possibilities and limitations of our reasoning the strictures of propositionality the cognitive effect of fictional projections and so on In this sense it is not strictly speaking a contribution to metaphorology instead it is an attempt to define the place of metaphor in the world of overall human intellectual activity exemplary thematized here in the span that ranges from problems relating to the articulation of meanings up to general issues of creativity Most of the aspects discussed therefore are examined not so much for the sake of gaining some new knowledge about metaphor work conducted in the science of metaphor is presently so huge that an extra attempt to spell out another theory of metaphor may have an inflationary effect the basic strategy of this book is to view metaphor within the complex of language usage and language competence in human thought and action and finally to see in what philosophically relevant way it improves our knowledge of ourselves Certainly by adopting this basic strategy we also simultaneously increase our knowledge of metaphors of their functions and importance

Metaphors: Figures of the Mind Zdravko Radman, 1977 *Metaphors for the Mind* Colin Murray Turbayne, 1991 Turbayne analyzes the significance of metaphor in human thought by exploring historical traditions of philosophy Probing into the early philosophies of Plato and Aristotle Turbayne traces the influence that Platonic metaphors have held for later important philosophers such as Berkeley and Kant By showing how modern theories of human thought and language including the substance and attribute theory arose from the procreation model as presented in Plato's Timaeus Turbayne makes a contribution to the current philosophical debates concerning relativist realist In the discussion the author restores the model to its original state in which the female and male hemispheres of the mind work as partners to create our world

Eighteenth-Century Metaphors of Mind Brad Pasanek, 2006 **Mind, Metaphor and Language Teaching** R. Holme, 2003-12-16 Understanding metaphor raises key questions about the relationship between language and meaning and between language and mind This book explores how

this understanding can impact upon the theory and practice of language teaching After summarising the cognitive basis of metaphor and other figures of speech it looks at how this knowledge can inform classroom practice Finally it sets out how we can use these insights to re appraise language learning theory in a way that treats it as consonant with the cognitive nature of language

Mind as Metaphor Adam Toon,2023 Mind as Metaphor shows that mental fictionalism can make sense of our concept of mind avoiding the difficulties faced by alternative approaches such as behaviourism or instrumentalism Adam Toon sheds light on a range of issues from the mind s capacity to represent the world to the way in which new practices expand the limits of inquiry

Current Approaches to Metaphor Analysis in Discourse Ignasi Navarro i Ferrando,2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable the book emphasizes and claims that the background framework of CMT provides a

solid foundation for collaboration and mutual influence. Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals. The analysis of cognitive configuration of conceptual domains may in turn illuminate our understanding of communicative decisions in discourse. The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances. The various subject areas and methodologies illuminate the scene of current research in the field. The poignant contributions open far reaching avenues into the realm of human thought and discourse.

Metaphors of Mind in 19th & 20th Century Psychology Deborah L. Martin, 1987 *Metaphors in the Mind* Jeannette Littlemore, 2019-08-15 Abstract concepts are often embodied through metaphor. For example we talk about moving through time in metaphorical terms as if we were moving through space allowing us to look back on past events. Much of the work on embodied metaphor to date has assumed a single set of universal shared bodily experiences that motivate our understanding of abstract concepts. This book explores sources of variation in people's experiences of embodied metaphor including for example the shape and size of one's body, one's age, gender, state of mind, physical or linguistic impairments, personality, ideology, political stance, religious beliefs and linguistic background. It focuses on the ways in which people's experiences of metaphor fluctuate over time within a single communicative event or across a lifetime. Combining theoretical argument with findings from new studies, Littlemore analyses sources of variation in embodied metaphor and provides a deeper understanding of the nature of embodied metaphor itself.

The Act of Thinking Derek Melser, 2004-09-03 A new theory proposes that thinking is a learned action. In this remarkable monograph, Derek Melser argues that the core assumption of both folk psychology and cognitive science that thinking goes on in the head is mistaken. Melser argues that thinking is not an intracranial process of any kind, mental or neural, but is rather a learned action of the person. After an introduction in which he makes a *prima facie* case that thinking is an action, Melser reviews action-based theories of thinking advanced by Ryle, Vygotsky, Hampshire and others. He then presents his own theory of token concerting according to which thinking is a special kind of token performance by the individual of certain social concerted activity. He examines the developmental role of concerted activity, the token performance of concerted activity, the functions of speech, the mechanics and uses of covert tokening, empathy, the origins of solo action, the actional nature of perception and various kinds and aspects of mature thinking. In addition, he analyzes the role of metaphors in the folk notion of mind. While intending his theory as a contribution to the philosophy of mind, Melser aims also at a larger goal: to establish actions as a legitimate philosophical given, self-explanatory and *sui generis*. To this end, he argues in the final chapter against the possibility of scientific explanation of actions. *The Act of Thinking* opens up a large new area for philosophical research.

Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Szélid, 2024-11-04 Anger is one of the basic emotions of human emotional experience, informing and guiding many of our choices and actions. Although it has received considerable scholarly attention in a number

of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context *Metaphor and Artificial Intelligence* John A. Barnden, Mark G. Lee, 2001-03-01 This special issue arose out of a symposium on metaphor and artificial intelligence in which the main orientation was computational models and psychological processing models of metaphorical understanding The papers in this issue discuss implemented computational systems for handling different aspects of metaphor understanding how metaphor can be accommodated in accepted logical representational frameworks psychological processes involved in metaphor understanding and the cross linguistic cognitive reality of conceptual metaphors
