**Radiography** Eugene D. Frank, Bruce W. Long, Barbara J. Smith, Vinita Merrill, 2007-01 This handy pocket companion presents radiographic essentials in a quick reference format ideal for the clinical setting. Bulleted step by step explanations illustrate how to position the patient for 200 of the most common radiographic projections including mobile and neonatal procedures. Unique to this guide is coverage of digital radiography and reference radiographs with each positioning presentation. Each projection presentation includes a diagnostic quality radiograph demonstrating the result the radiographer should achieve. User friendly two page spread design allows the reader to easily access information. Bulleted step by step procedures with instructions for positioning the patient and body part help the user perform radiographic exams quickly and efficiently. Tabs have been added to help the user find information quickly. Two color format highlights important information. A special Digital Radiography DR icon alerts the reader to follow specific instructions and make the necessary positioning adjustments when DR is used to get optimal imaging results. A handy exposure technique chart for every projection with manual and AEC techniques reduces the need for repeat radiographs and improves image quality. A section on mobile projections is a convenient resource for examining patients outside of the radiology suite. A helpful list of abbreviations and definitions plus a diagram and chart of external landmarks inside the covers provides a convenient reference for frequently used information. Now includes kVp settings for each projection to help the radiographer set the kVp as appropriate procedure is done. Special Compensating Filter icon alerts the reader when using a compensating filter is likely to improve overall image quality.

Merrill's Atlas of Radiographic Positioning and Procedures - E-Book Eugene D. Frank, Bruce W. Long, Barbara J. Smith, 2013-08-13 With more than 400 projections presented, Merrill's Atlas of Radiographic Positioning and Procedures remains the gold standard of radiographic positioning texts. Authors Eugene Frank, Bruce Long, and Barbara Smith have designed this comprehensive resource to be both an excellent textbook and also a superb clinical reference for practicing radiographers and physicians. You'll learn how to properly position the patient so that the resulting radiograph provides the information needed to reach an accurate diagnosis. Complete information is included for the most common projections as well as for those less commonly requested. Comprehensive coverage of anatomy and positioning makes Merrill's Atlas the most in depth text and reference available for radiography students and practitioners. Essential projections that are frequently performed are identified with a special icon to help you focus on what you need to know as an entry level radiographer. Full color presentation helps visually clarify key concepts. Summaries of pathology are grouped in tables in positioning chapters for quick access to the likely pathologies for each bone group or body system. Special chapters including trauma, surgical radiography, geriatrics, pediatrics, and bone densitometry help prepare you for the full scope of situations you will encounter. Exposure technique charts outline technique factors to use for the various projections in the positioning chapters. Projection summary tables at the beginning of each procedural chapter offer general chapter overviews and serve as handy study guides. Bulleted lists provide clear instructions on how to correctly position the patient and body
