**International and National Courts and the (De-)Fragmentation of International Law** Ole Kristian Fauchald,André Nollkaemper,2014-10-01 In recent decades there has been a considerable growth in the activities of international tribunals and the establishment of new tribunals Furthermore supervisory bodies established to control compliance with treaty obligations have adopted decisions in an increasing number of cases National courts further add to the practice of adjudication of claims based on international law While this increasing practice of courts and supervisory bodies strengthens the adjudicatory process in international law it also poses challenges to the unity of international law Most of these courts operate within their own special regime functional regional or national and will primarily interpret and apply international law within the framework of that particular regime The role of domestic courts poses special challenges as the powers of such courts to give effect to international law as well as their actual practice in applying such law largely will be determined

by national law At the same time both international and national courts have recognised that they do not operate in isolation from the larger international legal system and have found various ways to counteract the process of fragmentation that may result from their jurisdictional limitations This book explores how international and national courts can and do mitigate fragmentation of international law It contains case studies from international regimes including the WTO the IMF investment arbitration and the ECtHR and from various national jurisdictions including Japan Norway Switzerland and the UK providing a basis for conclusions to be drawn in the final chapter

National Identity in EU Law Elke Cloots,2015-02-12 Despite nearly sixty years of European integration neither nations nor national

loyalties have withered away On the contrary national identity rhetoric seems on the rise not only in politics but also in legal discourse Lately we have seen a rise in the number of Member States invoking their national identity in an attempt to justify a derogation from a requirement imposed on them by a Treaty article or an EU legislative act or to legitimize a particular

national reading of such an EU norm Despite this the European Court of Justice ECJ has yet to develop a coherent approach to such arguments or express a vision of the role national identity should play in EU law Elke Cloots undertakes this task by

providing a principled and coherent scheme for the adjudication of disputes involving claims based on the national identity of a Member State Should arguments involving national identity be legally relevant If yes how should the ECJ approach such

identity related interests Cloots crafts a normative framework to assist the ECJ in striking the right balance between European integration and respect for the identity concerns at issue The book combines rigorous theoretical inquiry with

thorough analysis of the European Treaties and case law with particular attention paid to litigation involving domestic measures concerning the national system of government constitutional rights protections and language policy Clarifying the

issues at stake and presenting a solution to these problems this book will be an invaluable resource for the academics

lawyers and policy makers in the field     A Compilation of the Messages and Papers of the Presidents, Prepared Under the Joint Committee on Printing of the House and Senate, Pursuant to an Act of the Fifty-second Congress of the United States (with Additions and Encyclopedic Index by Private Enterprise) United States. President, 1897
